

the commission members wrote that "while predicting the future can be hazardous, sometimes it can be done."⁸⁹

In the report, commission members looked fifty years into the future: "We are confident that the next century will see pioneering men and women from many nations working and living throughout the inner Solar System. Space travel will be as safe and inexpensive for our grandchildren as jet travel is for us."⁹⁰ Members of the commission lavishly illustrated their report with paintings of lunar settlements, orbiting spaceports, transportation systems, robotic probes, space prospecting, and bases on Mars.

The dream continued. In 1987 NASA administrator James Fletcher established the Office of Exploration, set up to help win support for human expeditions to the Moon and Mars.⁹¹ In his last year in office, President Ronald Reagan approved a national space policy that included a goal "to expand human presence and activity beyond Earth orbit into the solar system."⁹² In July of 1989 a special NASA working group submitted a conceptual plan for a lunar outpost and a human expedition to Mars.⁹³ In a speech later that month from the steps of the National Air and Space Museum in Washington, D.C., President George Bush endorsed those goals. In addition to endorsing the lunar base and Mars expedition, Bush went beyond, becoming the first chief executive to suggest that humans would someday leave the solar system for nearby stars: "You who are the children of the new century—raise your eyes to the heavens and join us in a great dream—an American dream—a dream without end."⁹⁴ Bush said Americans "will follow the path of Pioneer 10," referring to the U.S. space probe that had already flown beyond the orbits of Neptune and Pluto: "We will travel to neighboring stars, to new worlds, to discover the unknown. And it will not happen in my lifetime, and probably not during the lives of my children, but a dream to be realized by future generations must begin with this generation."⁹⁵

The idea of space exploration began as a fantastic, unattainable dream. Space boosters during the 1950s convinced the American public that the dream could become real. Government officials and committees set forth proposals that endorsed the primary initiatives. The basic vision of human space exploration never died. In many ways, it grew stronger with time. Winning the massive amounts of government support necessary to carry it out, however, was (and continues to be) very difficult. Space advocates need politicians to approve and fund the dream. Winning approval for major exploration steps like trips to the Moon required an additional step in imagination.

I would like to get e-mail addresses (or home addresses, although we are in the computer age) for Bill Pitts and Charles Huffer.

I am doing a manuscript on the late Wilbert B. Smith and I have an appendix on President's and UFOs. As Charles Huffer has recently put the UFO question to George W. on the campaign trail, I want to clarify the story of President Bush's statements when he was on the campaign trail.

It's a bit like abductions. It runs in families.

I hope you can help.

T. Scott Crain, Jr.
P.O. Box 11
Port Matilda, PA 16870

Dear T. Scott Crain:

Your note, pertaining to alleged verbal communication between Vice-President George Bush and an Arkansas member of MUFON, has been received.

The person alleged to have asked, both, George Bush and Arkansas Congressman John Paul Hammerschmidt the same question - related the incident to me. What he allegedly asked both (the same question) - "Mr. Bush, if elected President, would you release information about UF O's?". He told me that both answered in the positive.

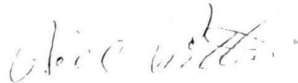

I think you should remember that when persons along a sideline when above such persons are walking by - and are pressuring them for an "answer" - it is much easier to answer in the affirmative.

If I were you, I would not take this too seriously, nor write a feature article on it.

Do not make another MUFON "Gulf Breeze fiasco" out of this - just for the sake of an article. I am not saying that you would, but I would play it (more than "safe"), and ignore the episode.

Nice to hear from you.

Very sincerely,

Bill Pitts

Official Release - Non-Security

Mr. William S. Sessions, Director
U. S. Department of Justice
Federal Bureau of Investigations
Washington, D.C. 20535

Dear Mr. Sessions:

You may recall that, while you were in Fort Smith visiting your Father, I called and, briefly, mentioned my keen desire to meet with you and to discuss the phenomenon of ~~UFO's~~, in general, and the role of U. S. Government participation, in particular.

I said that I wished to issue a "challenge" to you (not that you do not, challenges on a daily basis) pertaining to UFO's. You stated that you were interested, and to write you - and which I am now doing. I could write "pages" on the matter, but rather than to do so - it will be lengthy enough for me to endeavor to give you information I wish to convey in this letter.

In any event, the U. S. Government has played important roles in the evaluation of UFO reported sightings. The new Project Blue Book is a "continuation" of the original Project Blue Book, established by the Air Force, and was located at Wright-Patterson Air Force Base, Dayton, Ohio. Some of the most important sighting "announcements" came from the Air Force, and which were, later, stated to be something not in the original announcements - in a cover-up of the initial announcement. This repeatedly happened much to the chagrin of the Air Force. Original members of the Project Blue Book found that many reports never were received by this group, but went to intelligence-gathering agencies.

