Mr. Brian Cannon,
Independent Research Centre,
91 Voyageur Ave.,
Winnipeg 22, Manitoba.

Dear Brian:

Just a note for the purpose of keeping in touch. I have been wondering how things are going with you these days, and whether you have come up with any interesting evidence lately.

I am still having a devil of a time trying to get anything out of the government on our famous chunk of metal. The latest is that they have been "too busy". As they claim to already possess the evidence (proof) that the metal is terrestrial, it is odd that it should be such a chore to simply send it to me. Of course, this is just an excuse to stall me. This will all make a very interesting chapter for my next book!.

As for myself, I am about to leave the Navy, and am now on my "retirement" leave, so am looking around for new employment. Once I am finally released, I will no longer be subject to any censorship on UFOs, so I will have a little more freedom in this respect.

By the way, what has happened to CAPRO? Has it folded? The last Bulletin many months ago said that things were all set to get rolling again and that Bulletins could be expected on a regular basis once more. Haven't heard a word since. If it has indeed folded, I am sorry to hear it.

Hope to hear from you soon,

Best wishes,

Arthur Bray
