

(Talk in early 1957)

-THE FLYING SAUCER Council Of America-

Presents its Founder - President, Mr. HENRY MADAY of Detroit, Michigan, in a stirring, timely Lecture: "THE COMING OF THE SPACE PEOPLE "

On Sunday evening April 28, at 8.00 P.M.

Despite well documented proof that we are being watched by other planets, what are the Real Facts of interplanetary visitation? Mr. Maday is recognized by Major Donald Keyhoe, M. K. Jessup and competent authorities as a forthright and realistic civilian researcher. DO NOT MISS THIS PROGRAM, WITH SAUCER INFORMATION UP TO DATE !

(A questions and answers forum follows the lecture)

Congress Hotel " Michigan Room " 520 South Michigan, Chicago.

Admission \$ 1.50 Tax included.

*"Henry Maday is a genuine crusader and a powerful speaker.
All thinking people should hear him" -- Frank Edwards*

Fredericton, N.B.,
E3B 2E7.

Dear Stan:

Thank you for your letter of December 14th. I have made an inquiry of the Navy pension office in Ottawa and was informed that Bremner is now dead, assuming it is the same guy, but there was only one Bremner in their records who was a Naval Officer (the initial being W.). They will not give out addresses. Against the rules.

The only other papers I have, identifying any people involved with Smith, are enclosed. You may, perhaps, find them helpful.

Yours sincerely,

Arthur Bray.

Mr. Stanton T. Friedman,
110 Kings College Road,
Fredericton, New Brunswick,
E3B 2E7.

Dear Stan:

In reply to your letter of October 31st, you misunderstand my attitude towards science and scientists. My negative attitude is not directed at all scientists or science per se, but that segment of the community which refuses to examine the evidence for UFOs and other "unscientific" subjects. To ignore evidence and make pronouncements of its "unworthiness" is hardly scientific.

If you had read my writings carefully you would have noted that I speak frequently of the "scientific establishment", "orthodox science", "the majority of scientists" etc. I am clearly not against science or scientists, just those that ignore evidence and ridicule those who do examine it. I have had precious little complaint about those who are open-minded enough to study the evidence objectively and thoroughly before opening their mouths.

In fact, I give great credit to those who have explored "unorthodox" subjects and admire them for their courage. I gave credit to many of them in The UFO Connection, not only in chapters 9 and 10 in particular but also in the last paragraph of my Preface.

Further, a good deal of my paper Scientists in Support of UFOs (a copy of which I sent to you last spring) was based on the work of scientists, and I quoted them (including yourself) and gave full credit to all. If that paper wasn't a positive approach to a great many scientists, I don't know what is. It has since been published in the APRO Bulletin, No's 8 & 9 this year.

In view of the above, I fail to see why you are "dismayed" at my attitude. I think you may be overly sensitive because you are a scientist yourself. You are not among the group I do criticize.

Dear Stan:

In reply to your letter of October 31st, you misunderstand my attitude towards science and scientists. My negative attitude is not directed at all scientists or science per se, but that segment of the community which refuses to examine the evidence for UFOs and other "unscientific" subjects. To ignore evidence and make pronouncements of its "unworthiness" is hardly scientific.

If you had read my writings carefully you would have noted that I speak frequently of the "scientific establishment", "orthodox science", "the majority of scientists" etc. I am clearly not against science or scientists, just those that ignore evidence and ridicule those who do examine it. I have had precious little complaint about those who are open-minded enough to study the evidence objectively and thoroughly before opening their mouths.

In fact, I give great credit to those who have explored "unorthodox" subjects and admire them for their courage. I gave credit to many of them in The UFO Connection, not only in chapters 9 and 10 in particular but also in the last paragraph of my Preface.

Further, a good deal of my paper Scientists in Support of UFOs (a copy of which I sent to you last spring) was based on the work of scientists, and I quoted them (including yourself) and gave full credit to all. If that paper wasn't a positive approach to a great many scientists, I don't know what is. It has since been published in the APRO Bulletin, No's 8 & 9 this year.

In view of the above, I fail to see why you are "dismayed" at my attitude. I think you may be overly sensitive because you are a scientist yourself. You are not among the group I do criticize.

Regarding your fourth paragraph, I do not understand your suggestion that my statement may have been "intentionally in error". I made no "intentional errors", and if there are accidental ones, I will be pleased to hear about them. I have attached a copy of Smith's notes on this interview. My info on Sarbacher's background came from American Men of Science 11th edition, plus another paper from Smith's files (undated). Copy also enclosed. You can take it from there. I assume "Georgia University" means "University of Georgia" but I may be wrong. I would think that Sarbacher is dead by now and National Science Labs Inc. probably no longer exists. Thirty years is a long time.

