

SEP 4 - 1956

Dear Mr. Bray: All the basic concepts re the nature of the aeroforms were given us by the Controls of the deep-trance medium Mark Probert in the fall of 1946. We have studied these and other communications from this source for about 10 years and have come to have much confidence in them. The communicators are simply highly intelligent excarnate humans who seem to inhabit various levels of the Astral, but who function primarily on the 'etheric' or earth level for purposes of communication. Various scholars and technicians have attended the meetings and regard them with respect, whether or not they are 'spiritualists'. And these ~~spiritualist~~ Controls have not receded an inch from their ~~spiritualist~~ earliest pronouncements. A mimeo book compiled

by me gives a summary in their own words. .. You can easily see why we do not make a point of these sources - on account of the dubious reputation of spiritsim and mediumship and the chance of getting involved in useless discussions, irrelevant issues etc. .. All this info. has been accessible to the public for nearly a decade. The book referred to, The Coming of the Guardians, is being reprinted (mimeo). I'll send you an inspection copy (reading copy) if you want one - no obligation to purchase (regular price \$3.00)

Cordially

Maeda Layne
