Mr. Grant Cameron,
649 Silverstone Ave.,
Winnipeg, Manitoba,
R3T 2V8

Dear Grant:

Thanks for your latest, dated Feb 12 and Feb 19. All very interesting, and I appreciate it all.

I do not know if WBS had any contact with Adamski. His papers in my possession do not indicate this. You mentioned that you want to track down Good's book on Adamski. Again, I have a spare copy which I will let you have free, if you still have not found a copy. I am in the same position I was with Good's other book (which I trust has now reached you). I had bought a copy and then Good sent me a complimentary copy in appreciation of assistance provided. The only marking on the copy I can let you have is my name on the flyleaf. Let me know if you would like to have it.

I have enclosed copies of the letters between Smith and Wright which I hold. Also enclosed for you is the material I have on the Project Magnet of the U.S. Navy.

I would certainly like to see you in May if you come to Ottawa. I will, however, be away in the U.K. for almost the whole month. We will be leaving on the 6th and will not return until the 31st. If you are here before the 6th, I will look forward to a call from you.

I would appreciate a copy of Murl Smith's letter to you which you indicated you are expecting.

Schwartz, in his letter which you sent to me, asked about Brian Cannon. I, too, have often wondered what became of him as he seemed to disappear from the face of the earth. We used to correspond a lot many years ago. Any idea what became of him?

Sincerely,

Art

28 January, 1988

Mr Grant Cameron,
648 Silverstone Ave.,
Winnipeg, Manitoba,
R3T 2V8

Dear Grant:

Thank you for your letter of Jan 11th with the cheque for \$42.00 for the Good book. I will mail this to you as soon as I receive it.

Thanks also for the Knowles/Fitch/Smith letters. Very interesting indeed.

Re Robert Achzehner - never heard this name before that I can recall. Sorry I cannot help with this. Should I come across this name in my periodic reviews of Smith's material, I will let you know.

Yours sincerely,

A handwritten signature in dark ink, appearing to be 'Art' with a horizontal line underneath.

Oct 8, 67

Dear

Thank you very much for writing and for
supplying me the water with documents I said
you were going to give it.

- I had been told that a letter from Paul
Hight would go to the Supply office. I wait
for anticipation of your decision in this area.

- I've received a letter from Mr. Ames
that will be used with interest. It would seem
that someone or someone else will have been with the
you will not want to be at the 10th m. note
the word "must" see how there. If you have
any question you would like asked, I will be
happy to answer.

- I have seen Zimmerman's book list of
documents of documents I have seen, unfortunately
including parts of the 11-12 documents. There
was a record a completed case recorded by
Zimmerman (minor) where large sections have been
located and he also stated they had been released
under FOIA.

- According to Stangfield in a letter dated
Oct. 11, 1967, all is continuing this week, I guess
because it is too bad to see the 11-12 documents
released and also in flames.

- I think Zimmerman did a great job of
work in the morning he has a great book written
for your information, each nation of this planet
has been officially informed of the existence of the
Flying Saucer and of their occupants. No nation
may be responsible for whatever official position

they take. I hope you know how this can be done.
- I don't know the letter, I don't want to be sure?

The balance of the documents in the
list.

107

11. I have some evidence in the case
which would be in the list.

See Page 12-13 from Zimmerman book and
comment. Was there a correspondence between
Smith and

- ① Newton
- ② Scully
- ③ Harold Shuman

summary of Zimmerman
for the document
containing 11-12

March 15, 88

-2-

Dear Arthur,

A progress report and response to your last letter. I very much appreciate your sending the Wright letters. They are very enlightening. Unfortunately we would appreciate a copy of Boris's earlier book and am willing to pay for it.

Much is occurring almost daily. Firstly today is the day Dr. Walker was to have returned from North Carolina. My phone is to ring as soon as the primary interview is done. Nothing yet.

I have enclosed a picture of the Dr. with the President (Dr. Milton Eisenhower can be seen on the right edge) and an article I think he will come to signet writing. I spent hundreds of hours preparing for this interview and yet failed to come up with any direct links to WFO.

Did however run into all the names on the original MS-12 documents and it is apparent Walker knew all especially Brook and Bush.

I have enclosed a letter to Just Cause from Linda there which you might already have seen. I spent two hours on the phone with her and she became very interested in Wilbert's contacts with AFSA, especially with Mrs. Swan. She had shown the letter to one of her researchers who dismissed it outright (I read *Demagogue* on Todd Pechels article and his discussions with Pat Forsyth at the CIA) I have asked me my reaction to this. My response was simple. If Wilbert Smith took her seriously you better look again.

Mrs. Swan is of interest because she spoke of the "good ones"

on the "evil ones" earlier than anyone else.

This good vs evil thing is now a prime theme of discussion related to what she was shown, related to Bennewitz (see *Sturman* page 518 on), and related to what she has heard from sources (including Springfield) around the country.

She asked me what AFSA looked like. David & I didn't know but raised upon Betty Hill's letter (enclosed) it wasn't the small guy types.

Doesn't her everything I had related to her concern about Wilbert and his studies of the extraterrestrial work he had done on alleged messages. She as you can see from the U.S. bookeller list is about to publish a new book and wanted to consider Smith's involvement before publishing, hence.

