Anaheim, Calif.

Dear Friend:

This is to announce the publication of several new items. George Adamski's "FLYING SAUCERS FAREWELL" was released on Sept. 7, 1961. "COSMIC PHILOSOPHY", by George Adamski, will be privately printed and available about Oct. 1, 1961. Only 1,000 copies are being printed so you'll have to hurry to get one.

A monthly newsletter is in preparation. It will not be saucer sightings and reports. It will continue where Mr. Adamski's last two books leave off. In addition to science and philosophy, it will have a Question and Answer section similar to the "Cosmic Science" books released by Mr. Adamski in 1958.

Subscription price is \$3.50 for twelve issues in the U.S.A., possessions, and Canada. (Foreign: \$10.00 via 1st class air mail.) It will be a non-profit publication supported by sales only. (Make checks & m.o. payable to C.A. Honey)

Suggestions as to subject matter of editorials are welcomed. All questions and communications submitted to this office become the property of C.A. Honey and no payment will be made.

George Adamski's mailing address is the same as above. He will be out of the country most of the time and all mail should be directed here. If you desire a reply please inclose a stamped unaddressed envelope. Specify questions submitted for publication. All names will be confidential unless otherwise stated.

On August 29th I received the following note from George Adamski:

"Cosmic Philosophy" has been written, as I have been instructed by the space-people, with a philosophical and scientific approach to the problems of man. It is non-religious and non-political and is explanatory of man's life on Earth. It deals with the primary causes to bring forth the effects one may desire.

"It is a course of self-enlightenment or a sort of personal bible. When properly applied it should benefit one whereby he would not need anything else to keep growing in the field of knowledge. True, greater depths of knowledge are still to come, however one cannot hope for the greater unless he has a firm foundation for it. This I hope to give with this book. I am sure the owner of this book will be more than repaid for the time spent in applying the knowledge within. George Adamski

A MESSAGE FROM GEORGE ADAMSKI

TO WHOM IT MAY CONCERN:

I, George Adamski, going into another field of service teaching Cosmic Philosophy and Abstract Science, have turned my previous work over to C.A. Honey. Mr. Honey will be my representative in the United States. Should I settle in some other part of the world, I will give him information from time-to-time so he can keep interested people posted on the events of the time.

I have been given a new assignment by the "brothers" and their approval of C.A. Honey taking over the first part of my work. This will give me the freedom necessary in these crucial days to be on the alert for any eventuality. I can work in close contact with Cosmic principles which I can then convey to those who desire such information for study. Many people may be needed in days to come to guide those who wish to fulfil their cosmic destiny.

I hope that all who desire to help this work along will cooperate to the best of their ability with Mr. Honey. I find him reliable and I'm sure you will too. You will always be able to contact me through him.

Sincerely,

George Adamski (signed)

I wish to thank Mr. Adamski for his kind words and hope that with the help of the "brothers" I can adequately fulfil this important liason post between this and sister worlds.

Sincerely,

C.A. Honey
