MJL2

REF: TA Memo 3-20

TP-3 related both phases of OP-KIMI compromised by leak. Terminate phase I and re-direct energy to dis-info. FBE-2 can't be located at this time. P4 has placed him in safehouse somewhere near Edwards. I don't even know the exact location. No transfer will be approved until Phase I in MPPR. CAP-2 not ready to receive EBE-2. Don't even know if they have facilities available for holding. CLASS YY-II only available at Kirtland or Los Alamos. Must make decision before Jan 15. No other options open..

NORAD not cooperating with MJ4 on D-SITE studies. We may have to contact KERW-302 personnel and have them conduct study. NORAD still operating on old system. The big problem is only a few of NORAD's personnel are clear for SONG-DANFF info.

PETE-23 open class II. REPEAT BLOCK NOT USED. DON'T NEGLECT MAKING CHANGES TO BOTH BLOCKS. CODES EXPIRE ON 31 DEC.

Executive Briefing (Memo)

Yesterday R2 requested briefing on Project "A". In particular, he wanted updated info from EBE-2. MJ3 advised that that info was not available to R2. Apparently, White House requested info because of large volume of FOIA requests. Can't seem to make those fools realize EBE-2 info is not available for any dissemination, per EO 11652, regardless of who requests info. Contact T-28 and see if he can assume custody of the matter.

Don't allow AF to evaluate IDENT info. They may open up a little too much. KEND-3 can assist to some extent.

MJS.

REF: Memo 5-7A

The Texas incident will present a problem for us. Must determine more info in order to develop dis-info plan. Why do these things always happen when MJ12 is gone. Luck is never on our side. Let R-3 know something is up and that we will need their support to get through this one.

Don't make anymore phone calls on XY3 until the new code is changed. Too many of the wrong people might be listening. I don't trust (K-2). Could be leak there.

One more thing. EBE-2 has expressed a desire to visit ocean. I don't know what the hell to do on that one. If we don't let him, he'll just disappear. Can't allow that to happen again. MJO is working on that. TREAD open/or will be.
