

so crazy that its not the right time to talk about it.

W.S. - Could it be to establish a new planet for themselves? (earth)

P.F.B. - I get that feeling.

I've gotten as close as 300 to 400 feet of their ships (saucers) some are large, some are small.

The aliens themselves ride around in transporters that have no wheels.

W.S. - Have you experienced any interference from them while flying over the area?

P.F.B. - Only while flying over a critical area - then they bounce, how can I say it, turbulence or some sort of perturbation in the air craft.

They fly with me while I'm up there and they fly under me, and they dive about 1000 feet and pull up in front of me.

You name it, its happened. Basically, we made an agreement with them. There was a meeting down at Holoman Air force Base.

W.S. - Was that in 1948?

P.F.B. - I don't know when the first meeting was; But there was one in 1957.
