

BSRA NO. 18 - THE SECRET CITY IN THE VALLEY OF MYSTERY An English adventurer, Ted Illion, was invited to visit an underground Holy City in Tibet, with the expectation that he would join the Black brotherhood and give up his soul to the exalted ruler there, the Tashi Lama. He refused membership and fled for his life. Here is one true story as fantastic as the Shaver mystery, and more believable! The story is from his out-of-print book "Darkness Over Tibet". He found that the Brotherhood lived on human flesh; he witnessed a midnight Mass in a cavern temple where the blood of the Master was real, human blood! Here is the major reason why Communist China had to invade Tibet to destroy this subversive, ultra-right wing priesthood with cancer-like tentacles all over the civilized world. 49 pages, 8½x11 mimeo. . . \$2.25

BSRA NO. 19 - I DISCOVER THE IMMORTAL CELL By John Brown, with additional articles by Joe Dun Sloan, Hilary Dorey and Riley Hansard Crabb. This brochure contains Brown's own story of the development of the B-Cell catalyst, a new cell which precipitates minute crystals. These radiate vital energy in water, which in turn passes it on to living organisms, stimulating their growth. Cell-stimulated water seems to discourage insects from attacking plants in the garden. Mr. Brown passed on in 1958 but BSRA Foundation research continues on this fascinating, New Age development. Brown's assistant, Hilary Dorey continued producing the catalysts in Rhode Island until his death. Joe Dun Sloan makes and sells them here in Southern California. Prices and availability of the D-Cells can be had from Mr. Sloan. Names and addresses are in the brochure, well illustrated with Cell drawings. 25 Pp. \$1.75

BSRA NO. 21 - THE PSYCHEDELIC EXPERIENCE With accounts of personal experiences by Riley Hansard Crabb (Mescaline), Larry and Kathleen Chatterton (LSD 25), and Bernard Copley (Peyote), and with a summary of years of research by Dr. John W. Aiken, Socorro Clinic. Crabb found that to take the drug is self-surgery with the mind, opening up the user's whole interior world to his astonished gaze. Kathleen Chatterton's trip under LSD was a return to a former life in Egypt a long time ago. Copley took Peyote as a part of a Moon ritual with Navajos in New Mexico, and union with all life. 48 pages, 8½x11 mimeo. . . . \$1.75

BSRA NO. 22 - INNOCENT III, HIS LAST YEARS The Director's first serious attempt in the use of ESP was the writing of this 98-page biographical sketch of the last years of a great Pope of the early Middle Ages -- after his supposed death in 1216 A.D. It's an adventure story starting with the Pope's kidnapping in the gardens of the Vatican, the stormy voyage across the Atlantic and his self-imposed seclusion in a pagan temple on a Yucatan hilltop to the end of his days. Is it true? Who knows? During later experimental ESP writing we were told that Abraham Lincoln was a reincarnation of Innocent III! This revelation arouses interesting, even awe-inspiring speculation about the Law of Rhythm as it effects humans. Mimeo book, 8½x11. \$2.50
