UFOs, Canada, A Global Perspective

print and electronic media. It is possible he may be visiting your area before the July gathering or if feasible, stopping over on his way to Toronto.

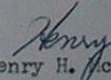

I am a little confused with the "circus" comment and me making direct contact with Margaret Trudeau. It is my understanding she was/is hosting a local T.V. talk show on current issues and if I had(had) the studio address on hand I certainly would have mailed one of the enclosed flyers to promote this event to the audience in Ottawa or better still, bring the cameras and crew to Toronto. Is her program presentation that bad? I recall a number of years ago when we shared a guest appearance on such a current affairs show, I found it constructive and stimulating.

Yes, Art, we do require sufficient lead time to prepare for publishing of the Proceedings and allow for delivery to Toronto in time for the Symposium. By the first week of April 1982, we should have in the hands of Walter Andrus, address above, the following; The complete printed text of your paper (abstract, introduction) an updated biography of yourself and a black and white photo, glossy, suitable for inclusion with the Proceedings. The confirmed principle speakers to date are; Dr. Allen Hynek with Dr. George and Iris Owen, Professor Michael Persinger, David Haisell and Stanton Friedman who is preparing a paper on governmental affairs and aspects of UFOlogy.

Give me a phone call if there is any questions of a pressing nature or if required, I will loan you my last reference copy of this years Proceedings. The average length of submitted treatise runs around twelve (12) pages, depending upon graphs, charts, etc.

Best wishes to you and yours,

Sincerely

Henry H. McKay
