Riversmont
Montreal H1T 3L8

Quebec, Canada

Dear Mr. Cameron

I have not met Mr. Smith but I have met his wife and other members of the Ottawa Group. I don't know what their position is because the Editor of the sub Mr. Jackson has had a very hard time of it. Her husband and a series of big operations and finally he passed on a few years ago. Mrs. Jackson is interested in not knowing the age. I read we had heard of the Melic through the grape vine. When we first saw it it was in front of Mr. Jackson's home. Later it was moved to McCarry where I presume it still is. It's present location I may be wrong by writing to Mr. and Mrs. Buck Buchanan 3 Beall Street Ottawa. I, Chicago have been there by various books, but the Canadian children will not release the REAL picture. 12 years before he jumped over the fence after 9 other children in England independent of each other has a similar craft. 14 months later I Keys I photographed in 1965 of male was taken near Washington of an identical craft.

2

The best evidence for J. A. Day in his Photos of the scout craft.

In the First British Edition Published in Britain September 1953 the Photo reproduction is good, In two of those Photos the faces of the Human crew can be seen looking out through the Portholes, REAL HUMAN FACES, Photography experts in

Hollywood said the Photos were genuine of a. Craft in the air. How could anyone

obtain the knowledge to develop a craft more advanced than anything on this Planet, put people in it get it into the air. Then Photograph it, Plus the fact that in

other Parts of the world identical craft have been seen and recorded on still and movie film. There are other aspects also,

The Cultural Exchange Committee at the State Department in Washington also have supporting Data on J. A.

Throughout the World during the Past few Months, sightings Landings and contacts have been mounting and so it will continue.

Keep your Eyes open.

Kind Regards.
All the best for Christmas and New Year.

Ronald. William Jonah Artes.

Dear Ronald,

I have written regarding a Nov. 29, 78 correspondence I had with you regarding the work of the late Wilbert B. Smith. I have continued with my work, and have written to ask assistance with a couple items.

I don't know whether or not you are aware of the fact that a number of significant facts and documents have surfaced in the past couple years regarding Smith's work. As those associated with the Neo Science Club in Ottawa have scattered worldwide I am again contacting everyone I can find for further details. I would be willing to exchange a packet of recent documents in exchange for what you can help me with.

① You mentioned you had corresponded with Adamski. Smith also had some contact but I have not obtained that correspondence yet. Would it be possible to get xerox copies of your correspondence with Adamski?

② One of the documents we now have is the story that Smith was told that the Frank Scully 1950 book regarding the crashed saucer was true. Did you ever hear of anything significant from Canadians regarding this. Did you correspond with Scully?

③ You mentioned Buck Buchanan in your last letter. I had been in contact with Buck but suddenly things went bad. I had been warned shortly before this that Buck had changed. He wants nothing to do with UFO's anymore, and I never got to interview him face to face. Could you tell me

what you knew of him. He apparently told many stories related to the contactee / psychic aspects. I am trying to recover as much of his involvement and experience in this as Buck is 71 and has cancer.

④ How many of the Ottawa people did you know? My main source for this is Art Budge who worked with DRB and doesn't volunteer much direct info because he is still under the Secrecy Act.

⑤ Do you know anyone who would have issues of Topside? I have talked to a lot of people and have not come up with a single issue!

⑥ Could you explain your group in Montreal - history etc. Are there any still researching.

⑦ I filed 6 Access to Information requests and only scored on one 1600 Pages from RCMP. The other five I was told to hire a private investigator to find what I was looking for. Needless to say I am preparing an appeal to all five. On this regard I would appreciate any information you have, research you have done or places I can go for the following subjects which were the subject of my requests for documents

① The Suffield landing base for VFCs 1954-1956?

② the AVO success built by AVO. (can you believe they couldn't find one page on this)

③ correspondence between Vernon Bush, Major Keyser, and Canadians such as Smith.

Sincerely yours

GRANT CAMERON

KARL PETERSON

BLADET UFO KONTAKT

SVINGET 9 - SKANDERUP - 6640

LUNDERSKOV, DENMARK.

Dear Mr. Peterson

I have written to ask your assistance on something that happened some years back. I received your name from Mr. Ronald Anstee.

Some years back, Mr. Anstee told me, he received a letter from ~~the~~ Vice President Johnson on the subject of the AVRO Saucer built under USAF contract in Canada. Apparently Johnson had refused him to Dr. Vannevar Bush. This letter he stated had passed thro' a couple of researchers in Europe and was lost. I am at present preparing to search the Johnson library for a copy of this, and would like the following information

- ① as close as possible the date of the letter
- ② " " " " " contents of the letter
- ③ How many people have seen this letter

The letter is important to me for the following reasons:

④ researchers are getting very close to proving that Dr. Vannevar Bush headed the analysis and duplication of recovered flying saucers.

⑤ the Johnson letter would link the AVRO Saucer to Dr. Bush and the US. efforts rated "the most highly

Area Saucer and have been denied. (They couldn't find any documents) The Bush letter would help in my appeal.

