

When I decided to publish a newsletter, I did so under the influence of other researchers pro- extraterrestrial theory. Eventually, my attitude changed and I headed in the direction of objectivist. This progression is surely visible in UFO CANADA.

I've had meeting with other Canadian researchers, correspondences and telephone conversation and feel that a united effort in Canada would surely better the quality of reports & investigations.

In reference to your question on the article on Project Second Storey, the 322 page document actually is approximately 322 pages of files from Project Second Storey & military reports which you must be familiar with. It is my error for referring to these files as a document rather than presenting them as files. An error which will definitely be corrected.

Once again, I would like to thank for your letter and criticisms and I look forward to your book which I hope will finally present the a decent and objective version of past UFO studies.

Sincerely,

Howard Gontovnick
Howard Gontovnick
UFO CANADA

However, I will state here that our prime motivation as to collect and properly file on computer tapes (investigation as well) as many UFO reports as possible from CANADA. Our sources are: The M.E.C., Canadian Press Clipping Service, & correspondents from Canada and we do have correspondents in the Maritimes & in some of the western provinces. To put it in a nut shell - I would like to establish a library for Canadian UFO reports - similar discussed with Dr. Klyck, one of which he seemed to favour.

All I am asking of Canadian researchers is to assist us in the collection of reports which will in the future our library would assist them.

In reference to your remark on UFO CANADA, I must point out that the core of my information from Canada comes from the CANADIAN TWO WEEKLY UFOs & the Canadian Government - (Kanon, Vol. 2 no. 4) which are collected by other sources. It is important to remember that there has NEVER been a proper version of past Canadian research. For this reason, I am looking forward to your book which I hope will for once and all properly present a history of past UFO studies in Canada.

Finally, now UFO CANADA is not perfect and both have faults. However, if you take a moment to really look through UFO CANADA, from no. 1 to the present issues, the progression towards an objective and Canadian related publication is clearly visible.

Handwritten notes at the bottom of the page, including "Law's Progression investigation" and other illegible scribbles.