As for my self-publishing, I am not convinced that the imprint of Jupiter Publishing makes it obvious to a prospective buyer that Jupiter is me. Without claiming my book is any good, you may not be aware of the fact that some of the world's great literature was initially self-published and was only picked up by a professional publisher after its worth was recognized. I state this only to show that there is nothing wrong with self-publishing.

Anyway, my experiences with Canadian publishers and my reasons for self-publishing are no one's concern. Likewise, the number of copies I have sold is no one's business but mine.

Finally, my concern with Stork was that it was referred to in a Canadian government report (with no mention of BMI) and as I was unable to locate any other mention of Stork, it seemed that it could very well be a significant study unknown to most of us. Finally, when I acquired a copy of Bruce Baccabee's paper Historical Introduction to Project Blue Book Special Report "14", the pieces fell together. He identifies it as "White Stork".

I hope the above clears up a few misunderstandings you seem to have.

Yours sincerely,

Arthur Bray.

November 23, 1980.

Mr. Stanton T. Friedman,
110 Kings College Road,
Fredericton, New Brunswick,

Dear Stan:

Thank you for your order for a copy of my book. You should have ~~received~~ it by now.

I was very surprised to learn that you have moved to Canada. What prompted you to do this, and why Fredericton? My wife and I passed through Fredericton at the end of September on our holidays. Had I known then that you are there, we would have contacted you and perhaps we could have had a short visit.

By the way, the list of publications you said was enclosed with your order was not enclosed. I will be grateful for a copy.

Sincerely,

Arthur Bray.

1187 Agincourt Road,
Ottawa, Ontario K2C 2H8,
Canada.

5 December, 1971.

California UFO Research Institute,
P.O. Box 941,
Lawndale, California 90260,
U.S.A.

Dear Sirs:

I wish to make application for associate membership in CUFORI. I was very pleased with your UFO REVIEW vol 1, no. 2, which I recently received with a copy of BLUEBOOK SPECIAL REPORT NO. 14. Would it be possible to obtain a copy of your first issue in order that I may start a complete file of these?

Also, please forward one copy of each of the following:

UFOs - Myth and Mystery (\$1.00)

FLying Saucer Energetics (.50)

A postal money order in the amount of \$5.50 is enclosed to cover membership and the two publications above.

Yours sincerely,

Arthur Bray

March 6, 1979.

Dr. P. W. H. Edwards,
3835 Clarndon Road,
Victoria, B. C.,
V8N 4A4.

Dear Max:

It was a real pleasure to hear from you. It has indeed been a long time since we corresponded. I still read your contributions to the UFO literature with great interest.

The news item you saw was a little misleading. I have written a second book, but it has not yet been published. I have three publishers who have indicated definite interest in it but nothing is firm yet as to which one will publish. I expect to have this settled within a few weeks. The title of my new effort is "The UFO Connection".

I began this course at Algonquin College last September and am now repeating it. It is going quite well and I am pleased with the response of the students. It is part of the continuing education program.

I will let you know when the book comes out. Meanwhile, kindest regards. It was good to hear from you.

Yours sincerely,

1187 Agincourt Road,
Ottawa 5, Ontario.

August 29, 1970.

Dr. P.M.H. Edwards,
4297 Gordon Head Road,
Victoria, B.C.

Dear Max:

Just a note to let you know that I received a letter from the U. of Victoria a couple of weeks ago informing me that I had not been selected for the position of Vice President for Admin.

Now, could you mind sending me Dr. Vellibovsky's address? I have been wanting to write to him for a long time but never knew how to contact him. By the way, there is a very good article about him in SIGA for September, by Joseph Goodavage.

Sincerely,

Arthur Bray

1187 Agincourt Road,
Ottawa 5, Ontario.

July 25, 1970.

Dr. P.M.H. Edwards,
4297 Gordon Head Road,
Victoria, B.C.

Dear Max:

This will reply to your two last letters, of July 14th and 16th. Thank you for phoning about the position of Vice Pres. for Admin. It was very kind of you to do this. It would appear there is hope for me yet.

I regret I cannot help you with your math problem. I, too, am no good at all at this sort of thing - it is beyond me completely. It is a very interesting question, however, and I have my own theory on the subject, which, of course, I cannot do anything with mathematically.

