June 21, 1984

Dear Art:

It is my special delight present for your information the British Government confirmation (favorable confirmation!) of our Memorandum addressed to Margaret Thatcher Prime Minister.

It is already in the hand of Glancarty who promissed his action at the House of Lords.

As a further success, corretly open door through our Austrian Representative (Helmut Hajek (Not Hynek!!!) a public servant of the government with superb political connections. He organized our audience with the Bundes-president of Austria. He referred very important key material in Vienna to Peter Jankovich (Ambassador of Austria to the U.N.) chairman of the Committee on Peaceful Uses of Outer Space. He was shocked upon our presentation and Memorandums including yours and the reaction of your Ministry of Defense.

Everything moving ahead as scheduled, do not worry Art, documentations upon the road toward the UFO problem's solution seems addressed only
