VALLEY CENTER, CALIFORNIA

Dear Mr. Bray:

I have just returned from spending several months in Mexico. Therefore, the delay in answering your letter of December 14th.

If you will read INSIDE THE SPACE SHIPS carefully you will find that the Master said the atmosphere on other planets would not vary more than from our sea level to our higher mountains. That Earth men could live on any planet. Remember, all planets were formed from the swirling "clouds" of space. We are all surrounded by that same space. Each planet creates its own atmosphere as it travels through that same space. Therefore, why should the atmospheres vary?

The space ships are patterned after planets. The visitors studied nature and patterned their craft after the huge space ships (or planets) that travel at tremendous speeds through space. Therefore, they create their own atmosphere within the ship and it extends outward from the ship for some distance, just as our atmosphere does. The only difference is, planets are held in their orbits by the pull of other planets, while their space craft are man controlled and move freely through space.

As for materializing and dematerializing, remember always the Brothers are normal human beings of flesh and blood. They are born, live and die just as we on Earth do. There is no mystery to their bodies, any more than there is to Earth man's. I believe a careful consideration of this statement will answer that question for you.

Glossy prints of the photographs reproduced in FLYING SAUCERS HAVE LANDED and INSIDE THE SPACE SHIPS, with the exceptions of those taken through the port holes, which are not available, sell for 50¢ each. These are hand printed from their original negatives.

With every kind wish to you.

Very sincerely,

GA:lm

GEORGE ADAMSKI

P.S. Please enclose postal coupon if reply is desired to future correspondence.
