Oct. 26/67

Dear Harry: *(McGeary)*

As promised, I'm sending you herewith a copy of the re-print we ran off of my article "The Mysterious Chunk of Hardware at Ottawa" which I hope you will find interesting.

So sorry you couldn't make it to Montreal with us Sunday, but quite understand your busy situation after a move. Here's wishing you and your wife a happy settling-in in your new home and the best of luck. We shall hope to meet your wife on some other occasion.

Latest development with the metal is that I received a phone call from Dr. Smith who examined the mass of metal on site and took samples for future tests and analyses. Apparently, they are at present working on a new experimental machine capable of performing an accurate analysis within an hour and are awaiting some special parts to complete the apparatus. As soon as it goes into operation, they will carry out tests, analysis, etc., and report to us on their findings, although he did say there may be some little delay in receiving the parts. However, it all sounds a step in the right direction and Dr. Smith seems highly interested in the metal.

We look forward to seeing you at the next Club meeting when no doubt we shall have something to report on our visit to the UFO group in Montreal.

With best wishes to you and your wife.

Sincerely,

Carol

(Halford-Watkins)
