

Note to File:

PROJECT MAGNET

The following is an extract from a letter to Mr. Conrad Hunter of Charleston, S.C., USA, from Dr. P.M. Millman, dated 24 September, 1968. This letter is in file "Correspondence A to L" (at N.R.C.)

"The flying saucer observatory operated by Mr. Wilbert Smith for a few years consisted of a small building loaned to him by the Defence Research Board. In this, he set up spare magnetometers and gravity meters in the hopes of finding simultaneous changes in the magnetic and gravity fields with the appearance of UFO sightings. As far as I know, there were no positive results, and I do not believe that any official report was issued prior to Mr. Smith's death. The project was a personal one carried out by Mr. Smith with the knowledge of his department, but without any official government sponsorship."
