

NATIONAL RESEARCH COUNCIL OF CANADA
CONSEIL NATIONAL DE RECHERCHES DU CANADA

OTTAWA 7. K1A 0R8

July 16, 1971.

Mr. Arthur Bray,
1187 Agincourt Road,
Ottawa, Ontario.
K2C 2H8

Dear Art:

I am just back from the United States which explains my tardiness in replying to your letter of July 3. I am sorry that I don't have anything in writing on the lecture which I delivered in London on November 27. It is my policy to give all lectures verbally without notes, and I never prepare a manuscript for fear of sounding as if I were reading from a script. If I ever put down on paper the substance of what I give in a UFO lecture, I will be glad to send you a copy.

Some weeks ago I read the draft of the paper by Dr. Smith concerning Les Ecuriels Iron Mass. We have ordered sufficient copies here to supply reasonable requests and I will send you one as soon as it becomes available. I should expect that this paper will be published in the very near future.

I retire officially at the end of the working day on August 9, as August 10 is my 65th birthday. Thank you for your good wishes on my retirement. Actually, I will be continuing to work here at the Council in the capacity of a visiting scientist, but I will have no administrative duties or responsibilities. The new Head of the Upper Atmosphere Research Section will be Dr. Allen G. McNamara, and I'm sure that you will find him cooperative.

My wife and I expect to be away in Europe from August 3 to September 29. With best wishes,

Sincerely yours,

Peter M. Millman,
Head,
Upper Atmosphere Research.
