

3 pictures taken by Mrs. Freddie Bishocket

- pictures are taken looking into West.
- Venus in second picture is on the Western horizon.
- object is moving from South to North
- speed about 60 to 80 mph.

1) object is flying on an angle

leaves trail because the lens is left open for one second - therefore the object has moved the length of the trail in one second

time - 11:21

2) planet Venus to the right of the object

trail = length of movement in one second.

time - 11:22.

3) object has stopped - hovering

time exposure is one second - there is no trail
saucer shape is evident

time 11:23.

The polls taken in the Manitoba area are susceptible to the same error factors as those polls taken by Gallup. The questions were carefully worded as not to ~~lead~~ imply answer.

Those polled here in Manitoba are not more sus. to misunderstanding the question than a child of similar age in Palm Beach, Florida. Similar sus. to lie, hold back information and exaggerate would be found in both areas.

The polls were random samples taken at various high schools and junior highs in Manitoba. Only in three schools were ~~the~~ was the audience present on their own accord. (Cannon, Manitou, and Gimli). In the rest the lecture was part of the days work, and all students were present.

It could therefore be said that the results percentages in favor of UFO believe and involvement are higher in Cannon, Gimli and Manitou than they should be, due to the fact that the student was there on his own. He therefore must have had some prior interest in the subject.

Another factor that adds to the high percentages in the polls is media coverage of the flap. This however only applies to the Cannon poll as ~~the~~ the Cannon Sufferin Leader was the only paper that gave the UFO sightings extensive coverage.

This is an interview that was conducted with Mrs. Lutz,
se 6-8-1w, Sanford, Manitoba, 736-2875.

Q. I was told that you had been involved?

A. No. It wasn't me. My niece had seen one, but I haven't seen one myself.

Q. Where is your niece living now?

A. She's living in Fort Garry.

Q. Have you got her name?

A. Well she's living with her sister, 475-1362. Just ask for Barbara.

Q. Did she see this in this area?

A. Ya. Brunkhild area.

Jan 75

This is an interview with Marcel Viugnier, nw6-8-6w, Rathwell, Manitoba, 749-2287. The interview was done Nov. 11/76

Q. When did this happen?

A. Well, it must have been a year ago last winter.

Q. That would make it the end of 74' the beginning of 75'. You don't recall what month it was. December or January.

A. January. I think.

Q. Can you tell us what happened?

A. Well I saw this light over there.

Q. Were there any colors to it?

A. Oh ya. Different colors.

Q. Was there any change in the colors?

A. No. It was the same all the time.

Q. It was in that direction over there?

A. Ya. West.

Q. It was heading in that direction?

A. Ya. South. South-west.

Q. What was unusual about it?

A. There was a lady in Pilot Mound. She saw one the same night. At 10:00 that night.

Q. What time was this one?

A. This one was about twelve o'clock.

Q. Could have been the same one?

A. Could have been.

Q. How did you find out about her. Did she phone you?

A. No. The mounties told me about that.

Q. That was Treherne?

A. Ya, Treherne.

Q. Was there any other sighting around that time that you know of?

A. No. Last summer, at Carmen. They were there for three or four days. I saw something one night out this way (east), and I said there is a UFO over by the Haywood tower. Later they said that they were coming to the power station there at Haywood. Maybe that's what I saw. I don't know.

Q. Was that the same sort of thing?

A. Ya. A bright bright light.

Q. How big would it be in comparison to those trees?

- two -

A. I don't know. It was just a light. I lost it behind the trees.

This is an interview with Kenny Swirsky, 554 Sharron Bay, North Kildonan, 338-8441, co-owner of Whiteshell Lodge, and the person that was involved with Nicky Warner in the Fall of 1974.

