No, I missed out on meeting with Emenegger back in 1984.
 I have also wanted to interview Shandera, but he has dropped from site.

I am now trying to re-establish contact with a scientist who did RE for the USAF back in the 70s.

My other scientist friend has been whisked away to an unknown location and we have lost contact with him. This is upsetting as I was making friends with this man and he has a lot to say, but Majestic won't let him go.

Bill

This is how he described it - as a membrane in its mouth. The sacrifice is that it would get sick.

> > >

> > > Over the years the Colonel and the creature got used to the fact that when he would give in to wanting to eat ice cream - he would be sick, but they were used to him from getting sick from different foods. They didn't give it too much serious attention, and according to Doty, this one day the creature started to get very sick, and the Colonel got very alarmed, and got him into some sort of hospital on an emergency basis at Los Alamos. The creature faded rapidly. This is supposed to be the parallel to the E.T. story. There the E.T. communicated that he needed light. He needed light from whatever sort of technology they had on the craft to restore him. Exactly like in the movie.

> > >

> > > You know Grant it is all so confusing because the story I am just telling you is so sad, and melancholy. The Colonel allegedly wept. They said it was like being with a child who had the mind of a thousand men, and the Colonel supposedly loved this creature. Then you have all the other stories that we are a failed experiment and it is time to wipe us from the planet. I mean honest-to-God!

> > >

> > > C: Did you ever talk to Emenegger? He supposedly saw pictures of the Colonel and EBE-1?

> > >

> > > H: I have talked to Emenegger umpteen times since 1983 and I have come to the conclusion that he does work for intelligence. He is a person who has told me variations on various themes. He rarely tells the same story the same way twice, and I am myself convinced. Larry Fawcett and myself sat in front of Robert Emenegger in his house together on March 26, 1983 and we asked him point blank "Did you see the 16mm motion picture film described as being taken by five cameras at Holloman?"

> > >

> > > He had all these detailed descriptions and I had heard an interview that he had done in Texas in 1975 telling all this stuff. Right in front of him, and point blank to my face he says, "No."

> > >

> > > He denied all the way up to this October's special that he had ever seen anything but blowups of frames, and then on the two hour special he said that he saw the film. He lied to us for five years. Not just to us but to other people as well. Now there has to be a reason for that Grant. There has to be a reason that Emenegger has close relationships to Coleman, Weinbrenner, friend, English and all these people at Norton and the Pentagon and Wright-Patterson, and lying to all of us that are supposed to be trying to tell honest stories.

> > >

> > > C: Does Emenegger still produce or what does he do?