Regarding your query about a 2nd edition of my book. There isn't one. There was a second printing, but no changes were included.

Received your cheque for Herr Helmer's book, for which many thanks. I note your very interesting remarks about Velikovsky and am pleased to come across someone who knows him personally. You must have had a most interesting week with Dr. & Mrs. V. I have "The Velikovsky Affair" and it certainly does prove him right in many instances so far, as you say. I feel it is only a matter of time before further proofs will be forthcoming. I am very pleased to see that finally some more Velikovsky books are to be published. I have been awaiting these, anxiously, for years. I hope Vol. 2 to Ages in Chaos will be one of these.

I will try to obtain members for SITU, as you suggested.

Very sincerely,

Arthur Bray

I suspect we have both kinds around.

Also, as far as Barker, Palmer and that group are concerned, perhaps they have been on the ball all along. The main difficulty in swallowing much of what they have said, is again, evidence. They never had any to support their stories, so they were just stories. But, as you say - "the more mysterious it becomes". Indeed it does.

Sincerely,

Arthur Bray

P.S. I am indeed pleased that we have commenced these communications between us and hope we can continue them.

1187 Agincourt Road,
Ottawa 5, Ontario.

July 3, 1970

Dr. P.M.H. Edwards,
4297 Gordon Head Road,
Victoria, B.C.

Dear Dr. Edwards:

Thank you for your letter of June 30th. It was good to hear from you again.

I have heard nothing from U. of Victoria apart from an acknowledgement of receipt of my application. I now assume there is no possibility of acceptance due to the long time which has passed.

I will be very happy to send a copy of my book to your friend in Sweden. No problem at all - I am shipping copies to many countries all the time. You did not specify whether paperback or hardcover. I assume I am to invoice him rather than you?

Your recent articles in F.S.R. were most interesting. The study of linguistics must be fascinating. I look forward to further reports on this aspect of Ufology.

Sincerely,

Arthur Bray

December 2, 1982.

Mr. Stanton F. Friedman,
110 Kings College Road,
Fredericton, N.B.,
E3B 2E7.

Dear Stan:

Re your phone call of November 28th, there is no mention of Vannevar Bush in my W.B.S. papers, other than a reference to the magazine article partly written by Smith (See The UFO Connection, pp 61-65). Smith's papers reveal that this clearance was to be given by Bush. Incidentally, the magazine concerned was "TRUE".

Yours truly,

Arthur Bray.

Dr. Gordon Patterson,
Institute of Aerospace Studies,
University of Toronto,
Toronto, Ontario.

Dear Dr. Patterson:

I read in the Ottawa Journal the other day that you are going to conduct an investigation into UFOs, and that the Institute of Aerospace Studies, of which you are the head, was to hold a seminar last Thursday as a part of this investigation.

As I have been conducting a private study of this matter for twenty years and have accumulated a considerable private collection of literature on the matter, I would be most interested in obtaining any literature which may become available through the Institute's study, such as , for example, a transcript of Thursday's seminar or anything else of interest.

I will be indebted to you if you will let me know if it is possible to obtain such information.

Yours sincerely,

A.R. BRAY

1187 Agincourt Road,
Ottawa 5, Ontario,
January 20, 1968

R.C. Tennyson,
U.A.P. Project Co-ordinator,
Institute of Aerospace Studies,
University of Toronto,
Toronto 5.

Dear Sir:

Thank you for your letter of December 12th in which you replied to my letter of September 23rd, addressed to Dr. Gordon Patterson.

I am enclosing an announcement about my recently-published book, which I am certain your Project will find of considerable interest. I previously sent one to Dr. Patterson but have not heard from him. If your Project is really interested in all aspects of the UFO problem then you cannot overlook the contents of this book.

Yours sincerely,

A.R. BRAY

1187 Agincourt Road,
Ottawa 5, Ontario.

December 1, 1970.

Institute for Aerospace Studies,
University of Toronto,
Toronto 5, Ontario.

Dear Sirs:

I understand that your project to study Unidentified Flying Objects has been brought to a close and I am anxious to obtain a copy of the project report as a private researcher in this field.

It will be greatly appreciated if a copy of the report can be forwarded to me.

Yours truly,

Arthur Bray

1187 Agincourt Road,
Ottawa 5, Ontario.

February 6, 1971.

University of Toronto,
Institute for Aerospace Studies,
Toronto 5, Ontario.