① "Just Cause" plans a FOIA request in the subject in the US. and would appreciate seeing the link between Bush - AURO - and US government.

My area of study is the work of the late Wilbert B. Smith. It has now extended to his connection with Dr. Ummeron Bush and the Research and Development Board, and the crashed saucer ramers.

Hope you can help me with the Johnson letter item. I have enclosed \$1.00 to cover your costs.

Sincerely yours

GRANT R. CAMERON

DORA BAUER

LAMMER, THALIASTRASSE 157/117

A-1160 VIENNA, AUSTRIA

Dear Dora,

I have written to you to ask your assistance about something that happened many years back. I received your name from Mr. Ronald Anstee.

Some years back, Mr. Anstee told me, he received a letter from then Vice President Johnson on the subject of the ARO Saucer built in Toronto Canada. Apparently Johnson had referred him to Dr. Vannevar Bush. This letter he stated had passed thro' a couple of people in Europe and was lost. I am at present preparing to search the Johnson library for a copy of this, and would like the following information

- ① as close as possible the date of the letter.
- ② " " " " contents of the letter.
- ③ How many people have seen this letter.

The letter is important to me for the following reasons

④ we are getting very close to proving that Dr. Vannevar Bush headed the analysis and duplication of recovered flying saucers.

⑤ The Johnson letter would link the ARO Saucer to Bush who was the most powerful scientist in the US if not the world at this time.

⑥ I have filed an "Access to Information" on the

Classified secret in the U.S. "

③ I have filed an Access to Information request with the Canadian gov't on the subject of the ARO Saucer and received no document. "Jest Cause" in the U.S.A. is planning a FOIA request on the same subject with the U.S. government.

My area of study is the work of the late Wilbert B. Smith. It has now extended to his connection with Dr. Vannevar Bush, the Research & Development Board, and all the crashed saucer stories.

Hope you can help me with the Johnson letter. I have enclosed \$1.00 to cover your costs.

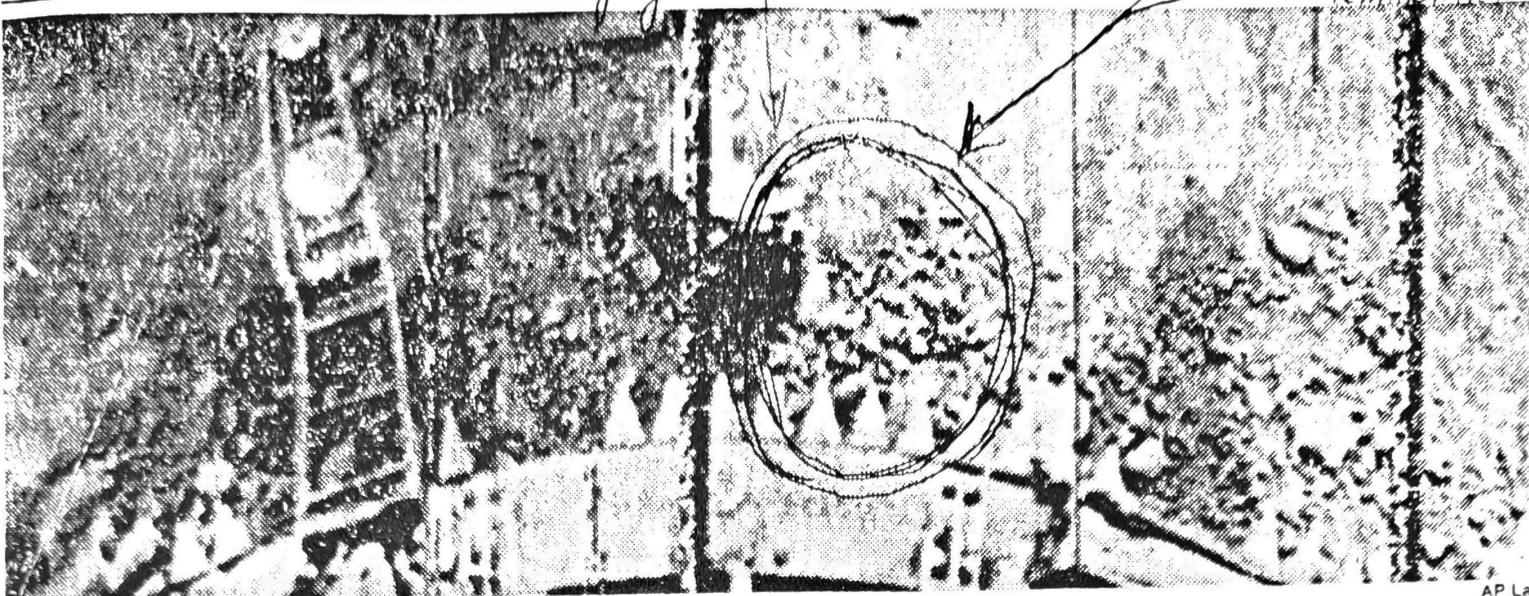

Sincerely yours

Soviets land space probe on Venus

COULD THIS CLEAR PHOTO BE TAKEN IF THERE ARE HEAT WAVES OF 800 F ON THE PLANET ?????? MOSCOW (Reuters) — The Soviet ion landed the first of two un- nanned space probes on Venus yes- day and said it took panoramic or photographs of the molten dscape of Earth's nearest plane- lary neighbor for the first time. The official Tass news agency said a descent module from Venus- 13, a parent spacecraft which made a four-month journey from Earth, landed early yesterday and sent back valuable information in tem- peratures of 480 degrees Celsius. The module from Venus-13, the latest in a series of Soviet missions to the planet since December, 1970, immediately began taking photo- graphs and analysing rock sa- using special cooling equipn combat the heat. Its co-traveller over the 11 lion nautical mile journey, 14, is to reach Venus this

