Dear Section 19 (1)

We are pleased to acknowledge on behalf of Mr. Kierans, your letter of March 6, 1969 enclosing a copy of a letter from Section 19(b) regarding unidentified flying objects, which was received to us.

Since Dr. P.M. Millman of the National Research Council is primarily concerned with this matter, your letter has been forwarded to him for reply.

Dear Section 19(1)

We wish to acknowledge and thank you for your letter of recent date in which you request an interview with the Prime Minister as well as Messrs. Cadieux and Hellyer regarding the matter of Unidentified Flying Objects.

Mr. Trudeau was very pleased to receive your letter, but unfortunately, his schedule for the next several months has already been heavily committed and he will be unable to meet with you to discuss this very interesting subject. However, we are referring your letter to the Ministers of Defense and Transport, and I am sure you will be hearing from their offices in the near future.

The Prime Minister has asked me to convey to you his best regards.

Yours sincerely,

Sir:

The Montreal U.F.O. Study Group, is an organization which has been in existence for the last two years, and is probably, at the moment, the largest such non-profit organization in its field in Canada, with paid membership of well over two hundred persons.

Our main aims, are to study and evaluate U.F.O. reports, as well as investigate reported sightings with the possibility of learning the origin and/or construction of this phenomena; be it psychological or physical, natural or man-made, terrestrial or extra-terrestrial.

We are attempting to work along the lines of the now disbanded "PROJECT MAGNET" -- a former Canadian Government-sponsored investigating body, but on a much smaller scale, having neither the funds, nor the time (all persons involved, having outside full-time employment) to spare. However, we are able to call on certain interested individuals, as well as private companies, to aid us with their knowledge and/or facilities in our investigations, and in the formation of specific committees.

Information, and co-operation are the main reasons for this writing. We would like (if possible) to meet with yourself, as well as the Ministers of Defense and Transport -- mesrs. Cadieux and Hellyer respectively --- such meeting to be arranged at your leisure (preferably prior to May 1969).

THE MONTREAL U.F.O. STUDY GROUP

P.O. BOX 36

Dear Mr. Hellyer

RECEIVED

MAR 31 1969

MINISTER
OF TRANSPORT

I have just read an interview in the magazine "Canadian UFO Report". The interview was with a R. O. T. engineer the late Wilbert B. Smith. He said that the government had in its possession 3000 pounds of some strange extraterrestrial metal. He also said he had handled several pieces of UFO.

I would appreciate^{it} if you could give any other information in relation to the research into these metallic objects.

Thank you.

Section 19(1)
Dear

I am a grade eleven student (16 years old) at Elmira District Secondary School and my guidance counsellor suggested I write to you to obtain information concerning the matter outlined below.

For several years I have been interested in the subject of Unidentified Flying Objects. Recently I learned that the Canadian Government has a program for the purpose of investigating this phenomenon. However, I know very little about it and would appreciate it very much if you could supply information about this or inform me as to where I could obtain it. Two of the questions I have been wondering about are:

1. Is such a program temporary or permanent?
- 2/ How does one enter such a career and what are the requirements?

• Thank you very much for your trouble.

Yours truly,

Section 19(1)

The Department of Transport
Ottawa, Ontario

Dear Sir or Madam,

I would like some information
on unidentified flying objects if I may.
I would like it as soon as possible.

Yours sincerely

Section 19(1)

OTTAWA, January 30, 1969

Section 19(1)

CALGARY (49), Alberta.

Dear Section 19 (1)

Your letter of January 3rd, 1969, to the Secretary to the Prime Minister, Government of Canada, has been received in this Department for study and reply. The points on which you request specific information include problems which are in part the responsibility of several Government Departments and Agencies, and I believe it would be desirable for you to conduct negotiations on each direct with the concerned Department.

For some years past, a division has been in operation in the National Research Council of Canada which concerns itself with Upper Atmosphere Research. Head of this division is Dr. Peter M. Millman, who can be reached by letter addressed to:

Dr. Peter M. Millman,
Head of Upper Atmosphere Research,
National Research Council of Canada,
Ottawa 2, Ontario.

Other authorities in Government of Canada who are concerned with research concerning the earth's atmosphere and communications satellites are, respectively,

- Dr. J.R.H. Noble,
Director, Meteorological Branch,
Department of Transport,
315 Bloor Street, West,
Toronto 5, Ontario.
- Mr. W.J. Wilson,
Government Telecommunications Policy
and Administration Bureau,
Department of Communications,
Century Building, Lisgar Street,
Ottawa, Ontario.

Handwritten signature or initials.