Q. Could you tell me your version of the story?

A. Well, I think it happened a year or two years ago.

Q. You can't be more exact?

A. It wasn't last year, it was the year before.

Q. You were traveling from your lodge?

A. From Whiteshell Lake to West Hawk Lake. Well about half way we noticed this object in the air, and we didn't pay any attention to it - we were just sitting there. All of a sudden I said, 'Do you see that?' He said, 'Ya, I was just watching it.'

It was so strange I couldn't believe it.

Q. Ricky mentioned a low cloud ceiling?

A. Ya. It was, and there was this shine right up to the clouds, and there was this revolving light. It followed us.

Q. It followed you?

A. Ya, it was right beside our car, when we were going. I didn't know what it was, so I took off, and it followed me right beside the car. So I stopped, and it stopped. Then it took off like a flash - you couldn't even see it go. Unbelievable!

Q. Ricky said that you got out of the car?

A. Ya. It was on the other side of the cliff. We got out and we were looking at it. Ricky said, 'Let's go and look at it,' and I said forget it.

Q. You said that it followed you. Was this the light or was this the object?

A. Well, I did see something, but it was so dark out, because it was so cloudy out. All we could see was this revolving light, and when it was following the car, it was revolving all the time.

Q. Was your impression that there was a light on this thing that was revolving, or was the object rotating?

A. I thought that it was the light revolving.

Q. How big a diameter?

A. I really couldn't tell you that.

Q. Did it cover quite a bit of the sky?

A. Oh, ya. It did! It was just a real powerful light.

Q. Did you have any afterexperiences like Ricky mentioned?

A. No.

Q. This is the only sighting that you had been involved in?

A. Ya. I've never ever seen anything like that before.

Q. What was your impression?

A. At first I wasn't scared, but after about ten minutes I was. I got worried. I didn't know what it was. I got pretty worried. I'll tell you. My foot got pretty heavy on the accelerator.

Q. You said that you took off. What speed did you get to?

A. When it stopped, and we got out of the car, it was revolving. I said, 'Ricky, Let's get in the car.' So I got in the car and went. Then all of a sudden it just took off like a flash. All you could see was this spark that went down the road. Along the bush line. Well, it was above the trees, on my side, and it just took off like a flash. I was even scared to come back.

A distinction must be made to differentiate between a pulsation and a flash. They are instantly assumed to be the same thing, when actually they are as different as day and night.

It is for this reason that Psychologic investigators have made serious errors in evaluating field reports. Most researchers work from second hand reports, and in most cases they have not themselves seen a turned "VFO." Consequently pulsation, as described in the report, become interpreted as the same light as a plane which it is not. Many reports therefore are thrown out simply because of the misperception of the researcher in actually seeing the object in question.

An attempt to describe the two is as follows:

Flash - the rotating light on a plane can only be seen $\frac{1}{2}$ of the time. The net light comes to the first 180 degrees and takes the following forms; visible - bright - visible. The light then moves to the other 180° of its rotation where it is not visible to the observer. Consequently, the light is off on, off on, off on. The general cycle is 60 c.p.m.

Pulsation The red pulsation of an object involves seeing a light that more goes off. The intensity is the only thing that changes. It goes from a low magnitude to high magnitude to low magnitude etc. Unlike the flash the light does not go out.

The appearance would be similar to the pulsation of a heart. The whole object is colored and the pulsation takes place throughout the object as a whole. It is for this reason that the energy is thought to be a life energy, rather than one a light as a machine.

Sept. 17 /77

Dear Grant.

I received your letter this week. It was nice to learn of your progress in regards to your U.F. O **material** that you are gathering for your book , and I shall look forward to reading it when ever you have it published.

Yes, I have sighted two or more U. F. O 's but these were in the south- west and carmen tower area. I made rough sketches of them at the time. Lately however I have been recuperating from a bout with the 'flu, so have had to take things easy.

