Aug. 22, 1982

Dear Jim:

I keep hearing rumors about me which are untrue, so I thought I better set the record straight.. presumably all the important people in Ufology and antiufology are non-subscribers to Saucer Smear.

1. I have not been silenced.
2. I have not dropped out of ufology.
3. I have not taken a government job.

Yes, I did have to cancel out on the MUFON Symposium in Toronto even though I had been an invited speaker and it was the first MUFON meeting in Canada. I also have had to cut back substantially on my UFO correspondence. The reason is fairly simple.

Since October 1980 I have been doing a weekly science commentary on the local CBC station. Because of my high profile in a small town and my having spent 14 years in the nuclear industry, I got to know many of the local people involved in the work on the Pt. Lepreau Nuclear Generating Station 85 miles away on the Bay of Fundy. I did some pro-nuclear broadcasts, a couple of debates, etc and wound up with a short term well paying job on the commissioning. Supposed to last 8-10 weeks.. instead lasted 22. I left home at 6:15AM and returned after 6:30PM. Just not enough time left to write a MUFON paper or keep up with my mail. I also needed to refresh my nuclear memories. The ride was no fun and neither are conventional nuclear powerplants, but the money was very good and I did enjoy return to the world of science and engineering. I have also gotten involved in trying to get my temporary employer Canatom (a private NOT governmental engineering firm) into some interesting areas of research and development such as food irradiation.

I am actively seeking bookings for my lectures "Flying Saucers ARE Real", "Nuclear Power? YES!" and "UFOs: Earth's Cosmic Watergate". I have continued my efforts in digging under the covered up data about UFOs. Some very interesting items have turned up and I am waiting for declassification review on a number of items which might prove interesting and which no-one has seen to date.

I have challenged Phil Klass, who maintains that secrets cannot be kept from the vigorous Washington DC press, to produce a copy of the 21 page Top Secret Affidavit read by the Federal Judge in the NSA case and by the NSA attorney and the three federal judges on the court of Appeals. I have also challenged him to produce the 131 Top Secret (or better) NSA documents. He has sent humorous missives but no copies even though I offered him 100.\$. I hereby make the same offer to all those noisy negativists out there. If no UFO secrets can be kept, than how to explain your inability to produce these publicly acknowledged documents?

I'll respond to Oberg's convoluted self back patting when he responds to my criticism of a couple of years back. He promised a response. For one US dollar to cover postage and handling I would be happy to send any one my "The Pseudoscience of Antiufology" and "The Intellectual Bankruptcy of Antiufology".
Keep up the communication.

Stan Friedman