Attention: Dr. R.C. Tennyson

Dear Sir:

Thank you for your letter of January 25 in reply to mine of December 1, 1970.

I am surprised that no scientific report is available on your UAP studies. I would think that some formal report in published form is required in justification of three years work, even if nothing resulted from the study. I would think, also, that your project must have been financed at least partially from public funds - grants from the Provincial government or NRC. If so, taxpayers are entitled to know how the money was spent and whether anything in the way of scientific knowledge was gained.

Further, the co-operation of the public was requested at the outset of this study. Even if little public assistance was provided, they are still entitled to a report.

Other scientific groups around the world have been studying this phenomenon also, and in the interestsof normal exchange of scientific information, they also are entitled to the results of your research. Is nothing being published for their benefit either?

As a private researcher, I tried to obtain details of your work while it was in progress, but met with no success, as I stated in my brief to the Senate Committee on Science Policy. Does this situation still prevail? Reports of other research projects of UTIAS are made available to any interested parties, so why not this one? This would appear to be another good example of why private researchers make the claim that it is most difficult, if not impossible, to get information from "official" bodies.

I hope I will hear further from you concerning this matter in the very near future.

Yours truly,

Arthur Bray

1187 Agincourt Road,
Ottawa, Ontario.
K2C 2H8

May 4, 1971.

Dr. R.C. Tennyson,
Institute for Aerospace Studies,
University of Toronto,
Toronto 5, Ontario.

Dear Dr. Tennyson:

This letter is further to mine of February 6th concerning
a report on the Institute's study of the UAP phenomena.

As three months have passed since my letter to you, I thought
that perhaps it may have been overlooked. I hope you will be able
to reply in the near future.

Yours sincerely,

Arthur Bray

disturbances, but this is one of their main reasons for being here.

I would suggest that you communicate with the Solar Cross Foundation, 15964 Valley Vista Blvd. Encino, California. This group have information which has been cleared for public dissemination.

With regret I must close for the present.

Yours truly

Feb. 23, 1959

Dear Mr. Fry,

I was going through my archives and turned up the enclosed poem, which I had written many years ago and done nothing with. You may find it suitable for publication in Understanding, if so, you are most welcome to use it.

With kindest personal regards and best wishes for the fine work which you are doing,

sincerely yours,

A handwritten signature in cursive script, appearing to read "W. B. Smith".

W. B. Smith

August 1, 1956

Dear Mr. Fulton.

Thank you for your kind letter of July 19, and also for the copies of your bulletin. Yes, I have a copy of "The Truth About Flying Saucers", and I enjoyed reading it very much.

With reference to Plantier's theory it is quite surprising how close to fact his speculation really is. However, he did not press his conclusions to their logical conclusion because if he had he would have been able to explain the remaining features of the UFO sightings. Plantier merely postulated somekind of a force field and drew his conclusions therefrom, with amazing accuracy.

I am truly sorry that I cannot pass on to you or your group at this time, the information that I have with regard to such force fields. You see, there are several of us who are entrusted with portions of this advanced technology, none with enough to make real use of. The idea is that as and when the world becomes sane, this technology will be placed at their disposal. We are specifically prevented from any interchange of information or any premature dissemination of it. We are given this information as evidence of the good faith of the saucer people, and as proof to our individual satisfaction that they are what they say they are. I can assure you that their knowledge of physics is way ahead of earth's, and furthermore as one of them said, "You people know an amazing number of things which arn't so."

I note that you have written to Don Keyhoe several times without getting much by way of a reply. I know Keyhoe quite well, and I am amazed that he keeps going. He practically lives on pills of all sizes, shapes and colors. Furthermore, he is a busy man and in addition gets great mounds of saucer mail. I am still not sure how convinced Keyhoe is regarding the interplanetary nature of the saucers, or the fact that their occupants are of the same racial stock as earth people, but he is convinced that they are real and that there exists much more information than has been made public. He does "color up" his presentations but fortunately not at the expense of accuracy, as I have yet to catch him in a mis-statement.

With respect to coming events, I expect a substantial increase in sightings within the next few monts, accompanied by a number of upsets of various kinds. Just how severe will be these upsets

P.O. Box 72.
Onehunga S.E.5.

Mr. W.B. Smith
Box 51,
City View P.O.
Ontario, Canada.

July 19th 1956.

Dear Mr. Smith,

I wish to thank you most sincerely for your letter dated 24th April to mine of 15th April, which arrived in yesterday's mail. After 12 weeks I had begun to feel that my letter to you had gone astray, I was really surprised to note how long sea mail takes to reach us from your fair land.