As I have not yet heard from Mrs. Smith, and the fact Mrs. Smith was in the hospital she encouraged me to go see Mrs. Smith. I stated I was naturally concerned about Mrs. Smith's health but I did not want to bug Mrs. Smith as this was Wilbert's interest not hers. This has been pointed out to me by Much on two occasions. It places me somewhat between a rock and a hard place.

Further to my conversation with Linda there. She stated that Richard Betty has just written a two page letter to Just Cause denying he ever spoke to her or ever showed her anything. To Linda's amazement Veraton from Just Cause has also denied involvement. Phillip Klass is now arrested and leading an attack.

Linda is aware of our upcoming interview, although not the name, and she stated she hopes we can bring some light to the darkness. The world according to her has turned

upside down in the last ^{year} week. "I've got all the letters to 480," she stated. "How can they possibly deny it?!!"

She is very upset, and according to her as is Strongfield. Apparently M-1-R has lost control, and has a 20 or 30 month plan to get control back. Strongfield according to her never gets upset.

Then if you review the latest couple Masfon newsletters you will see a letter written by Boston stating Reswell was the crash of a Horton wing. Friedman while in Winnipeg stated this was insane, and so does Howe. Howe stated this illustrates what she means by the world being upside down. It hard to know what to believe. I encouraged her that in this regard Smith could be believed, and that what he said ~~who~~ would help keep some perspective.

On our discussion Hynik was discussed, and it appears he too will turn out to be a double. Howe added stories to what you will find in Sturman's book and in Cook's book. The upcoming article from the Centre for UFO Studies entitled "What did Hynik really know?" should be enlightening.

Enclosed you will find a letter to me by Duplantier dated 1978 (what has happened to him?) This I misplaced in a file and only found it some weeks back. Now read Sturman's book P. 587-581. Don't fall off your chair. I am naturally writing to Bennett immediately for details on this and other odd things he stated which are familiar.

Did we see the "Man Alive" show related to the accident in Toronto. An implant was found in his ear, and was removed. It is being analysed by V.C.T. and the entire thing including the operation are on video-tape. The results could be in any day now. This is being followed by Howe

as well and might be on his new book.

Received Cook's book and found it excellent. Have removed a couple pages which will be brought up in the upcoming interview. Got a letter from Good which I have enclosed. Another should be here any day.

Finally as to my trip. Things are up in the air and will depend on what Walker says. If he talks I have no choice. However a number of new problems have arisen. Where to spend my time. Had figured the Canadian bookies would have more of what I am looking for, but I have just found the records of the U.S. Research and Development Board. 927,000 pages!

Will let you know once the interview is done. Thanks again for the letters.

Best wishes

P.S. J. Tuzo Wilson was interviewed by Coe and he was not happy he was being questioned. Stated he knew Bush Berke etc. Claimed never to have discussed even with them. Claimed he was not interested in UFO or talking about them. Stated Willett had come to him to get something. He did not go to Willett. Wouldn't identify what Willett had come for.

P.S.S. The latest Fate magazine has an article written by former Clark related to the Serbochev affair. It appears he has copied Sturman account of your involvement. Have you seen this?

P.S.S. Common sense & people don't do it. The last year.

28 March, 1988

Mr. Grant Cameron,
649 Silverstone Ave.,
Winnipeg, Manitoba,
R3T 2V8

Dear Grant:

Thanks for your letters of March 15 and 19, and the enclosures.

Re the numbers on the bottom of the Wright material - I don't know what they represent. They certainly don't appear to fit the usual file numbering system. However, I note you have filed an Access to Information request on this. I will do what I can to assist when I hear further.

I am glad that Steinman's book has reached you OK, and I will send Good's book on Adamski to you - no charge.

I look forward to hearing about your interview with Walker.

Re Duplantier. he is still around, I guess. I last spoke with him at the MUFON conference in Toronto in 1982 when he was "alive and well".

Sorry to hear that Cannon is dead. Chris Rutkowski (IUR Nov/Dec '87 p.24) also reports Cannon's death. Speaking of Rutkowski, do you and he cooperate at all on UFOs?

Yes, I saw the Man Alive show re the abductee. Very good program. I look forward to hearing the results of the implant business.

No, I have not seen the FATE article by Clark but would appreciate a copy, if convenient.

Yours sincerely,

Arthur Bray

FEB 19, 1988

Dear Arthur,

Enclosed a letter for your files. It is a follow-up on a point made in Dr. Carloud's letter to me which I believe I sent to you.

Interesting that he should mention the U.S. Navy survey "Project Magnet." I worked very hard in the 70's to get something on this and got almost nothing. If you have anything I would appreciate hearing. I believe this subject was brought up at one time in the House of Commons.

Another point. Mr. Swenson mentions Mr. Millman again. On this connection I am still awaiting a response from Mr. Millman from months back. Included in my questions is a request for a comment on the Walker interview (with the name removed.) Perhaps he doesn't know what to say!

After hundreds of hours research on Eric Walker done by me, and after complete silence from Sturman on the subject, I have broken off on my own to obtain Walker's story. I have a couple hundred pages of articles, bios, etc on Walker and am working with the MUSEUM state director in Penn. to obtain Walker's story and hopefully the notes.

