

Dr. Millman

(2)

Do you think the USAF Project Bluebook has handled these investigations scientifically, with adequate qualified staff & equipment?

Back to Wilbert Smith. I understand you know him personally, quite well.

~~Do you~~ Did you ever read the reports he submitted to the government?

If so, what did you think of them?

What action was taken on these reports?

crank file?

why?

Regarding his birching meter - why was nothing done about this?

Where do you think he got his info. to enable him to construct it?

although DND may have closed the file on a case, why should NRC not re-open it if matter still unresolved?

How can you solve the UFO question by leaving cases unsolved by DND - surely NRC can bring more talent to bear on these cases than DND ever did.

If NRC is not researching current literature on previous studies, and is not re-opening unsolved cases, then you are starting from square one and are ignoring 20 years of previous sightings and research, from which much scientific evidence can be gathered and many patterns can be found. This is hardly a scientific investigation at all, is it?

There are many people, including myself, who do not intend to let this matter rest.

Will you read my book? Will you give me your own comments on it?
