

slide B-11 - DePloes Kansas again - lab results of soil

slide C-24 - No. of imprints (chart)

slide C-25 - site shape & condition (chart)

slide OFF - EM effects - autos, TV, radios, lights,
A/C instruments & fire control systems.

Photographic - difficult to deal with this.

Study of animal reactions

Instincts - if we see something which can
manoeuvre & in a way no man-made
object or known natural phenomenon
can, then we have an oddity of some sort.
eg, high accelerations, 90° & 180° changes of
direction.

Locality of terrestrial significance

Statistical studies reveal a high
incidence of sightings reported over missile
launching sites, nuclear weapon storage facilities,
water reservoirs, electrical generating stations and
