Dear Sirs:

Further to my letter of April 1, 1969, and your reply of April 9, 1969, my brief to the Senate Committee on Science Policy has now been published. It is titled "Science, Society and the UFO". I am forwarding a copy of the brief to you by separate mail and it should reach you in a few days. I hope you will find it of interest.

The Report of the Senate Committee has not yet been completed but is expected to be released soon. It will be interesting to see whether it contains any mention of the UFO problem as a result of my brief.

Yours sincerely,

Arthur Bray
