REVIEW: (Page 20.)

MEMORANDUM to the United Nations General Assembly -- By Major (Ret.) Colman S. VonKeviczky, Director, ICUFON, 35-40 75th St., Suite 4G, Jackson Heights, N.Y., 11372, USA, 100 pp, Illustrated, \$ 14.50 postpaid, \$ 18.50 foreign airmail.

This bound volume compiled and edited by Maj. C.S. VonKeviczky was produced to support Sir Eric M. Gairy's appeal to the UN to establish a UN Committee to investigate UFOs. It represents a herculean job of compiling material, tables, maps, photographs & drawings from international sources & analyse them regarding the factuality & gravity of UFOs vis-a-vis the planet Earth. VonKeviczky's MEMORANDUM supplies massive, irrefutable evidence of the following: 1) The appearance of UFOs all over our planet; 2) Military engagements between UFOs & Earth's military forces; 3) Official government & military documents delineating the seriousness & urgency of these matters; 4) UFO abductions of people & aircrafts; 5) The continuing UFO surveillance of secret military installations throughout the world; 6) Face-to-face confrontations between Spacemen & Earthmen; 7) The irrational UFO injuries to civilians (and sometime death) by unknown weapons. And there is much, much more.

The indefatigable VonKeviczky has put his many years of research & expertise into this block-buster of a publication. Here you will find documentation ranging from USAF & NASA coverups to Jimmy Cater's personal report (reproduced) of a UFO sighting. Also, VonKeviczky juxtaposes his chilling and factual material with the juvenile, totally ridiculous statements of other UFOlogists who continue to wonder wheather "UFO exist" or wheather mankind is being confronted with some "parallel reality".

In addition, VonKeviczky provides analytical data proving that our Earth has been and is being surveyed by military-type UFO sorties for some definite future event. He analyzes UFO formations, their maneuvers & trajectories. He proves, by official government documentation, that the UFO "Cosmic Watergate" has been in effect for more than 3 decades. He reproduces U.S. Air Force & Navy documents, UFO memoranda from the Joint Chiefs of Staff and the Dept. of Defense, as well as from the Condon Report & NASA.

In short, VonKeviczky's MEMORANDUM is a bombshell that blows mile-wide hole through the Iron Curtain of secrecy & stupidity that has prevented the people of Earth from knowing the dangerous & frightening reality (and urgency) surrounding the entire UFO problem.

VonKeviczky urges all heads of governments to stop their hostile actions against UFOs lest they provoke an Interplanetary Holocaust. He calls for a UN Committee, in support of Grenada's Prime Minister Gairy, to investigate UFOs on an international basis & pool information. He suggests that the UN establish a "safe zone" where UFOs may land & peacefully communicate with us. And he urges the establishment of a UN University to train future scientists & leaders in the Cosmic Age.

VonKeviczky's persistence, courage, & dedication are deserving of the highest possible praise. He is the only one of the truly leading internationally known UFOlogists to grasp the importance of the UFO research of Wilhelm Reich -- the only one who has consistently advocated the development & support of Reich's research; the only one who has publically advocated Wilhelm Reich's vital organomic work. And for this we are grateful, as we believe that Reich's New Knowledge offers mankind the only scientific methodology by which we might comprehend the puzzle & threat posed by UFOs. We urge you to obtain this MEMORANDUM. A MUST.
