

9/9/71

Dear Hughie,

Steve Ping and I like to thank you for belatedly for the kind hospitality extended to us when we were in Ottawa. She enjoyed visiting the capital of Canada.

Enclosed are analysis results of the piece of metal

Iron 54.5 %

Manganese 7.5 %

The presence of manganese in the sample is interesting but what its commercial prospects are together with such a high content of iron needs to be investigated. In the making of good quality steel, manganese is added to iron together with some other minor elements. If huge amounts of that material is available, it definitely