Much of the research in air travel is conducted by the industry itself. However, the Department of National Defence operates the Aerospace Engineering Test Establishment at R.C.A.F. Station Uplands, Ottawa, Ontario, and is responsible for some research studies connected with travel in the atmosphere. The Defence Research Board, also under Department of National Defence, and which is located at 125 Elgin Street, Ottawa is also charged with responsibility for research studies in associated fields.

Research in the sense of which you speak in your letter is not a basic responsibility of this Department, although, of course, we are in touch with all the above agencies as requirement arises. Our research interest, apart from meteorology, is largely in the economic aspects of air travel, and a Directorate within this Department deals with these aspects.

Address is: Director of Transportation Policy & Research,
Hunter Building, Department of Transport,
O'Connor Street, Ottawa, Ontario.

A Charter for your Association is not a matter for this Department, and your question on this should be directed to the Department of the Secretary of State. I suggest, in the first instance, you might write to:

Office of the Under-Secretary of State,
National Building,
130 Slater Street, Ottawa.

That office will be in a position to conduct the necessary investigations with you which would need to be satisfied before a Charter could be issued, and is the authority to grant a Charter if your Association meets their requirements.

On the problem of obtaining relief from Federal Income Tax, I believe the local Taxation Office, Department of National Revenue (Taxation) should be able to provide all the information you require, or if not, could obtain it.

The final point in your letter concerns obtaining an appointee from the membership of the Government of Canada to act on the Advisory Board of your Association. In the several instances of which I am aware where Government officials participate in organisations established under private auspices, and provide their expert services to further the aims of the organisations, the appointment is negotiated privately between the organisation and the individual concerned. In your case it would be much more appropriate that any spokesman for your organisation to the Government of Canada be someone other than a Public Servant of the Crown.

I trust the above provides the information of which you have need.

Yours sincerely,

Peter M. Bonardelli,
Executive Assistant.

Ottawa, January 10, 1969.

AERO-SPACE RESEARCH ASSOCIATION

4619 VEGAS ROAD N.W.
CALGARY 47, ALBERTA

January 3rd, 1969.

The Secretary of the Prime Minister,
Government of Canada,
OTTAWA, Ontario.

Dear Sir,

The Aero-Space Research Association requests information from the Dominion Government regarding proper and legal operational procedures. Kindly forward this letter to the Departments that might best give the necessary information required.

During the latter part of 1968 the Aero-Space Research Association was formed. Personnel from the University of Calgary, Calgary School Board, Canadian Pacific Railway Co., and many very interested people felt there was a great desire by the public to become better informed about air and space travel. In the final analysis it was decided to organize the Aero-Space Research Association, not only to carry out scientific research and investigation of:

- a) Air and Space Travel
- b) Outer Space
- c) Atmospheric Conditions within the Solar System
- d) Unidentified Flying Objects

but also to organize educational processes for the people of Canada.

To date our Association consists of:

AN EXECUTIVE

Director

Co-ordinating Director

Secretary-Treasurer

Public Relations Officer

Chairmen of the four Sub-Committees (a, b, c, d, above)

When finalized we hope to have an Advisory Board with representation from:

- Universities and Technical Schools
- Dominion and Provincial Government
- School Boards and the City of Calgary-Planetarium
- Meteorological Department-McCall Field, Calgary
- Aviation Councils and Airlines
- Industry
- Other Air and Space Organizations

cont'd, pg. 2

THE PURPOSE OF THE ASSOCIATION IS SUB-DIVIDED INTO FOUR MAJOR AREAS

1. Scientific Investigation of Air and Space Travel.
2. Scientific Investigation of Outer Space.
3. Scientific Investigation of Atmospheric Conditions Within the Solar System
4. Scientific Investigation of Unidentified Flying Objects (UFO's)

pg. 2.

On Monday February 3rd., 1969 we hope to finalize our organizational policies and guidelines for operation. If possible, prior to February 3rd. we would appreciate the following information from the Government of Canada.

1. The Aero-Space Research Association requires full recognition and authorization by the Government of Canada to carry out its operations properly. If possible we would like some form of Charter from the Government. Please advise procedures to follow to receive a Charter from the Dominion Government.
2. In order to bring in funds, we assume our Association will have to receive some ratification from the Government Tax Department. If we receive a Dominion Charter we would like to be able to supply a receipt to any organization, person or company who will be able to use their financial donation as a legitimate expense deductible for Tax purposes. If this were possible I am certain there should be no difficulty in financing our Association. Please forward details in this regard.
3. The Association would appreciate the consideration of the Prime Minister to appoint a member of his government to act on the Advisory Board of the Aero-Space Research Association. This member might then be one who would be willing to receive our correspondence and perhaps also be our spokesman to the Dominion Government on matters of vital importance.

The Association will be most appreciative of any consideration and co-operation by the Government of Canada in fulfilling our requests.

Yours truly.
