Mr. A. Bray,
1187 Agincourt Road,
Ottawa, Ontario.
K2C 2H8

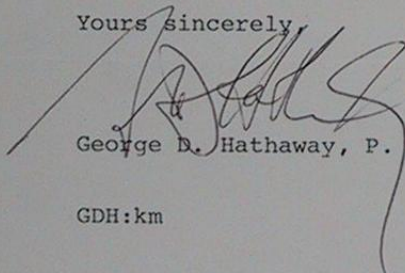

Dear Mr. Bray:

I'm very sorry for the tardy note but I have attempted to get in touch with you on several occasions by phone. Late last year some preliminary analyses were performed, or so I'm told by my West Coast contact to whom I sent some samples. These showed an incidence of iron, manganese and magnesium which corresponded closely to the EMR Mines Branch report. In addition, it was noted that several alternate magnetized and non-magnetized layers were evident, but this did not seem to cause any undue interest in the samples. No guess was made about the likely origin of the samples.

I am still waiting more detailed multi-spectrum analyses and will surely let you know when they arrive.

Again I'm very sorry for the long delay.

Yours sincerely

George D. Hathaway, P. Eng.