While Director of the F.B.I., Mr. J. Edgar Hoover (whose personnel reported some of the sightings themselves and who were, otherwise, brought in to some of the cases) repeatedly asked the Air Force for complete information about the UFO's - to no avail. They (the Air Force) would not release certain case reports to Mr. Hoover. Even with the present F.O.I., mostly sanitized version/copies are received and with information requested completely blocked-out.

63-0-92190

63-0-92190

OPR

b7c

ack
unsent (8/25/89 - typist) (dtd 9/1/89)

b7c

b7c

While Chairman of the Senate Committee on Science, Senator Barry Goldwater asked for information and was told that he was not on a "need to know" basis. This request, of Goldwater, had to do with an initial announcement from the Air Force that a "saucer" had crashed and that alien bodies were (at that point in time) located in a hanger, or other building, at Wright-Patterson Air Force Base, at Dayton, Ohio. Senator Goldwater was refused any information in this matter, along with not being allowed to personally look inside of the alleged building.

Before taking office as President, Jimmy Carter announced to the public that, if elected, he would give the American people the Government's information about UFO's. This did not happen, and Mr. Carter was given a complete run-around - and I could tell you more about this, because I was contacted by the Pentagon on the matter.

b7c

The new Project Blue Book has 148 present, and/or former, Air Force, NC NASA, and intelligence-gathering agency personnel, among others, acting as advisor-consultants to PBB - anonymously. These are persons who, for the most part, have/had been actively engaged in earlier UFO reports for their respective agencies, and who are still muchly interested.

So, with this brief back-ground of information about me and about Government participation, the "challenge" I have mentioned - would be to have you make inquiries at the highest levels of "officialdom" about what our Government really knows, whether or not there ARE alien bodies located ANYWHERE, what happened to the crashed "flying saucers", where are the photo's taken by Air Force personnel through on-board gun cameras, and similar questioning. I am positive you would find that even you would be getting a general run-around and could not receive satisfactory answers to the above. I think you will/would find that you are not receiving all the information you should be receiving and which should be very evident to you after making several inquiries. You may tend to drop the matter, thinking you are receiving answers to your questions, but this will not be the case, I assure you.

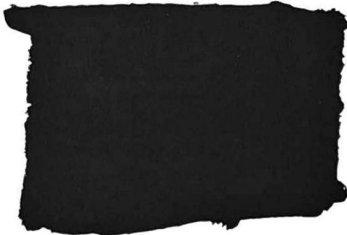

Mr. William Sessions · F.B.I. - 3

Mr. Sessions, I will not take more of your time in this matter, but, if you are interested, I would appreciate your looking into the matter. You may wish to appoint one of your office personnel to start making inquiry about UFO 's, in general, and see which Agencies to which you would be directed. Keep in mind, however, that some present office personnel, in the other agencies, may not know what you would be inquiring about - and will tell you that the Air Force Project Blue Book closed it's "doors" in 1969, and that the Air Force no longer investigates UFO sighting reports - this I already know. The important key is to go beyond the Air Force and into the other agencies; such as the Office of Defense, C.I.A., etc. President Bush, when asked about UFO's, told the person asking "You do not know the half of it". As you know, President Bush was formerly with the C.I.A. His comments are on tape, by the way.

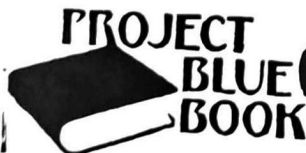

Well, I think this should suffice for this time. I appreciate your patience in reading this letter, and should you desire any additional information, please do not hesitate to let me know. I would like, very much, to work through you, and with you, to endeavor to bring the matter of UFO's to a conclusion - if that conclusion is an honest one.

I hope you had a nice visit with your Dad, and come back for a visit again, soon.

Very sincerely,

P.S. As sort of an "ultimate" challenge - why not ask President Bush, himself?

Inspired, and name-approved, by the
United States Air Force.

Dear

I have received your July 24th letter in which you ask for my help in securing information relative to investigations of unidentified flying object (UFO) sightings.

I have discussed your request with my colleagues, and I would first like to explain that the investigation of UFOs is not now nor has it ever been the responsibility of the FBI. The Department of the Air Force conducted investigations and studies of UFO reports from 1947 to 1969. On December 17, 1969, the Secretary of the Air Force announced the termination of "Project Blue Book," and the Air Force has furnished all documents regarding its investigations of UFOs to the Modern Military Branch, National Archives and Records Administration, Eighth Street and Pennsylvania Avenue, N.W., Washington, D.C. 20408. I understand this data is available for public review and analysis. You may wish to make an inquiry of the Modern Military Branch for the answers to some of your questions.