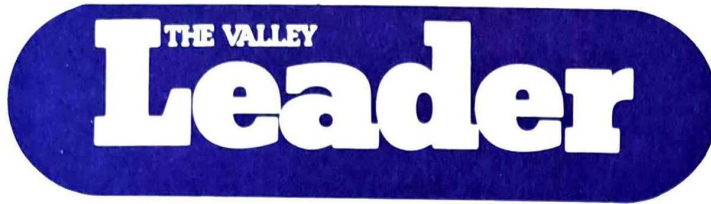

I shall try and locate the Valley Leader with the **infor -** mation you require and enclose the article with this letter.

If I was feeling stronger I would enclose a list or rather description of what I have seen but feel free to drop in anytime I am usually at home, and Doug says he would enjoy hearing an account of your findings up to date.

All the best in your endeavours,

Mrs Penner

Dear Grant,

Please accept my apologies for not replying before this date to your letter of July 23, 1977.

As usual the paper is keeping my nose to the grindstone.

Enclosed is a copy of the news sheet which you requested.

Mother said that you had been out one day. The next time your around drop in for a cup of coffee. I would be interested in seeing your slides, but just never have been able to make it, when you have been out at Carman.

Sincerely yours,

Doug Penner

This incident occurred in August of 1975, in the field next to the field where Micki Fraser hays. We viewed the field a year later and the marks were still present.

Sept 14/76

Tape is in reference to a landing sight off highway 75 south of Winnipeg.

Grant : Could you tell me a little bit about what happened?

Water Pump : That happened this spring I guess. There is a place where something has landed, and, I haven't seen this myself, but they say there is a wole. Someone - it must be the R.C.M.P. had staked flags all around the place. The farmer that owns that land is scared to go near it.

Grant : I had driven by there last night and I didn't see the flags?

Water Pump : Ya. They're a little ways off, and if you don't know where you are you won't see them. You know where 14&75 meet - that junction coffee shop is?

Grant : Ya.

Water Pump: It's just a little ways on this side of it about a mile or so. Some time when you come out you stop by here and we'll both go look at it.

Interview conducted with Mrs. Goulet of Winnipeg Beach, wife of Mr. Lorne Goulet who made a daylight sighting while flying from Churchill Manitoba.

In reference to the sighting of Lorne.

Q. It was in May?

A. It was in May. May 6th - well it was in 75. He thought that it was in 76 when he was talking to what's his name, but when he checked his log book he found that it was 75.

Q. Was this the only one that he had seen?

A. Well it seems to me that he had seen them before. I don't think that they impressed him as much as this one, they could have been this or they could have been that. But this one - I think it really shook him up.

Q. Was he shaken up by it?

A. Well not shaken up - like scared by it - just astounded. He kept hearing about them, but to actually experience one that closely. to see the shape.

But Hartleys - I hadn't heard about his before. I guess he hadn't told to many people about it. Well I don't know him that well, but then that happened in 71.

This #1 is an interview with Mrs. Jean McMahon of Roland, Manitoba, SW 10-4-4W, 343-2056. She sighted a UFO in June of 1975 and phoned Bob Diemert to tell him of what she had seen. Bob Diemert had seen the same object from Roland and the night later chased the object to Morden where he witnessed it "blast off."

Due to the fact that the batteries in my taperecorder were not charged because of one bad battery, I was not able to tape this interview.

Mrs. McMahon stated that she had been ~~driving from Carmen~~ ^{driving from Carmen} ~~to Morden Man-~~ ^{to Morden Man-} ~~it~~ when she saw the object come toward her and stop above the truck that she was driving. She was with her daughter, as her husband was away on a fishing trip. The time according to Jean was 11:20 P.M.

As the object sat above the truck, she stopped the truck and opened her window to see if she could hear any noise from the object. There was no noise at all. The object was round but she could see no great detail, as had been believed before I investigated this case. It was bright red, and was easily seen.

Great Visions and A Greater Experience

Are We Prepared For What is to Follow?

