

12-Hynek: "No group of witnesses were not observing marsh gas can very assuredly state we near a swamp in Jonesville. I young boy, having been raised many times witnessed this as a Van Horn: "I have personally seen it (marsh gas) myself." 11-Hynek: "I have never short distance." 10-Hynek: "The lights appeared...to rise a short distance." Van Horn: "I do not call lights ascending and descending...100 to 150 feet a gas."

9-Hynek: "No sounds were heard, except for popping sounds." Van Horn: "To the best of my knowledge there were no sounds heard in the Hillsdale incident and Dr. Hynek was very definitely informed of this. With regards to the popping sounds, this again is a description which can be found in any one of many books describing marsh gas."

8-Hynek: "A dismal swamp is a most unlikely place for a visit from outer space." Van Horn: "I disagree with this. Usually a place where there are no people around and also most cases requires a period of time to enter. B) Also, a swamp is generally a source of water which could well be needed a space vehicle."

7-Hynek: "It was the light phenomenon." Van Horn: "This to me was no phenomenon as this was definitely some type of a vehicle which had the ability to ascend and descend and to move freely and smoothly from one side to the other and in doing so, both lights being observed moved uniformly and remained a stationary distance apart."

6-Hynek: "The location of the sighting was 'in both cases a swamp.' Van Horn: "The Hillsdale area where the observation was made is not a swamp but rather a wooded area. And how would Dr. Hynek know what the area was as he was never in it. The closest center of Barber Drive, a road which runs parallel to the area."

5-Hynek: "The location of the sighting was 'in both cases a swamp.' Van Horn: "The Hillsdale area where the observation was made is not a swamp but rather a wooded area. And how would Dr. Hynek know what the area was as he was never in it. The closest center of Barber Drive, a road which runs parallel to the area."

Teachers by MEA

Mr. Barshney has 35 and Barshney 10. He was student in the Pittsford in the 1920's where the varsity basketball team organized. She was the coach. During their stay Pittsford became an aced school, the first P-TA organized, the Alumni Association organized, electric is added to the classrooms, king fountains added and escapes purchased.

After this the couple moved to Adrian where he was professor at Adrian College and she was public relations director. Mrs. Barshney has written for newspapers and magazines and at one time was connected with United Press and International News service.

Mr. Barshney graduated in Prattville High School, attended Western State University and received his AB MA from the University of Michigan. Mrs. Barshney graduated from Hudson High School, attended Ferris State College, Western State University and the University of Michigan.

Both have spent many hours in school with young people as Sunday School teachers, Girl Scouts, DeMolay, painting skills with uniforms and numerous other jobs.

Mrs. Masters Dies At 80

Mrs. Pearl J. Masters, 80, of Montpelier, Ohio, died Saturday at the Hillside Rest Home in Williams County, Ohio.

She resided in Hillsdale for 50 years before moving to Montpelier. She formerly operated a nursing home on N. West Street.

* * *

Mrs. Masters was born March 21, 1886, in Paulding County, Ohio, to the late John and Rosa May Gilkerson Johnson.

She was a member of the Church of the Nazarene in Montpelier. She was preceded in death by her husband, David B. Masters, who died in 1959.

* * *

She is survived by a son, Raymond Lee, of Waterloo, Ind., and six grandchildren.

Funeral services will be at the Ned M. Towns Funeral Home in Hillsdale Tuesday at 2 p. m. with the Rev. Charles Summan officiating. Burial services will be at the Oak Grove Cemetery.

Mrs. Flory Dies Saturday

HUDSON — Mrs. Edith F. Flory, 77, of 212 N. Maplegrove Ave. died Saturday morning at the Thorn Hospital.

She was born in Weston, Ohio, on Dec. 24, 1888, to John and Mary Gyer McGill. On June 5, 1921, she was married to Edward McGill, who survives.

* * *

She was a member of the Sacred Heart Catholic Church and

Two Teachers Hired At NA High School

NORTH ADAMS — Donald Devenport, principal of the North Adams High School, announced that two teachers have been hired for the 1966-67 school year. They are Mrs. Samuel Hudmatt and Mrs. Ronald Piddock.

Mrs. Hudmatt, a graduate of Adrian College, will teach world history and American government. Mrs. Piddock, a graduate of Hillsdale College, will teach U. S. history and French.