I have obtained enough information that I ~~think~~ think I know how Walker, Barlacher, Von Braun, Brook and Bush fit in. Hopefully this material passed to the MUSEUM director will be enough to convince Walker the ~~life~~ half-life of the secret is now very short.

Also the MUSEUM director is supposed to check the library and archives at Penn State where Walker was President

for more direct documentation and information. Things have gone very well in this context and I am very confident. By the way the State Director lives seven miles from Walker. Walker we believe is south for the winter so he has not answered his phone since Dec 29, 87.

I shall keep you informed.

Further to this. I will probably be in Ottawa and Washington in May, and will be staying at Carlton. This is not certain yet as it depends on what further material I obtain and what Walker says.

Got a letter from Mrs. Smith in response to my letter of NOV. 87. She has had a bout in the hospital following her return from Christmas in Ottawa. She did state she will deal with my letter. My letter basically lays out all the stories and rumors surrounding Walker's work and contacts. Asked her to outline what can be believed and what shouldn't.

Best wishes

Grant Cameron

Dear Arthur,

Many thanks for your letter, and valuable comments. Don't worry about costs. You have helped me in many ways, especially putting me on to the Sarbacher material.

Will send a more complete letter in a couple days. I have a lot more material. Looks like the MS-12 documents are in some trouble. Lots of confusion. I have some related documents only a couple weeks old. I am still waiting for Stanton to comment in the press, or in response to my letter of a month ago.

You probably know Steinman has a book coming out in the next couple weeks. "VFO Crash at Byztec, A Well Kept Secret." This is my main concern the MS-12 stuff has basically Stanton, Friedmans and Moore reputations backing them up. They however do not mention a 48-49 crash at Byztec as Steinman is claiming. Steinman has some good evidence (also involving Bush and Empton). I have a CIA letter one month old warning of disinformation. It is all very confusing.

I am at present putting together a request for documents thro' DOD. This is a letter ~~letter~~ written to Peter Millman. It is probably 50 pages with documents. This way if Millman doesn't answer my questions I have some right to appeal. Will send a copy to you later.

Could you do me a favor. I had intended to come to Ottawa to go to the Archives. Have enclosed a document outlining MacKenzie's friendship with Vannevar Bush. MacKenzie as head of the National Research Council would have seen the Smith memo. My question is "What was his reaction?" "Did he contact Bush?"

Seeing you are in Ottawa you might check on his diary at the Archives (there are 34 volumes hopefully with an index) The period would naturally be Sept 15, 1950 to Nov. 21, 1950 and a bit beyond. As you can see from my enclosure MacKenzie recognized Bush as the most powerful scientist in the U.S. Therefore seeing Bush's name in the Smith memo - he must have taken the information very seriously.

Question. Who is John H. Thompson? His name appears at the bottom of one of the pages of the minutes to Project Second Steady. He is also mentioned as one of Smith's Associates with Wilson,

Walt and Carl. I sent a letter to P.O.T. requesting a biography on him, but they said they couldn't find him as there are 150 civil servants with the same name.

Walt Ladue told me a story Willbert told him about a communications expert disappearing. Are you familiar with this story?

Do you have much on J.T. Wilson, James West, and G. Carl? They all became highly successful but I have nothing on what they did for Willbert. J.T. Wilson was a colleague of Dr. Lloyd Barker.

The discussion notes 8/5/85 are from Robert Bletchman, attorney at law, member of Citizens Against UFO Secrecy. I now have a copy of Steinman's interview by phone with Sarbacher - will send this too.

Any idea where the rest of the material is that Willbert gathered for the Smith 100.21 memo. In all the Sarbacher material I have seen Sarbacher does not mention Bush as the head, or a "small group," or the "mental phenomena." As for things there is still a piece missing.

Do you have Mrs. Swans address? I think we will have someone in the U.S. filing for documents on this and maybe Willbert Smith material as well.

When all talked to Mrs. Swann, Mr. Buchanan did and he has agreed to talk to me. I'm just waiting for date. The Swann material has suddenly become important, as it fits the pattern given to me by Mr. Graham for Project SIGMA.

All for now. Will try to put together some of the better documents I have gotten in the last couple weeks.

February 7, 1977.

Mr. Grant Cameron,
445 Hudson Street,
Winnipeg, Manitoba,
R3T 0R1.

Dear Mr. Cameron:

Thank you for your interesting letter of January 28th. I will reply point by point.

First, I never met Wilbert Smith. I moved to Ottawa after he died. I do, however, know his widow. I would be interested in learning the names of the DOT people in Winnipeg who worked with Smith, if you are free to give me that information.

I am specially interested in obtaining information on the Suffield Experimental Station. I have been trying for a couple of years to get something factual on this, without success. I am now engaged in writing another book on UFOs and was hoping to deal with this matter. If you can give me anything factual, or lead me to sources, I will be grateful to you.

You mention having pulled a lot of material from the government records. Was this in Winnipeg? What departments? If you can provide me with copies of anything of particular interest, I will pay you for copying and mailing.

It will be interesting to see if DOT releases anything to Mr. Murta. I will be interested in hearing the outcome of this.

If you do not already have a copy, I will be happy to provide you with a copy of Smith's Project Magnet Report.

Mr. Smith died in December, 1962 from cancer. I suggest to you that there is no point in your trying to contact Mrs. Smith. She prefers not to have people getting in touch with her concerning her late husband's work in this field.