Astronomers eye mystery 'giant'

ANN ARBOR, Mich. (AP) — A star's mysterious dark companion has caught the eye of as- tronomers. University of Michigan as- tronomer Richard Teske said the star Epsilon Aurigae's companion — if it is a single object — may be the biggest celestial body yet discovered.

"Every 27 years and one month the dark companion comes between the star and ourselves, partly cutting off Ep- sillon's light and causing it to dim for an interval of two years," Teske said.

Because the dimming of Epsi- lon's light lasts for so long, as- tronomers have "concluded that the dark companion is immense, nearly a quarter the size of our entire solar system."

Astronomers say they hope to learn more about the mysteri- ous body during this eclipse by using telescopes more sensitive and equipment more sophisti- cated than that available previ- ously.

Epsilon Aurigae is a winter constellation star that will dis- appear from view in the north- ern hemisphere's Western sky some time this spring.

Venus? It's brown

Gazette News Services MOSCOW — The Soviet space probe on Venus has found that the surface of the planet is dark brown, sources in Moscow said yesterday.

Venus-13 landed on the 480 degree Celsius surface of Venus two days ago. The craft transmitted a series of high-quality color pictures for two hours before it burned up.

A correspondent from the Communist party newspaper Pravda, said of the photo- graphs:

"It seems that you are looking through water.

"Stones on Venus seem to be close, reach out your hand and you will touch them."

Venus is shrouded in fast- moving yellow clouds which have hindered examination of its surface from orbiting spacecraft.

A second space probe, Venus-14, was due to land on Venus last night after fol- lowing its partner on the 187- million-nautical-mile-jour- ney from Earth.

The above face feature was removed before moving on T.V. why? at rock formation. But in the shape of a FACE

to the Vice President. Quebec Canada

Dear Sir,

During the past few months I have been corresponding with the U.S. Copyright Office, Department of the Interior, Bureau of Land Management, and they have asked for information on the copyright of the photograph of the man who was killed in the crash of the plane which was produced in a number of countries and reproduction of the photo in the book 'The Book of the Dead' from the country of the author. But in reproduction is quite good of the human figure can be actually be seen looking out through the picture, the U.S. Copyright Office has been fit to ignore my request in this letter to me, like the fact or ignore them, but can you please have an opinion made about who wrote the book to know the truth and my hope is that he can be the evidence for myself.

Yours sincerely,
Arnold W. J. Charles

W. J. Charles
W. J. Charles

Dear Sir,
During the past few months, I have been corresponding with the Department of the Interior, Office of Information, regarding the evidence, recently, as the expert to my knowledge, that can be seen under a microscope. The book "The Book of the Dead" has been produced in a number of countries, and reproduction of the plates in the book is in quality from one country to another. But in the reproduction is quite good, as the human body can actually be seen clearly out through the plates. The W. J. Charles have seen fit to ignore my request in their letter to me, but the fact is, ignore them, they can you please to have an open minded expert, who will be able to tell the truth and my name is that he can be the evidence for himself. W. J. Charles

Dear Sir.

During the past few months I have been corresponding with the U. S. O. project Officer in the Department of the Air Force, Public Information Office, Washington. They have asked for evidence, recently, I asked the Air Force to send an expert to my home, and I would show him the Human beings that can be seen inside a space craft. The book "Flying Saucers Have Landed" has been produced in a number of countries, and reproduction of the photos in the book varies in quality from one country to another. But in the British edition of the book, the photo reproduction is quite good, and Human beings can actually be seen looking out through the Portholes. The U. S. A. & F. have seen fit to ignore my request in their letter to me. It seems obvious that the U. S. A. & F. wish to either hide the facts or ignore them. Sir, can you please have an open minded expert, who wants the public to know the truth visit my home so that he can see this evidence for himself.

Yours sincerely,
Ronald W. J. Anstee

Dear Mr. Anstee:

Thank you for your letter of September 16, in which you refer to unidentified flying objects.

While we would not be in a position to send an expert in response to each such request, we are always willing to investigate all responsible reports or claims of evidence. Hence, if you wish, you can identify the book to which you referred as to title and publisher and send such identification to Dr. E. C. Welsh, Executive Secretary, National Aeronautics and Space Council, Room 11, Executive Office Building, Washington 25, D. C.

Sincerely,

Lyndon B. Johnson
