Dear Grant Cameron,

My name is Gabrielle Giet and I live in Victoria BC Canada. I am hoping this letter will be received with an open mind. 12 years ago I nearly died giving birth to my daughter. The trauma awoken my abilities and left me new and improved. Abilities were now at full capacity and my life was forever changed. I am telling you this because as a result of being 'tuned in' I have become quite familiar with 'visitors' off planet and on planet and deal with them on a regular basis. It has been these very visitors who have given me a tremendous amount of information regarding different programs that were/ are in progress including agendas that no one seems to be talking about. I can also tell you about a species called ROTH (living on planet) who have now become a problem for me, and people like me.

I have been giving medical information for the purpose of curing the human population of all disease, bold statement I know, but if you knew what I knew this is what you would be saying as well. Currently am in the process of patenting a living bio medical bandage made of human components that will flip the medical world upside down according to some of the world specialists who have reviewed it. This bandage repairs skin rapidly, leaving no scar. This information was 'given' to me. Up until this information my medical knowledge was at best, how to put a band aid onto a cut and even that was tricky!

I have also been given the task of 'waking' those up who are ready, in order to create a chain reaction in humans that will kick start the next stage in our evolution and ultimately our survival.

I have reached a point of attracting danger to me as more of my information is getting out to the public. For the record, the information in my head needs to reach people at all levels and I refuse to stay quiet while so many suffer. I have taken on this task with no questions or hesitations however I have now found myself needing help.

I am reaching out to you in the hopes that you would be willing to meet with my partner and I to perhaps discuss, what I know and what I should do with some of this information. I am very willing to help you in any way that I can.

I believe you can benefit from some of the information in my head as I'm sure I have answers to some of your questions.

I invite you to do your research on me including the patent pending.

Grant you are my first choice in reaching out to someone. I feel you might understand what I have to do or at the very least point me in the right direction.

I look forward to hearing from you at your earliest convenience,

Sincerely,
Gabrielle Glet

I am certainly interested. This is my field and I am one of only a few who understand the importance of these downloads people are getting.

May I ask how you found out that I do this? I lectured recently in Vancouver but it was on Disclosure which I rarely do anymore.

You are right to be public and still protect your idea. If only you and your dog know, no one will know if your inspiration suddenly disappears.

It sounds like you have a way to the market which is the hard part. There are an estimated 2.7 million Americans getting these downloads and most have no way to get their ideas out.

What do you think I can do for you? I have two friends who have been in your situation and have made it out the other end or are in testing now.

I am EXTREMELY interested in who is giving it to you and the story that goes with it. Do you have Skype?

A lecture you might want to watch is by Mary Rodwell especially after the 45 minute mark

I am honored to have been contacted by you.

Thanks
