

40 Beacham Crescent,
Agincourt 755 Ont.
Oct. 23/70.

Dear Art,

As you can see I'm still banging away at my Underwood (electric) that is. This will be a few lines to inform you on the latest happenings in the U.F.O. quest. Before I get carried away with my dexterity and run out of keys, I would like a firm price on approximately 25 copies of your book Science, The Public And The UFO. At present, it's questionable which edition would be most suitable, the hard cover or the soft, for now let's assume we are discussing the soft cover and a committal delivery date of Feb. 10/70 or sooner.

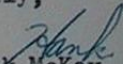

The reason for this request is as follows. My plans as of this date are not yet complete but arrangements, subject matter and schedule are in the planning stage and for this reason I ask you to keep the following information confidential until there is official confirmation. Some time ago I wrote to the administrator with a suggestion they give serious consideration to a course dealing with this subject as I felt there was high public interest albeit the feeling of being subject to ridicule. With a recognized seat of learning providing the opportunity people would be more inclined to voice their thoughts and enquire further into this subject.

This is a community college located in Scarborough, Centennial College of Applied Arts And Technology. The course covers 10 weeks, 2 hours per night one night a week. Will let you know whenever confirmation comes in. There was a sighting 40 miles west of Toronto a week ago at a little place called Milton. A woman with her sister as passenger was driving her auto when they noticed this glowing object a 100-200 ft. up, it seemed to approach their car, keep pace for a short while then accelerate moving north towards Georgetown. They reported to the S.P.P. it was a large glowing white object, having a light source on top and a much larger light on the bottom. I wrote a letter requesting further information.

Did you read the article in the Midnight tabloid or it might have been National Enquirer Feb. 17/69 reporting the Capt. missing from his cruise ship under strange circumstances somewhere in the so-called Bermuda Triangle? His name was Charles G Reid, the ship is called the Argentina and he was found missing following the reported sighting of a U.F.O. I am trying to dig up further information, could you be of some help?

This turned out a little longer than expected so I'll close for now with "cheers",

Yours truly,

Hank McKay
