Dear Mr. Vonkeviczky:

As you expected, I have read your Blue Memorandum and Potential Threat Package with great interest. It also seems that the National Security Councils response and admission could not have in any way been a mistake since it specifically states "the threat you document so clearly." I have either seen or heard about most of the documents previously and have read them again along with your message to the president. The documents speak for themselves. It is even more alarming to note that if this much can be revealed from declassified material then there is no doubt more critical UFO Security Problems that we do not know about. It is nearly the tip of the iceberg as many have said.

Even the FOIA has it limitations and National Security loopholes. One of Stanton Friedman's recent attempts to obtain documents from the OSI resulted in a letter to all OSI offices. They were told to disregard the official FOIA procedures until further notice. I am very happy to say that Bill Moore is still researching the Roswell Incident and will have another book out on the subject in a few months if all goes well. Bill called a friend of mine in Texas the other day. He had just returned from a trip to Alaska where he had interviewed another witness. He turned out to be rather unproductive and told a different story than the others. After he left the room his wife told Bill not to believe everything he said and that even she could not get the truth from him. It would appear that security has tightened since his book came out.