Your 'statement' so kindly enclosed will be reproduced in full, it is a pleasure to do so. News from you will be something special to pass on at our general meeting (monthly) in a few nights time.

I share your sentiments entirely Mr. Smith and feel I can grasp fairly accurately exactly what you imply in your letter and statement.

If you have not already read, I would most strongly recommend you obtain a copy of Aime Michel's "The Truth About Flying Saucers's", the chapter dealing with Lt. Plantier's theory of disc propulsion -electro-mic force field, is the best and most acceptable theory I have seen offered to date. Having postulated a most similar theory for some time- naturally I think it's very good, so please forgive me if my appraisal appears self evident.

Should you at any time again meet or write Major Donald Keyhoe, please convey my very best regards, he is my Star UFO researcher. I have written him three times air-mail beginning Dec 1955, however, I have not yet had the good fortune to hear from him, in any form.

Should you at any time in the future, prepare further releases, I would be most grateful of being included in your mailings. A copy of our magazines (last three issues will be dispatched to you, first class mail.

Sincere Thanks and Kind Regards

David H. Fulton

Harold H. Fulton,
Don. Pres. CCI (NZ)

P.S. Sightings of "Cigars" (some in formations of three) and glowing-rod (at night) and glowing silver (during daylight) discs, reports suddenly at a high rate into 1971. Observations throughout New Zealand, Australia and Fiji of recent date - co-incident to 22.000 v.c.f. 10th June.

Am expecting extraordinary performance from HGO-vibrations record half 1956. recent appearance confirms forecasts.

Recent falls in Melbourne of "Angels Hair" (you'll appreciate) and also tremendous aerial explosion rocks 60 mile arc, Melbourne 29th June.

Currently standing by for further enlightenment. - from who so ever it be who does such civility is won.

Oct. 10/57.

Dear Mr. Fry,-

I am taking this opportunity of writing to you on behalf of Wilbert who seems to be so busy these days that time goes and he never gets down to correspondence. We are in the process of building to our home and he has had to do a lot of sub-contracting as we are continuing the pattern of our present home, pre-fab, and an annex is as much trouble as a new home, that is the conclusion we have come to.

I was very disappointed we did not make it down your way this summer, particularly because I know that Wib has been looking forward to meeting you and just talking to you. However I had promised my mother I would take care of my sister after her death and when she decided to come east to marry and settle down we had to abide by her plans and it wasn't until the 18th of September that she was married.

We received a letter from Mr. Middleton and I realized I had not written to tell him we would not be down, although I guess I did write several. However I hope we will be able to make it sometime in the not too distant future. If only we could commandeer a saucer we would make it for a day anyway and visit you.

I am very interested in your "Understanding" group. We have a group here, approx. 30, and we have not organized into a club in the hopes that by writing and keeping in touch with more people, possibly when they are up in Canada they would come and visit with us and help us in our thinking.

I realize you are a very busy man but I do know that Wib would be interested in your lab. If you, or when you come north in your country if you could possibly let us know, maybe Wib could arrange to meet you and have a visit with you. You are always welcome to come and visit us, we would be most happy to have you at any time.

Wib will write at the first opportunity when he can sit quietly and enjoy same with you. Right now we have had a chap from New Zealand with us and he has kept Wib talking every minute he could get his attention, chiefly on magnet forces, I gather. He is leaving on Tues. so we will have a free house again, but we are wondering who will be next.

2.

I will close now and hope that Wib will have time to write on to this letter before it is mailed.

All the best always,

AUG 11 A.M.

File 5200-3

Mr. Wilbur B. Smith
Controller of Radio
Department of Transport
Dominion of Canada
Ottawa, Canada

Dear Mr. Smith:

You may remember me as a result of our association during the 1950 NARBA. You no doubt will also remember Mr. Ralph Renton of the Chief Engineer's Office of the Federal Communications Commission and former United States' representative on NARBEC.

Last Saturday, Mr. Renton and I engaged in an interesting discussion of flying saucers, our discussion hinging for the most part on the most recent book of Major Donald E. Keyhoe, "Flying Saucers from Outer Space." In this book, Major Keyhoe devotes a chapter to the Canadian project and quotes you freely. He makes a statement that you head up the U. F. O. activity of Canada.

This letter may be impertinent, but I would appreciate hearing from you and learn whether you substantiate within reason the statements made by Major Keyhoe.

Best personal regards,

Dwight A. Myer
