Dear Hank:

Thanks for yours of May 25. Also thanks for the report on the metal. Is there any chance that you can obtain a copy of the precise results of the analysis showing the percent of this, that and the other metals making up the sample, as well as what tests were actually conducted? That is what is really important.

By all means direct your piece to any lab you wish, for any tests you wish. I would suggest you not suggest that it may be slag, however, as if it is slag, it is best for them to determine this themselves, rather than to assume it is, when it may not be. My wording sounds crazy in the previous sentence, but I guess you know what I mean.

It was very pleasant visiting your family recently, and having dinner with you. I also enjoyed my evening at the College with you. Keep up the good work.

Since I last saw you, I have been from coast to coast on business. Had a chance to meet Brian Cannon in Winnipeg and had a two-hour chat with him.

Regards to all,

Art Bray

P.S. Enclosed are copies of letters from Dr. Tennyson and Dept. of External Affairs, which you may find of interest. You will recall I mentioned that I was having difficulty in getting a report from the good doctor on his UAP Project.