Also of possible interest, the National Aeronautics and Space Administration was asked by President Carter to look into the possibility of resuming UFO investigations in 1977. After studying all the facts available, it decided that nothing would be gained by further investigation, and the Department of the Air Force agreed with that decision. You may also want to check with the National Aeronautics and Space Administration in connection with your research.

63-0-92191

I am not aware of any Federal agency tasked with the responsibility of investigating UFOs and hope this information will be of help to you and your organization.

Sincerely yours,

William S. Sessions

The New Project Blue Book

*Inspired, and name approved, by the **United States Air Force***

Project Blue Book is not a membership-subscription organization; thus, we do not solicit membership, nor do we have magazines, etc. to mail to persons interested in UFO's. Other than certain releases to the news media, and Government agencies, our investigations of UFO reported sightings, and our findings thereof, are not made public, and for a variety of reasons.

Should you, or some-one you know, have a UFO sighting report to make, we would be happy to receive it, and endeavor to evaluate the report to the best of our ability.

Thank you for your interest in Project Blue Book.

Sincerely,

PROJECT BLUE BOOK

Wm. Pitts,
Director

Letter Mailed to UFO Conference Chairpersons.

Dear UFO Conference Chairperson:

The name of Project Blue Book should be familiar one to you, and as the Director of the new Project Blue Book, I have decided to make myself available for UFO Conferences and Symposiums.

As back-ground information, the new Project Blue Book was approved by the United States Air Force and at Pentagon levels. As appointed Director, I sponsored the first UFO Conference with official attendance, and participation, of U.S. Government agencies - NORAD, FAA, Air Force, NASA, and intelligence gathering agencies. During the Carter administration, I was asked to meet with his Science Advisor's office, under the guidance of Dr. Frank Press, and at NASA's headquarters.

My association in this field goes back to 1947, and was personally acquainted with some of the "names" active with Government, agencies, and investigated some earlier reported sightings. My affiliations with

these persons would read like a "Who's Who" of the classic sighting cases. I know of some of their true beliefs about UFO's, and which, for the most part, coincide with my own - that some of the objects reported were, and still are, listed as "unknowns".

The persons attending your Conference may be interested in the real "story", that goes back to the earlier sighting reports - and the people who were actively involved in the various projects. Actual copies of the reports taken to the Robertson Panel to the reasons I was chosen to meet with the agencies mentioned above, and others.

Anyway, if you are interested in getting back to "basics", and as an alternative to some of the material more recently being "promoted", please do not hesitate to contact me.

In any event, good luck in your present, and future, endeavors.

Very sincerely,

Bill Pitts

Director

5 October 89

Dear Grant:

Don't know what it's like up there in Canada, but down here in the States we've had mass Whitley Strieber sightings -- the Larry King Show, Unsolved Mysteries, Waldenbooks, etc etc. What a publicity machine this guy cranks out. Actually, though, the Roswell stuff has been handled pretty responsibly, unlike that prime-time travesty a year ago: good eyewitness testimony, basic adherence to the facts, and yet, no real dent in the armor of public opinion so far as I can tell. Obviously a slow and arduous process, but perhaps it can change. I saw in Time magazine a couple of weeks ago they actually----
xwhooops! devoted an article to those mysterious circular impressions cropping up in southern England. They look like the Meyer stuff to me.

Wish I could help you more with your investigation. The only thing Coleman would tell me is that Falcon and Condor are for sure two different people. One is former USAF, one is former CIA, but he wouldn't say which was who or vice versa... After months of trying to shop those Everglades photos around, I've finally got one of Coleman's ex-DOD contacts interested enough to put one of his private-sector pals on it. Will keep you posted on that... Don't know if you caught Nightline last week, but it dealt with a new, unprecedented spirit of cooperation between the KGB and the CIA. X-CIA chief Bill Colby said this new data-sharing was like something you'd expect the superpowers to do if there were an extraterrestrial threat. Shades of Ronald Reagan. Also, don't know if you followed the Neptune encounter closely, but Voyager 2 recorded a sudden, unanticipated burst of electromagnetism three days before it reached Neptune's EMG field. This came out during a press conference when a San Jose Mercury reporter said a ~~xxx~~ contact had reported the event to her.

