Absolutely! Help yourself. Its there to be read and distributed.

>Hopefully I will be finished this long project soon. I will be including
>many audios including an amazing interview with Bob Groves who had just
>returned from visiting Smith in July 1962. I will make sure you get a copy.

Good. Thanks, Grant. I look forward to it.

Warmly,

Errol

Hi Grant,

> I have recovered the interview tape of Bob Groves concerning his interview with Wilbert Smith shortly before his death. The tape was done in July 1962. It is a 90 minute tape and should be on its way to you tomorrow.

Thank you!

> I have only had time to listen to two of the great discs that you sent. From what I have heard I would like to ask your permission to include the Bob Beck audio as part of my Wilbert Smith CD of Smith's files and related material. The distribution of CD this should be limited as I can't see many people wanting to open file after file to view Smith correspondence. I hope to send you a copy of this disk shortly.

I am glad the recordings are assisting well in your research and that you are enjoying them. It is always nicer to have sound to back up data. Makes it more personal in a way.

As to copying the Beck recording that will be OK if you ensure that each copy has that it is from me and that it cannot be copied or distributed. Please let me know how many copies you make so I can enter it into my log. It is one of the few recordings that is of great significance and one that I always have a fear will show up on websites, etc.

Of my 700 or so recordings, I probably only have about 10 that I watch like a hawk because they are the only surviving recordings and I have the originals. I guess you could say that it is like having a museum with everything on display and available to the public, except for the rarest of the rare, which are available

only to the most astute researchers. <G> The Beck recording is directly from Maj. Keyhoe. Back in the late 50s and early 60s, researchers used recorded letters, rather than written ones. These audio letters are exceedingly rare and I probably have the largest collection of personal audio correspondence between Ufologists in existence. Many times the researcher would listen to their letter and then record over it to send back their reply. This, of course, negated hearing both letters, but the reply gave many good insights into what the original audio letter was about. The unique ones I have are when the original audio letter and the reply was on a separate tape. There are only a couple of those that survived. Anyway, that's why the Beck recording is so exceptionally important...not just the information it contains, but that it survived. Now, if I could only find Keyhoe's reply! <G>

I have a lot of Herbert Clark's audio letters. He was an early and quite astute Canadian researcher.

If you need anything I may have here in the archive, just give a whistle!

Best Always,
Wendy

Gant:

You have my permission to reproduce the article. I will look forward
 to
 seeing a copy of your final package.

Stan Friedman
