Contactees

Dr. J. Allen Hynek (Scientific Consultant to the United States AF, Project Blue Book)

"most contactees as 'pseudoreligious fanatics of low credibility value.'"

Q.33 "Many ^{have} argued that the contactees were frauds, cashing in on the emerging obsession with flying saucers"

almost exclusively American

- reported more
- more media and money for such stories
- higher technology and more atomic weapons (which coincides with the common contactee message) Canada had contactees as well
- media were fascinated coverage by many newspapers and magazines. Lots of books
- possible hoaxing and disinformation throw off serious researchers, discouraging serious researchers, muddy the waters (discredit ufology)
- product of their environment post war, atomic age
smokescreen by aliens to disguise their true intention

why did the contactees not continue on into the 60s (with wilder and more bizarre tales of trips in the galaxy)
why as Nick Pope described it "The Space People Turn Nasty"

- sudden movement from open contact to abduction
helped to vindicate ~~the~~ what the contactees were saying
and the fact that it might well be an evolving phenomena.