Mailing:
FLORIDA TODAY/USA TODAY
GANNETT PLAZA

Street:
FLORIDA TODAY/USA TODAY
GANNETT PLAZA
MELBOURNE, FL 32940
PHONE (407) 242-3500

The briefing officer said the anomaly indeed happened and confirmed that it was 6-7 times greater than what they expected from Neptune. No explanation was given. Just another bit of strangeness to contemplate. We've made a request for those EMG printouts but no luck so far. And so it goes ...

Keep me informed.

Regards,

BcoX

Grant.

1. I did speak softly, a big mistake since my recorder was too far away and did not pick up my comments. At least mostly did not. In his ear, I was close as I spoke softly, but in his ear? A matter of interpretation.

2. I have NO connection with ANY political party.

From 1967 through 1987 I did not vote in any political election of ANY kind. Hardly a political animal, would you not say? I voted for Bush in 1988, Perot in 1992 and Dole in 1996. I will vote for George W. Bush this year. I try to vote for whom I think is the best person running, and since the Perot disaster, and at the same time has a chance to win! Because of July 28, I have a special interest this year!

3. See:

<http://www.sightings.com/generat3/disclosure.htm>

After listening to the tape of the second encounter several times today, I am no longer sure who said:

"Yes Sir." It was either Gov. Bush or Mr. Cheney.

Rense.com

Actual CNN Transcript Of Gov. Bush Promising UFO Disclosure

From Charles Huffer <chuffer@yahoo.com>
To Randy Kitchur <kitchur@hotmail.com>
8-7-00

Randy,

(Please send this to all persons who may be interested. There seems to be a great deal of confusion about what really transpired.)

I am the UNIDENTIFIED CITIZEN on the CNN transcript and the 5TH MAN on the Nightline transcript. The Washington Post article has my name as it appears on my card, which I gave to the reporter who interviewed me immediately after I had my first exchange with Gov. Bush.

The websites are still up and running as I write this. Here they are:

<http://washingtonpost.com/wp-dyn/articles/A196-2000Jul28.html>
http://abcnews.go.com/onair/nightline/transcripts/nl000728_trans.html
<http://www.cnn.com/TRANSCRIPTS/000729.snn.c1.html>

On the CNN transcript is the following:

KARL " Along the way, someone thought Cheney's impressive resume would help Bush tell the truth about UFOs " (This was pure speculation on Karl's part and was wrong. CAH)

UNIDENTIFIED CITIZEN: (That is me, Charles A. Huffer, MUFON State Section Director) "Half the public believes that they are real. Would you finally tell us what the hell is going on?" (The full exchange of words with Gov. Bush was evidently not recorded. I had a recorder on but it was too far away for clarity. I did get Bush's reply, however.)

GOV. GEORGE W. BUSH (R-TX), PRESIDENTIAL CANDIDATE:

"Sure, I will. This man knows. He was Secretary of Defense and was a great one."

CNN has made a serious error here. They have attributed some of my words to Gov. Bush. Here is the way it was:

Bush: "Sure. I will."

Charles A. Huffer: (Cheney had in the meantime walked over to us and extended his hand to me.) "This man knows. He was Secretary of Defense."

Bush: "And was a great one."

Several minutes later, I again saw Gov. Bush in the hall. He recognized me immediately and unsolicited said approximately the following:

Gov. Bush: "It will be the first thing he (pointing to Cheney) will do. He'll get right on it."

Charles A. Huffer: "Will, will you really?"

Gov. Bush: "Yes Sir."

I have this exchange on audio tape. As far as I am aware, no news organization recorded it.

So, Bush DID promise to tell us what the hell is going on, if he gets to be president.

Please pass this around so that people will know what actually was

said on 28 July 2000 by Gov. George W. Bush in Springdale, AR.
Now we must help Gov. Bush be elected president.

Charles A. Huffer

Truth is out there

Mike Hallowell

PRESIDENTIAL candidates in the U.S. are used to fielding awkward questions from voters.

Like our own politicians, they can be experts at talking a lot while not really saying very much at all.

George Bush JR and his nemesis Al Gore have been putting themselves about a bit recently, answering a question here and a query there.

Whoever wins the race for the White House may have to come up with at least one cohesive strategy - what do we tell the public about UFOs?

Since the 1970s, some say even earlier, a succession of presidents, presidents-elect and presidential hopefuls have promised

to tell the public what the American government knows about the UFO phenomenon.

Jimmy Carter said he would, and even claimed to have seen one. Ronald Reagan, on more than one occasion, made reference to "invaders from outer space" (hypothetical ones, of course) and left the world wondering whether he was really hinting at something far more tangible than an abstract concept.