On Sunday, May 2, 1976 we were coming home from visiting a relative who had been sick for the past three weeks, living south of Winkler, Man., (approx. 75 miles south of here). While we were driving along I was looking up into the Heavens and thinking, "what is this world coming to? Why is everybody after money so much and so few have time to read and study the Bible; instead they have to be with the worldly lusts. How long can this go on? With tears in my eyes I was wondering, how I would be able to help these people, but yet I was helpless. The Heavens were so bright and close, the moon as though we could reach it and not a cloud in the sky. We had never seen anything like it before.

It was 10:30 PM D.S.T, (9:30 C.S.T,) as we drove through Carman, Man. I was still watching the Heavens, my conscience kept on telling me we would see something in the Heavens. We were about three-quarters of a mile north of Carman when a small cloud appeared in the sky west of us, very bright and strange. We went on for about another one-half of a mile when I looked up again. The cloud was much bigger and closer. I said to my wife and children, "LOOK AT THAT CLOUD." I looked up again, could see no end, looked to the east, the cloud reached right from the east to the west, a long, narrow, sharp cut, and very bright with the shape of a foot on each end. While we were driving along one of our fourteen year old twin girls said, "THERE ARE STRIPES IN THE CENTRE, THE COLORS OF A RAINBOW." At this time I was going to stop but didn't, drove on for a very short distance when like a big explosion with no noise the cloud opened up. We pulled up unto the shoulder and stopped, looked up and saw a big colorful war covering all the Heavens above. On the west side of us was like horses with breastplates running to battle, on the east side of us were quite a few white Angels, each surrounded by pillars of fire. After a while this cleared away, we started driving again, thinking this would be all we would see when our youngest boy, ten years old said, "THERE IS SOMETHING LIKE A DRAGON, IT'S BIG AND RED"! I, thinking it was just his imagination, didn't stop until a few seconds later when something came down on us. We pulled up unto the shoulder again and stopped. I opened my door, put my left foot on the ground, the thumb of my left hand on the interior light switch at the door and my right hand on the steering wheel, half-way out of the car looking up. Was as though a

big and very bright, colorful funnel up side down over the whole car, two great big hands coming down underneath the car and felt as if we were lifted up into the Heavens. While we were lifted up our feelings disappeared, our weight was gone, and our flesh had disappeared, felt as though a little gust of wind could blow us anywhere. I thinking never to return again, but then on my second thought, no there is more to come, it couldn't be, thinking about my family I looked over my shoulder to see whether my wife and children were along too or if I was alone, but all six of us were in the car. I looked up again to see where we were going, never thought of looking down. We never felt better in our whole life. No cars passed us at this time. It was a complete silence in the car. After quite a while one of the twin girls said, "DAD, YOU ARE GOING INTO THE DITCH." I looked and sure enough, the right front wheel was in the ditch. I had to turn the steering wheel quite sharp to avoid backing straight onto the highway. I looked up again and saw an Angel up above as if it were the sun, two hands saying, "COME, COME, COME." Like a huge funnel up side down, burning with very bright and colorfull pillars of fire, the horizon black as coal, no Heavens visible. Many cars passed us at this time but nobody ever stopped. On the highway it was very dark, beside the highway it was quite bright, we could see quite a distance. After a while this cleared away, except the pillars of fire stayed. We started driving again, went a short distance when our ten year old boy said, "THERE IS SOMETHING LIKE A SERPENT," I kept on driving when he again said, "THERE IS A HEAD OF A LION." My wife and children all looked up and together said, "NOW THERE IS A DEER," the boy again said, "NOW THERE IS A WOMAN WITH SCRAGLY HAIR." I thinking he was taking it as a joke told him not to make fun of it, it wasn't funny. He wouldn't keep quiet and again said, "NOW THERE IS A FLYING EAGLE." At this time we again had to stop. I bent over the steering wheel to look up into the Heavens and I saw a big armchair or a throne, somebody sitting on it, and many kneeling around it. This was not very clear, it had started fading away. Everything that had happened up to this time, was always right above us. This time we thought we would stop till everything was gone. Sitting and watching the Heavens, very bright and colorfull pillars of fire still burning around us, a very bright star started falling from right above us, falling towards the north and as it came to the pillars of fire, they opened up. There was no flame over the path of the falling star. The star fell to the black horizon and disappeared. We still sitting and watching the Heavens, seen another star come from the north with terrible speed, going south. It was one, two, three and gone. Well we finally started driving again when we noticed we were close to Oakville

