

The most interesting aspect of this volume is it was that dashed to see only "all four volumes of file 5010-4". Verbal permission was granted by Dr. John de Trecato, Director General Communication Regulatory Service, at 996-2453.

When I presented myself at the Records Unit on 8 Aug. 1979 to view these, I found to my great surprise that there were five volumes, vol. 5 being Confidential and formerly identified as 6650-4.

I was assured by the Records Unit Supervisor, Mr. Codere^(Codere) that he knew I am writing a book on UFAs and that it didn't matter that I was permitted to view a Confidential file on the subject. I was free to use the information as I please.

He said if I had any further query on the matter to contact Dr. de Trecato.
