Feb. 11/71

Mr. Paul J.L. Rozich,
1819 Railroad Street,
Alliance, Ohio, 44601, U.S.A.

Dear Paul:

On January 12 I wrote to you and among other things, asked if you would let me know by return mail if it would be in order for me to quote your name as Director of UFORA and whether or not I might include UFORA's address on your Phase One Report of the chemical analysis of the metal samples. As I sent this letter to UFORA's address at 214 S. Arch, as given on your covering letter, and have received no reply to date, I am wondering if you have received this letter?

In any case, would you please let me know if I may quote the above details by return mail, as I am now urgently in need of this information. Due to my being sick in January, the Winter '71 issue of TOPSIDE has been unavoidably delayed, but I am now working on it and hope to get it published within about 2 weeks, so I would greatly appreciate your early reply. Also please let me know if you received my letter of January 12th.

I trust that all goes well your end and that there have been no problems causing your delay in writing. I shall look forward with some relief to your reply and in the meantime, wish you a very interesting and productive New Year. Thanks again for all your wonderful help, and with kind regards.

Yours sincerely,

(Mrs.) Carol Halford-Watkins.
