

95 Centre Street,
Aylmer East, Quebec. Dec. 11/70

Dear Ronald:

Thank you so much for your recent letter plus the copy of the letter you addressed to the Editor of "Canadian UFO Report" which I was very pleased to have.

I am sorry about the delay in replying, but regret to tell you that Darrel recently suffered his 4th heart attack this year, which was very discouraging to both of us as he appeared to be making good progress for a while. However, he seems to be picking up a bit now and will be taking some days leave off in between the Christmas and New Year's holidays which will give him nearly 2 weeks at home and we hope that this will build him up a bit to face the winter which his doctor says may be a bit hard on his heart condition. As a result of all this and having to look after him over another recovery period, I have got all behind with my correspondence, Xmas cards, etc.

I am in agreement with you that Matthews' Quebec Bridge theory about the metal is a lot of nonsense and in the next issue of Topside which I hope to get out some time in January, I shall include my reactions to this in my Latest Report on the Mystery Metal and in support of this, I would like to print your own letter as you were closely involved in the so-called Tesla Bridge test carried out by Matthews. I would appreciate a few more remarks from you as regards this test. Was it you or someone else present who said they checked the volume control of the tape recorder during the test and it wasn't registering anything?

I would also like to know if you have received any reports of tests on the metal which you said some time ago you were arranging to have made by private individuals. If so, or you have any other information concerning the metal to add to my report, I would greatly appreciate it if you would kindly send this on to me by early January.

I was also very interested in your remarks about the Disappearing Stars and the logical explanation you offer. The trouble is that the powers-that-be do not wish this type of information to leak out. They are trying to play down the Life on Other Planets bit, but as we both know, one way or another, the truth has an odd habit of coming to light in spite of all the cover-ups.

You sound as if you have had a busy time with all the home improvements, but I am sure that when it is all finished, it will be very gratifying to you all.

We send our kindest regards to you and Enza and Robert and Suzanne and wish you all a very Merry Christmas and a Happy New Year.

I shall look forward to hearing from you again early in January, Ron.

All the Best
Sincerely,