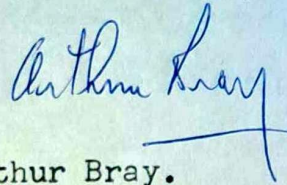

You mention the "outline" of Smith's book "The New Science.". I am not sure what you mean by the outline, but the book was published in 1964 and I do not know whether copies are still available or not.

The Mr. Buchanan you are looking for is Mr. J.W. Buchanan, of 5 Potter Crescent, Saskatoon. He is a friend of mine.

There is no question in my mind about Smith having been very serious about his UFO work. He was absolutely dedicated to it and was Canada's leading authority on the subject. If your DOT contacts in Winnipeg are uncertain of this, then I have doubts about how well they knew Smith, and how much they really know. Too many people express opinions of Smith not based on facts.

Let me know if you want the Magnet report. Anything you can send me will be greatly appreciated, believe me.

Yours sincerely,

A handwritten signature in blue ink that reads "Arthur Bray". The signature is written in a cursive style with a long horizontal stroke at the end.

Arthur Bray.

ref. Bray Feb. 9

(with questions)

- ✓ - can not give D.O.T. names at this time
- ✓ - Suffolk Experimental - pressure gov't.
- inquiries out
- ✓ - what's the book about.
- ✓ - government records explain. - if you don't have easy access to this material I will send it
- informed that D.O.T. will not release anything - more pressure
- would like a copy of project Magnet Report
- why will Mrs. Smith not talk? What about James Richard Norma Penn
- Did you get any of the private papers
- "The New Science" who published it - who took the manuscript to the publisher
- reference to Smith's dedication "he was absolutely dedicated to it and was Canada's leading authority on the subject"

Did Smith handle Classified Material.

Confusion between project Magnet and the work being done at Shirley Bay.

✓ names in Ottawa

- just find out what happened.
- don't tell them about the gov't investigation - my sources backed off when they heard
- how many people have you talked to who know Smith
- Committee (unique angle) no where are names released who are they ref 1967 statement
- Could you outline what Smith was involved with
- Equal copywrite to all statements that they make

ARTHUR BRAY

October 15, 1984.

Mr. Grant Cameron,
1413 - 77 University Crescent,
Winnipeg, Manitoba,
R3T 3N8.

Dear Grant:

Thanks for your most recent letter of August 17th. Of the files you provided the numbers for, I have managed to examine DBRS 3800-10-1. I have confirmed that none of the others are held by the Public Archives, although they did not tell me they have been destroyed. You say they have been. This is quite possible.

You say that "Smith's" name comes up quite a few times on these documents." By "these documents", I assume you mean the one file available, which I saw. Have you seen this one file? Anyway, although I found a considerable amount of interesting info in it, I did not find anything really new, or anything that shed new light on what is already known. The file is titled Target Detection-Search-Flying Saucers-General. Vol. I, covers the period 1950 to 1967, and was originally Secret. It makes reference to a Vol. II for further correspondence, but this has apparently not yet been transferred to the Public Archives, so must still be held by DRB.

The file contains info on green fireballs, some CIA reports, minutes of a few Project Second Storey meetings, including the sixth, dated February 22, 1954, which is the meeting I refer to on page 70 of my book. There are also copies of some documents on the Michalak case, transfer of UFO investigative responsibility from DND to NRC, and other things, including a number of sighting reports.

Again, I say that there is really nothing there that I did not already know, so it was not enlightening to me in any way.

Also, your remark about Smith's name coming up frequently is nothing to get excited about. This is to be expected as he was the key figure in all this business. I would be surprised if his name didn't come up.

All RCMP reports have been removed from this file, as well as a cabinet decision on Government Policy on Satellites.

Who is the fellow C.W. Fitch whose writings I read and what is "the 52 piece" to which you refer?

I look forward to hearing further from you.

Yours sincerely,

A handwritten signature in dark ink, appearing to be 'Art' or 'Arthur', with a stylized flourish at the end.

Arthur Bray.

1187 Agincourt Road,

February 15, 1977.

Mr. Grant Cameron,
445 Hudson Street,
Winnipeg, Manitoba,
R3T 0R1.

Dear Mr. Cameron:

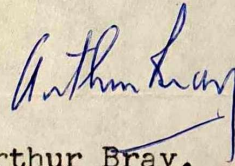

Thank you for your letter of February 9th. I am sorry, but the questions you ask would take too much time to answer in any adequate way without simply raising many more, ad infinitum.

I am dealing extensively with much of this situation in my next book and the only way your questions could be covered properly would be to send you that portion of the manuscript which covers it. I, of course, can't do that, so you will have to wait until the book is published. Sorry about that.

Much material by and about Smith has already been published in "The Boys from Topside" published by Saucerian Books in Clarksburg, W. VA. I suggest you obtain a copy, if still in print.

I identified the Shirley Bay program as Project Magnet in my first book (p.45). I am surprised you were unaware of that.

Yours sincerely,

Arthur Bray.