Bank Sponsors Conference

LITCHFIELD — The Litchfield State Savings Bank, in cooperation with the Small Business Administration, is sponsoring a one-day conference Tuesday at 8:30 a. m. at the Litchfield Youth Center, Litchfield, for retail merchants, manufacturers, farmers or any businessmen or women interested in the sessions.

* * *

The conference will cover financial management, counseling, research, advertising, promotion, marketing, retailing and serving business.

Also, how to procure government contracts and how to deal with the government on government contracts and research. There will be private counseling available.

* * *

Anyone interested in attending this conference may contact the Litchfield State Savings Bank or any of its branches, Camden, Hanover or Spring Arbor, by May 19 to make reservations.

Van Horn Challenges Professor's Marsh Gas Explanation Of UFOs

FLYING SAUCER—This picture is submitted by William Van Horn, Hillsdale County Civil Defense Director as the final part of a four-part rebuttal to Dr. J. Allen Hynek's explanation that UFO's are marsh gas. The object identified by Van Horn is the top-shaped white spot in the upper right corner of the picture. Although it may not reproduce on newsprint, the photo-

graph shows a light halo-effect radiating from the pointed part of the object. The sun creates the glare of light through the trees at lower left. The long dark streak directly above the windmill appears to be a rust spot on the picture. The picture was taken July, 1965 near Cambria. Van Horn said the person who took the picture declined to be identified.

William (Bud) Van Horn, Hillsdale County Civil Defense Director today challenged Dr. Allen J. Hynek's theory that the unidentified Flying Objects reported in Hillsdale were nothing more than marsh gas.

Hynek, a Northwestern University astrophysicist, serving as a scientific consultant to the U.S. Air Force's Project Blue Book, spent part of a day in Hillsdale investigating a sighting reported by Van Horn and a number of students at Hillsdale College. Several days later, Hynek held a news conference and said it was his opinion the sighting in Hillsdale was nothing more than marsh gas.

Van Horn, in challenging the marsh gas theory points out that the conditions under which marsh gas is most likely to form were not present on March 21, the night the UFO was reported by the college students. He also says Hynek ignored any reports of movement and according to Van Horn pursued a line of questioning apparently designed to substantiate the marsh gas theory, an explanation Van Horn thinks Hynek had decided upon even before coming to Hillsdale.

In support of his criticism of Hynek, Van Horn has distributed a four-part report: an analysis of Dr. Hynek's new release, a report and photo made by two high school students from Bay City, discussion of a letter written to Van Horn by Dr. Hynek March 29 and a photo which, Van Horn says shows a UFO.

Van Horn has commented on 15 different items in Dr. Hynek's news release.

1—Hynek discussed only the Dexter and Hillsdale sighting and Van Horn addresses himself only to the Hillsdale investigation.

2—Hynek: "Certain young men have played pranks with flares." Van Horn: "Dr. Hynek was well aware that the flares incident occurred on Wednesday, March 23 and not on the evening of March 21."

3—Hynek said he sifted out "inconsistent statements." Van Horn comments: "The only statements that Dr. Hynek was interested in were the inconsistent ones and it is my belief and knowledge from questioning people that the inconsistent statements were very few."

4—Hynek: "The majority of observers in both cases reported only lights—red, yellow, and green, silent glowing lights, near the ground. They have not described an object." Van Horn: "We did not describe the outline of an object but Dr. Hynek was not interested when we attempted to describe to him the ascending and descending in a uniform manner of two separate color lights to a height of approximately 100-150 feet. He was informed by myself that at one time I could make out a convex surface between the two lights which I estimated 25 feet between."

5—Hynek: "Witnesses have described glowing lights—lights that seemed to move but never far from a definite locale, or which suddenly disappeared and popped up at another place." Van Horn: "This was by no means the description that was given Dr. Hynek with regards to the lights in the Hillsdale area. The lights increased and decreased in brilliance. It is very evident that his description as stated in his release could have been taken from any one of many books describing marsh gas."

6—Hynek: The locale of the sighting was "in both cases a swamp." Van Horn: "The Hillsdale area where the observation was made is not a swamp but rather a wooded area. And how would Dr. Hynek know what the area was as he was never in it. The closest he got to the area was the center of Barber Drive, a road which runs parallel to the area."

7—Hynek: "It was (the light) in both cases a very localized phenomenon."

