Dear Arthur,

There has been some delay to my reply, I have been waiting for some news of outstanding significance or perhaps a recent incident worthy of comment.

According to the latest news, China has launched an earth orbiting satellite. Soon there will have to be traffic controllers to supervise the re-entry corridor.

To date I have not been able to arrange a suitable location for the proposed public debate, due no doubt to some degree on the adamant views held by many of the establishment. I am still working on this project and will keep you informed of any further developments. Enclosed is a copy of a proposed conference and schedule which should prove to be very interesting. I hope I can arrange to attend. Yes, the clippings that were sent to you are yours to do with as you wish, my contribution to your files.

That comment concerning Robert Stanbury was made with the understanding that he was Director of Information Canada, consequently he would be the individual responsible for release of public news items or propaganda if you will. The governments "Position Paper" on U.F.O.s if and when published should originate from this office.

REGARDS TO ALL,
Yours truly

Hank McKay