GRANT CAMERON
649 SILVERSTONE AVE.
WINNIPEG, MANITOBA
R3T 2U8. 269-6104
Sept 28, 87

Dear Arthur,

Well thanks again for your help in locating documentation. You couldn't happen to have the original Keyhoe article, or Smith correspondence to Keyhoe. I have written to Richard Hall to check Keyhoe's letters and actions during this period. This because according to this ^{story} Keyhoe was in contact with Bush, yet Bush's name never appears in his writings. Maybe I am wrong.

Related to this some good news. I filed a request (Access to Information) with Dep't of External Affairs for all documents related to this Canadian Embassy affair. A phone call from Ottawa and letter today state the archives has some "relevant documents." I was asked however to refine the request. Will keep you informed.

Some more good news. I filed a request with the RCMP for sightings from 1947-1968, and for the Suffield documents (Mrs. Smith told me in 78 Smith and AFP and RCMP were involved). Did you hear this story? Anyway this week I will be reviewing 1600 pages. RCMP has shipped them here. Don't know what is in them yet.

Now bad news. Buchanan has stated he wants nothing to do with further research. He repeated the gov't line that Magnet was part-time project, we came up with little, and that I'm beating a dead horse. Big change from correspondence over a couple months back. Bridge warned me he had changed. This must be what he meant.

More bad news. Had an 8 1/2 hr. interview with Bridge. He like Buchanan doesn't seem to

- 2 -

know much. Two stories he told couldn't possibly have happened as he told them.

He did however state that he and Buchanan and the others did not join Willcutt till 1956-1957. Nothing of an official basis was happening then, and because the material (with the Embassy etc) was classified, Willcutt would have no reason to tell them.

Did however get some details on the anti-gravity experiment.

More bad news. The M-12 documents are in very serious trouble. Barry Greenwood has put out a 17 page last cause newsletter that is an unbelievable attack on the documents. Agree with most of his points. Things are breaking so fast I will send this if there are no major counter from Friedman-Moore. There is a lot of material around.

One interesting point. Apparently, according to Greenwood the Friedman-Moore team has ① Carter briefing papers ② Photos ③ a video tape that is supposed to be much more dramatic than the M-12 documents. Unfortunately Greenwood believes this is coming from the same source. A DSI agent involved in former hoaxes.

All this M-12 controversy doesn't change Steinhilber's interview with Walker, which was obtained by following the Smith channel. A M-12 ~~also~~ seemed to exist but these documents look like attempts to cloud the issue. Did I read you the CIA response to M-12 where they quote an article on disinformation being used by the CIA and USAF to protect new weapon developments? This stated disinformation is never fully false. Disinformation that is 1/2 1/2 is worse, as you don't know which half to believe.

My last question to Steerman was - "Of a crash and recovery occurred at Axtel in 1948, why would that not appear in those 1954 briefing papers." One or the other is a mistake. Steerman has eye witnesses. Moore/Friedman have a roll of film sent to them in the mail.

As to FOIA requests. Many have been made on the documents. The usual responses are 'No such documents found. No such project etc. The Eisenhower and Truman libraries have also made negative statements.

Project Sigma - enclosure - part of the Project Aquarius material put out by Moore. Also under serious attack now by Greenwood. You will see how this fits in with

- ① AFEA supposed to land at Suffield A54
- ② Mrs Swan - AFEA in A59 "Psychic Incident" with US Navy Intelligence

This is why the Swan thing interested me so much. Buchanan went to see Mrs. Swan a number of times with Willmet. He absolutely refuses to discuss it. Bridge only went to see Mrs Swan once (his story) but every time I tried to obtain some information, he changed the subject.

The whole AFEA deal is something which drives me nuts. "The New Science" is based on this contact information. I have the whole CIA story, but the Canadians are guarding this with their lives. I tried to get access to Buchanan and Bridge how bad the silence looks, especially when you look at the statements made by Phillip Klads on the subject.

Bridge maintains as far as he knows there

were only two contacts. Direction for the anti-gravity experiment came from the same source according to Bridge and yet everyone covers for the source. This doesn't even touch TALA, a how many contactees there were, or how they checked the information.

Yet I recall Mrs. Smith talked very openly of AFEA, and I phoned a technician who worked at the ionospheric station at Shirley Bay in New Brunswick a few days back. He maintains talk of AFEA was frequent as well.

I don't know if Pashed you before. What type of concern did Willmet have?

One last item. Have made many requests for the Project name on the Top Secret Suffield Landing Area. One request was thro' MP Lloyd Arwenity. He claims to have made a couple requests in defense but came up with nothing (whatever that means). The Project name, I suppose, he wrote, will remain a mystery. Very comforting. I was beginning to believe there was no Canadian cover-up and maybe they really didn't know anything. Nothing like a challenge.

W.H.T.

P.S. After reading Smith's letter for the 20th time noticed "full cooperation is being given by DRB and National Research Council." This backs idea MacKenzie saw the new 21 memo.

Do you have the original Jan 6, 51 Canadian Embassy letter or a copy? If you have the original I don't imagine D.O.T. would have a record of this correspondence.

Nov 20, 87

Steve Cutler,

Many thanks for your letter, comments and the documents. I really appreciate your help.

I am sure there will be many comments such as yours regarding Steinman's book. I questioned Steinman on a couple items

- his statements about Smith, AVCO, and the connection to the crashed saucer technology. Pushed him what he had to tie Smith into this. He stated he had no documentation "It just stands to reason that he opened up the way for the basics behind the project..."

