Mr. W. Smith

Dear Mr. Smith

"Buck" has told me result of survey on "Skyfall". Two reputable metallurgical authorities here express no knowledge of such an alloy as Magnesium Ferrite. Incidentally our test revealed 50% Mg + 50% Iron. also there was gamma radiation, this latter I have not been able to get Geiger counter confirmation as yet. Have you made this test. (most important) (1) as to outer space confirmation. (2) handling of large pieces prejudicial to ones health. Pity they were not able to track down & secure the piece in Quebec scrap yard. How about the major piece in the river. Hope you will be able to acquire.

Please let me know soon as possible about Gamma test, etc. as we expect to be going over to the Bahamas leaving about 4th December. ~~Next~~ our address for correspondence will be P.O. Box 952 Nassau N.P. BAHAMAS. would like to hear from you before we leave. I am just rushing to catch P.O. left right now.

Sincerely yours

Scott Wood