and had not been driving more than a couple of miles from Carman. It is about thirty miles from Carman to Oakville. Nobody can remember going past Elm Creek at all. Well, anyway we went on home. We got home at 11:45 PM D.S.T. (10:45 PM C.S.T.). As we got home I looked back where all this took place and could still see the huge pillars formed in the shape of an arch from all sides. They were not burning anymore, they were white with the hole on top where I had seen the Angel.

On Thursday, May 6, 1976 we woke up at 4:00 AM D.S.T. (3:00 AM C.S.T.) and heard three great thunders with very long echoes. The first one was very loud, the second one a little quieter, and the third yet quieter. That same day there was a big earthquake in Italy.

We ate and slept very little that week. If we got two hours of sleep a night, we were lucky, but never tired. From two weeks before till one week after this happened, I could not fall asleep without tears rolling down my cheeks, but it was worth it.

Without the LORD, we are nothing. HIS power is way beyond mankind.

Please bear with us, the time is going to be short. If you only let HIM, may the GOOD LORD be with you till the end. HE CARES; AMEN.

You will find these visions described in Rev. Ch. 4-10-12.

Seen and experienced by Mr. & Mrs. D. J. Fehr and family of four, Portage la Prairie, Canada.

Written by Mr. D. J. Fehr

Because thou sayest, I am rich, and increased with goods, and have need of nothing; and knowest not that thou art wretched, and miserable, and poor, and blind, and naked. Rev. 3:17.

Blessed is he that readeth, and they that hear the words of this prophesy, and keep those things that are written therein: for the time is at hand. Rev. 1:3.

Sanford Collegiate
Box 70,
Sanford, Man.
ROG 2JO
Nov. 25, 1976

Dear Mr. Cameron:

I was asked for the names of the latest Sasquatch sightings in Manitoba. I am glad to be of service to you, but suggest you contact Mr. Brian Macdonald from the Winnipeg Free Press if further information is required. Also, I would appreciate some off-hand information on UFO's, for I have come to the conclusion that the Sasquatch is related to Unidentified Flying Objects. If I can be of any further help please contact me through Sanford Collegiate.

Here are the list of names:

Carberry	Rossendale
Treherne	Pointe du Bois
Poplarfield	Ste. Rose
Fisher Branch	Koostatak
Dallas	Easterville
Grande Rapids	The Pas
Little Grand Rapids	

There is also a trail of Sasquatch footprints along the Souris River coming out of North Dakota and up to a little past Rossendale.

Sincerely,

Irvin Viers

*Dean

Interview of Ed Barker by John Pierce

It's not a repeatable kind of thing, that you can set it up as an experiment in a laboratory. It's a chance thing.

Ed Barker is a planetarium artist.

Question: What is your comment about them?

Barker : About them in general?

Caller: Yes.

Barker: Because they're still going on. OK, let's be kind of official on this. People are definitely seeing something.

Whether they're alien space ships is another thing.

Now we have investigated, myself and one of the technicians at the planetarium, did look into the main Carmen sighting - Charlie Red Star Last summer, and we did find a very interesting radiation, which, when bringing in a couple of geologists - they could not explain it. We can't explain it as it was unusually high for the area, and in specific spots, radiating roughly 25 feet in diameter.

Caller: Is there continueing investigation?

Barker: Oh yes, there is continueing. I was out to check a couple of days ago into one in day and night. I go out quite often in and around the area. It's a good technique, is to get to know the area that your looking after.

May 76