- I questioned the two different versions (censored and uncensored) of the Bolling Air Force Base Document. I also had both copies which makes them questionable. Steinman stated he had the first (page 304) and Wendell Stevens provided the second. (page 625) He knew this but still used them. Also he claims the document is real and is trying to contact Captain Grace referred to in the document. He stated he almost got this a couple weeks back.

I naturally told him the Smith memo used by him ^{in the book} could not have come from Smith's files. It had the 1969 downclassification marking in the top right. He did not comment on this.

On this regard I have sent a letter from Willman. You will see this 1969 movement from Top Secret to Confidential occurred by accident. Willman had never seen the Smith memo therefore could not have reviewed the

file before ordering it downclassified at least to confidential.

- I questioned his date for the Roswell crash as opposed to the one found in the MS-12 stuff. Steinman said his date was a slip-up - written without checking his file ??

Points of Interest

- Steinman made contact by phone with Richard C. Doty after being stuck with these MS-12 documents in his book. Doty would not admit he was the same Doty referred to by Jack Cause.

- After a couple letters from Stringfield I read in both letters the statement Moore might be a double. He had not yet defended the documents. Friedman dies here in 1 1/2 months, so will know more then.

- Gary Kinder in "Eight Years" has the Smith memo coming from the CIA files.

- Stringfield has two new sources claiming there is an uncut NTS-4 film shot by Borman on Apollo 8 showing 5 UFOs landing on the moon.

Bejean world.

^{above}
If you get your copy of Top Secret, please let me know if there's any Canadian / Smith stuff. Where can one order this?

Best Wishes
J

Dear Grant:

I had not heard from you for several months so thought I had better check to see if I owed you a letter, and such is the case. I never replied to yours of May 31. I apologize for that. Seems I had inadvertently filed it before replying.

We did have a very good trip to the UK. It was excellent, in fact. The best holiday we have ever had.

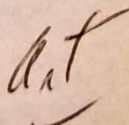

I am not too surprised that you had not heard from Mrs. Smith. I think she is tiring of the whole UFO business. So many people have contacted her over so many years, I can understand it if she is getting tired of it all.

How is the Walker affair progressing? You felt that some one would contact me on this, but no one has. I can understand your view with respect to contacting Friedman. He can be difficult at times. Also, I sympathize with you concerning the fact that Clark would not respect your confidence. This does not surprise me either. I have my own views about him. He certainly opened his mouth too fast in his Special Bulletin from CUFOS last spring about the Gulf Breeze case, and he wrote another big editorial in the IUR, after saying that CUFOS had already said the very last word on the matter and they would have nothing further to say on the matter. He sure put his foot in his mouth that time.

Your info concerning the interest of USA Today is sure interesting. I look forward to hearing more.

I will be pleased to receive any further info you care to pass along. I hope, by now, that you know you can trust me to keep your info confidential.

Sincerely,

ARTHUR BRAY

29 October, 1988

Mr. Grant Cameron,
649 Silverstone Ave.,
Winnipeg, Manitoba,
R3T 2V8

Dear Grant:

Thanks for your letters of September 26 and 28. Very interesting info that you sent to me. That letter from Walker is super. Sure keeps things on the front burner.

I thought the two-hour TV special was quite well done, didn't you? Some real interesting stuff. I hope it makes a lot more people think.

You asked about Topside. Yes, I do possess a full set of this publication. The first issue was in March 1960 and the last was in 1971. Is there something I can do to help you in this regard? I do not recommend contacting Carol Halford-Watkins even if anyone has her address (I may even have it myself) because I know she is not well at all, if she is still alive. I have not heard from her for several years.

Sincerely,

ARTHUR BRAY

3 January, 1989

Mr. Grant Cameron,
649 Silverstone Ave.,
Winnipeg, Manitoba,
R3T 2V8

Dear Grant:

Thank you for your letters of December 19 and 28. I hope you had a pleasant Christmas and I also wish you the best for '89.

I certainly look forward to Stringfield's article on underground bases. He is a very competent researcher.

Concerning who would represent Canada in talks with the Joint Chiefs of Staff - this is difficult to say. Could have been anyone from the head of the Canadian Joint Staff in Washington to the Minister of National Defence.

Concerning Columbo's book "Mysterious Canada", I have a copy, but am not too impressed. I provided Columbo with a lot of UFO material, but I am not too impressed with the way he has handled all of it. There are also some serious errors. One is his photo of "the world's first flying saucer sighting station" on page 229. He has the wrong photo! The one in my book is the correct one, and I can prove it.

Also, WBS got his leads from Mrs Swan in Maine, not New Orleans.

I have not heard about this group at Sandia Labs before. I talked to Jim Smith this evening and he no longer has his sales list of "The New Science". He chucked this out a couple of years ago. He did say, however, that he sold many copies to people in that area of the USA.

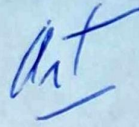

I have no record of an Alex Pazarro or similar name in connection with WBS.

Concerning Bill Moore, I am certain he was not a colonel. His bio certainly does not show any military service. His background is in teaching (public school) and as a labour relations consultant. Besides, he is too young to have got that far in the military in a short time, even if he was in it. I know that Moore's bio could be false, of course, but I have met him and he seems far too young.

