

dollars to investigate alleged sightings. The fact that the report was of the opinion that, in brief, there was nothing to the stories and reports of UFO incidents, has immediately stirred criticism by a number of scientifically orientated groups who are, or appear to be, very well informed to the contrary.

I think that Canada should have a more tangible policy regarding UFO investigations. I think that the Government should table all information available, pro and con, about these phenomena.

I think that we should consider that our own little earth is now sending out it's own flying objects which, if life exists, is on other planets, and who are we to claim that it does not, would in their terms be unidentified flying objects to them.

In conclusion, Mr. Speaker, I find the following brief comments by some well informed people of interest:-

"The existence of these machines is evident and I have accepted them absolutely -- Air Chief Marshal Lord Dowding.

I believe extra-terrestrial intelligences are watching the Earth and have been visiting us for millenia in their flying saucers -- Dr. Hermann Oberth, rocket scientist.

I believe in UFOs -- Knut Hammarskjold -- Director general of Internal Air Transport Association.

The hypothesis that these (UFOs) are extraterrestrial surveillance..I regard as most likely -- Dr. James McDonald, physicist.

At first, without any question at all, I thought it (UFO belief) was stuff and nonsense. But not any more -- Dr. J. Allen Hynek, astrophysicist."