From the office of
Congressman Edward Hutchinson
4th District / Michigan

FOR RELEASE ON DELIVERY

WASHINGTON -- Congressman Edward Hutchinson of Michigan's Fourth District today said he was drafting a resolution urging the House Armed Services Committee to study methods used by the Air Force in investigating reports of "unidentified flying objects."

"It seems to me that the Air Force is much too quick to close the books on these investigations," Hutchinson charged.

Rep. Hutchinson said his decision to offer the resolution in the House was prompted by an exhaustive investigation into the March 21 UFO sighting at Hillsdale, Michigan, by William E. Van Horn, director of the Hillsdale County Civil Defense organization.

"The Air Force reportedly closed out its investigation of the sighting after three and a half hours," Hutchinson said. "Mr. Van Horn's study took seven weeks and, in refuting the Air Force investigator's 'swamp gas' theory, left several important questions which should be answered."

"Mr. Van Horn raised another serious issue when he charged that the Air Force's attitude in such cases may well have induced reliable witnesses in other sightings to withhold the information for fear they would be ridiculed," he said.

"The obvious danger in allowing a situation like this to continue," Hutchinson said, "is that the day may come when information of a very important nature might be withheld for the same reason, with serious consequences to our country."

May 12 Van Horn sent a 24-page report on the results of his investigation to Rep. Hutchinson, whose seven-county district includes Hillsdale. Using U.S. Weather Bureau records, Van Horn apparently refuted the "marsh gas theory" with which the Air Force investigator, Dr. J. A. Hynek, of Northwestern University, explained the UFO sighting. According to Van Horn, wind velocity and temperature were not conducive to producing the marsh gas phenomena.

A major portion of the report was devoted to the results of tests conducted at the scene the day after the sighting by two young amateur scientists. They reported an unusually high level of radiation in the area, but subsequent checks with geiger counters showed radiation to be decreasing at a rapid rate. Chemical analysis also revealed quantities of the element Boron in both water and soil. Boron is not found in Michigan. Boron compounds are commonly used in the manufacture of glass and cleaning agents, but the element also is being used as a solid and liquid fuel for rocket igniters, experimental rocket motors, in nuclear experiments, and by the Air Force as a laminate for experimental plastics.

Unidentified Flying Objects

IN THE HOUSE OF REPRESENTATIVES

MAY 24, 1986

Mr. HUTCHINSON submitted the following resolution; which was referred to the Committee on Rules

RESOLUTION

1 *Resolved*, That the Committee on Armed Services, acting
2 as a whole or by subcommittee, is authorized and directed
3 to conduct a full and complete investigation and study of
4 reports, and present methods of investigation, in Michigan
5 and elsewhere, of unidentified flying objects.

Hutchinson Wants Study

WASHINGTON — Rep. Edward Hutchinson of Fennville, representing Michigan's Fourth District Friday said he was drafting a resolution urging the House Armed Services Committee to study methods used by the Air Force in investigating reports of "unidentified flying objects."

"It seems to me that the Air Force is much too quick to close the books on these investigations," Hutchinson charged.

Rep. Hutchinson said his decision to offer the resolution in the House was prompted by an exhaustive investigation into the March 21 UFO sighting at Hillsdale, Mich., by William E. Van Horn, director of the Hillsdale County Civil Defense organization.

"The Air Force reportedly closed out its investigation of the sighting after three and a half hours," Hutchinson said. "Mr. Van Horn's study took seven weeks and, in refuting the Air Force investigator's 'swamp gas' theory, left several important questions which should be answered."

"Mr. Van Horn raised another serious issue when he charged that the Air Force's attitude in such cases may well have induced reliable witnesses in other sightings to withhold the information for

dismissal of the charge. *Hillsdale Daily News*

UFO Probes Prepared For

WASHINGTON — The Air Force intends to contract with a few selected universities to investigate promptly and in depth certain sightings of unidentified flying objects.

The Air Force said Thursday that no schools have yet been chosen and the number to be used in the investigations is still indefinite.

A scientific advisory board recommended last March that this course of action be followed by the Air Force, which has pledged to strengthen probes of reports it receives on UFOs.

The board suggested that each university team should include at least one psychologist, preferably one interested in clinical psychology, and at least one physical scientist, probably an astronomer or geophysicist familiar with atmospheric physics.

The board also told the Air Force the universities should be chosen "to provide good geographical distribution" and should be within convenient distance of a base if the Air Force Systems Command.