For your info, I am attempting to arrange for all my UFO literature, including Wilbert's, to be accepted by a

university library when I pass on. If I succeed at this, I will bequeath all this material in my will. Certain other Canadian researchers are also interested in doing this, so that our material will be preserved for future researchers, in one location. You may be interested in doing the same. If so, please let me know. Murl Smith is very happy about this arrangement.

Yours sincerely,

27 June, 1989

Mr. Grant R. Cameron,
649 Silverstone Ave.,
Winnipeg, Manitoba,
R3T 2U8

Dear Grant:

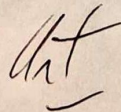

As I have not heard from you for many months, I thought I had better check my file to see if I owed you a letter. Seems that I do, although I see that your last letter of Jan 9th did not require any specific answers. I guess that is why I filed it at the time.

Anyway, I thought I should now drop you a line just to keep in touch and to see what is new with you. There is nothing new to report here. How have your contacts with Walker been going? Also, how is progress on the big news release that you and Crane have been working on? I will certainly be interested in seeing a copy when you get it all completed.

You said in your last that you would forward a copy of an interview with Bob Pratt. Will also appreciate receiving this, if your offer still holds. Did you manage to obtain any material from the Frank Scully collection at the U. of Wyoming?

I hope all is well with you and hope to hear from you soon.

Sincerely,

ARTHUR BRAY

30 July, 1989

Mr. Grant R. Cameron,
649 Silverstone Ave.,
Winnipeg, Manitoba,
R3T 2U8

Dear Grant:

Thank you for your letter of June 30th. It was nice to hear from you again.

The letters from Bob Pratt to Robert Todd were very interesting.

Interesting how Doty's stories seem to change, depending on whom he is talking to. The two books coming out this fall should make interesting reading, whether true or not. I wonder who the Seattle guy is, if he exists.

You certainly seem to be having problems in getting your paper out. I wish you lots of luck on early publication. Please let me know how I can obtain a copy when it comes out. I look forward with much expectation to reading it.

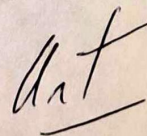

You are right. The whole MJ-12 business gets more complex all the time. I wonder if it will ever get properly sorted out.

Am anxious to see the material from C. Allen in U.K. who has been attacking Smith. Should be very interesting. You said you will send this along with your next letter.

You didn't mention whether you were able to obtain any material from the Frank Scully collection. ??

Nothing new here, although you may be interested in knowing that I have recently had another book published. It is titled Financial Planning for Early Retirement and was published by CCH Canadian Limited.

Sincerely,

ARTHUR BRAY

4 October, 1989

Mr. Grant Cameron,
649 Silverstone Ave.,
Winnipeg, Manitoba,
R3T 2U8

Dear Grant:

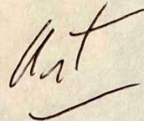

Thank you for yours of September 20. Good to hear from you. I mailed your letter to Walker, as requested.

It sounds like you are keeping very busy with all the matters you are involved with at present. Unfortunately, I did not see the two TV programs you mentioned. Wish I had.

I trust your meetings with Bridge were profitable. I recall him as a very straight fellow. I liked him. It has been many years since we saw each other.

Nothing new to report from this end. Keep up the good work.

Sincerely,

A handwritten signature in dark ink, appearing to be 'Art' with a stylized flourish underneath.

Arthur Bray
1187 Agincourt Road
Ottawa, Ont. K2C2H8

Dear Arthur,

I have written to you related to two letters that I have received from Mr. Robert Todd. I have enclosed both for your review.

It appears to me that Mr. Todd is about to take a run at the Smith story. To that end I have enclosed a copy of Mr. Todd publication called The Spot Report which will give you an idea of what his final conclusions will look like.

It has been many years since I worked on the Smith story, and I asked Todd following his first letter to contact you, as I am sure your records as to how the Smith memo first became public would be accurate. I hope that you can provide me any correspondence Mr. Todd has with you, so I can prepare for his final paper, rather than being hit with a new distortion of the story that will take me years to reverse.

As you can see from Todd's March 4, 97 letter Todd states the memo " may be a result of some misunderstanding." I can guarantee based on Todd's overall opinion of the UFO situation that this will be the kindest thing that he will have to say.

I asked Mr. Todd to provide me with any correspondence that he produced on the investigation, and as you can see from his reply nothing was mentioned along this line. It appears that I (as well as yourself) will be kept on a need to know basis.

Perhaps once I have heard from you as to what Todd has requested from you, we can talk again about the situation.

For your interest I have also provided you, as copy of two parts of a paper that I have written on Mr. James Oberg's twisting of the Kecksburg crash story. This was published on the internet, and Mr. Oberg has refused comment.

Hope all is well with you.

