

NATIONAL RESEARCH COUNCIL OF CANADA
CONSEIL NATIONAL DE RECHERCHES DU CANADA

OTTAWA 7.

April 30, 1969

Mr. Arthur Bray
1187 Agincourt Road
Ottawa 5, Ontario

Dear Mr. Bray:

As you know, our files on non-meteoritic sightings are open and you are welcome to come and examine them any time. But we have had to establish the policy that we do not send out copies of the reports. I have filed a summary of my conversation with the observer of the April 22nd event along with his sketches of what he saw. I would be happy to have you come in and examine them.

I consider that my conclusions represent a very plausible explanation of the event, but of course there is no proof that my explanation, or any other, is the "true" explanation.

Yours sincerely,

B. A. McIntosh
Upper Atmosphere Research Section