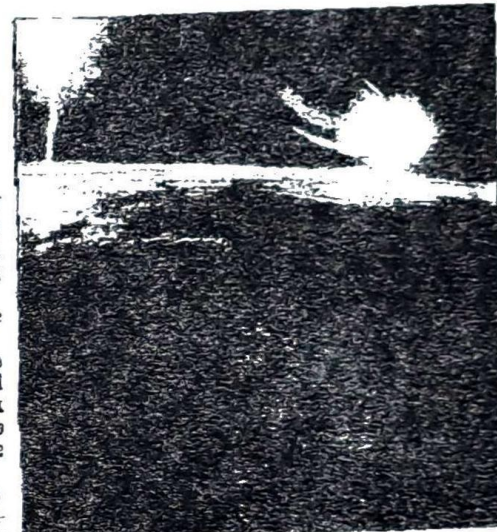

And then there's George Bush JR. On July 28 he appeared at a press conference in Philadelphia, covered by CNN and other broadcasters. Bush was asked

whether, considering that half the American public believes in the reality of UFOs, he would tell the public what was going on.

Bush's answer was concise and simple: "Sure I will."

This, of course, intimates most clearly that there is indeed something to tell. If the track record of his predecessors is anything to go by, however, we shouldn't hold our breath.

According to some researchers, the U.S. and British governments have known for years that our planet has been visited by extra-terrestrial visitors. In fact, there are persistent

TRUTH ... U.S. presidents should come clean about UFOs.

rumours that high ranking military officers in the U.S., and senior government officials have even made contact with them.

One man who is determined to get to the truth is Peter Robbins.

Peter heads up Campaign Watch 2001, a pressure group designed to wring the truth from the U.S. government on the UFO issue.

Since December 1999, Robbins and his colleagues have been trying to nail down every presidential candidate they can get close to. Every one has been asked the same three questions:

- Will you grant immunity from prosecution to military and intelligence officers who are prepared to whistle blow about the Government's knowledge of the UFO issue?
- Will you order the release of classified government documents relating to the UFO issue?
- What statement will you issue concerning the public's right to access government-held UFO information?

Despite rumours on the

Internet that both Bush and Gore would, if elected, finally spill the intergalactic beans, there has since been a deafening silence.

The media, until recently, has failed to pick up the story in any depth, although some articles have appeared in U.S. papers.

Despite the fact that the UFO issue is still treated as a cranky past-time by some journalists, we should remember that our own government has a department set up specifically to handle UFO reports.

Whether UFOs exist or not is not the issue. What concerns Peter Robbins - and I - is the fact that an issue which is of growing concern to voters on both sides of the Atlantic should be swept under the carpet by our leaders.

The only true undisputed

Dear Grant Cameron:

Wow - copies of letters really get around, don't they?

My letter to T. Scott Crain, in reply to his inquiry, pertained to a remark U.S. Presidential candidate George Bush, allegedly said about UFO's, if elected. The person, a good friend of mine, and who "recorded" this bit of info, was:

Charles Huffer
2331 W. Deane St., Apt. H-2
Fayetteville, Arkansas 72703

Thus, you can, now, contact Charles - for an answer to anything you may have along this line.

My "caution" was only, that, as candidates are making their way through a line of interested persons, and questions are merely "thrown" at them from bystanders, a hasty reply by the candidate does not, necessarily, mean that the candidate is going to recall, and remember, such an incident and do what they "say" they are going to do. Even if the conversation is on tape, what are you going to do about it, if the candidate (if elected) does not follow through? That is the only point I was endeavoring to make.

Rest assured that I want to try to help you in any way I can.

You must remember, about Al Chop, he was a civilian - merely acting in a public relations capacity - between the Pentagon and the Air Force Project Blue Book. He would not be on a "need to know" basis, about ANYTHING, and more especially about a secret project (if, indeed, it did exist) about a Majestic 12.

What you should endeavor to do - is get someone in the Washington, D.C. area to interview Donald Keyhoe (who is still alive as of this date), and see what he recalls about it all. Keyhoe is in his 90's, and his memory is not as accurate as it was; so anything he might say, in this regard, may or may not be accurate.

By the way - I have a good friend, in Winnipeg. Len Vintus (a professional name), real name - M.J.G. McMullen. His address is: 604 Bond St., Winnipeg. His home phone: 222-9580. If you get a chance - call him, and tell him "hello" for me. He and I are, both, past International Presidents - of the International Brotherhood of Magicians. He was the 1st such President.

Very sincerely

Bill Pitts