Grant Cameron

March 10, 97

sible hostility of men from space which frightens people. Remove the ignorance about this and the fear will disappear immediately. It is a fact that we only fear that which we do not understand. It is highly possible that it is only our own fear which is preventing our space friends from making public contact with us. Many people who could get near enough to a spaceship would take potshots with the first gun they could get their hands on. This has occurred according to a Canadian newspaper.³ It is foolish to try to figure out the reasons for UFOs behaving the way they do and failing to do so, to reject the whole business. The reasons for their actions have absolutely no bearing on whether or not they exist. Who are we to try to rationalize the actions of a civilization that may be as far ahead of us as we ourselves are from the very earliest type of Old Stone Age Man? As an example, what is our attitude to a tribe of savages we may come upon while exploring in the jungles of Brazil? We would approach with extreme caution, and when eventually we are certain that we can make contact without a spear in our chests, we would try to be friendly and work out a way of communicating with each other. Eventually we would try to civilize them. We are not in the habit of being hostile to such peoples, shooting them as soon as we see them. So why should we automatically expect that a visiting race of space travellers is bound to be hostile to us? My point is simply that we really have no reason to fear space visitors as it does not follow that they would necessarily be hostile towards us. There has been no evidence that they are.

Why is there reluctance to admit all the facts about UFOs? Perhaps it is because there is fear of making contact with such a highly evolved race because we might then be able to learn their methods of propulsion and other highly advanced scientific and technological matters which could suddenly upset our entire world economy. Consider what could happen if suddenly all electrical power, petroleum products, coal, gas, etc. were no longer needed. The elimination of the need for these products could ruin the transportation business, for example, by obviating the need for the thousands of tankers on sea and land which carry petroleum products and coal. Many billions of dollars are

Dr. Carl Sagan in 1967
and the UFO"

invested in electric power installations and transmission systems. The economy could be dealt a severe blow if suddenly the free power of the universe (not atomic or nuclear, but gravitational or electromagnetic) was made available to all.

This would be a calamity, it is true, as we are all primarily concerned with our wallets. However, this would only occur if the situation gets out of control by lack of knowledge on the part of everyone. So again it is a question of education for the public at large, so that when such secrets are learned we will be able to effect an orderly transition which would not upset the economy, but would in fact assist it in the long run.

A situation such as the foregoing could be the direct result of fear.

If the truth about UFOs is really known but is being hidden, a mistake is being made which could be extremely costly at some future date. The remedy is to tell us the facts, and to do it in a sensible way.

It is public knowledge that the Canadian Government (Department of Transport) conducted UFO research under the direction of the late Mr. Wilbert B. Smith, at an ionospheric research station at Shirley Bay, near Ottawa, a number of years ago but abandoned this investigation (Project Magnet) not long after for reasons unknown to this writer. Mr. Smith was Canada's (perhaps the world's) best-known UFO researcher and he wrote many articles on the results of his private research which he continued on his own time after the termination of Project Magnet. The results of this investigation have never been made public.⁴

An interesting piece of hardware manufactured by Mr. Smith and his associates is the binding meter. Areas of reduced binding were discovered in our atmosphere; that is, areas where the binding forces which hold all molecular structure together, is reduced far below what it should be under normal conditions. This condition results in material structures which are insufficiently strong, falling apart, or disintegrating, when they pass through such an area. It is believed that many airplane crashes

in recent years resulted from the craft flying into areas of reduced binding, where they immediately fell apart in the air.

These areas seemed to be roughly circular and about one thousand feet in diameter. In some cases these were located from the air, and in these cases fortunately, the aircraft from which the tests were conducted were sufficiently strong that they were able to remain intact.

Obviously, here is a field which bears further investigation by science. Unfortunately, efforts to obtain official recognition of these areas, and the instrument for detecting them, have met only with more letters being added to the "crank file".

Mr. Smith and his colleagues conducted much research into the science and technology of UFOs. Research is still being conducted by Mr. Smith's colleagues along the lines initiated by Mr. Smith.

In the U.S.A., a considerable sum has been expended by the U.S. Air Force in the investigations which have been underway since 1947, and are still in progress. About every year or two the U.S.A.F. issues a press release summarizing the results of their investigations which invariably tend to indicate that UFOs are all sorts of things, in fact everything except spaceships.

Flying Saucers and the U.S. Air Force,⁵ written by a serving U.S.A.F. Officer, is a very interesting book particularly in the explanations given for many sightings. It is difficult to accept the explanations offered. It is usually a case of stating that certain conditions pre-existed and certain occurrences took place, of a perfectly natural type, and then the conclusion is reached that one was no doubt the cause of the other. This is unsound reasoning. The fact that the sighting could also have been a spaceship is omitted. The many letters from citizens to the Air Force, printed in the book, certainly appear to have been carefully selected, and the comments concerning them are evidently designed to belittle the whole business.

I noticed a rather odd statement, as a matter of interest, on page 73, in the chapter where the author of the book is trying to show how easily people can be fooled:

With regard to color perception at night, blue and green lights are seen most easily; red and orange are seen least easily.

There is much room for an error in judgment in seeing unidentified flying objects. This is normal and can happen to anyone.

Why is it then, that navigation lights on aircraft are red and green? Shouldn't they be blue and green?

The same book claims that the only experts in the field of UFOs are visual astronomers, astrophysicists, and their associates. I have already dealt with this subject in Chapter I, so further comment is unnecessary.

One of the many groups doing its utmost to convince the U.S. Government that all the facts should be made public, in the public interest, is the National Investigations Committee on Aerial Phenomena (NICAP) with its headquarters in Washington, D.C. The director of this organization, Major Donald Keyhoe, U.S. Marine Corps, Ret'd., has appeared on hundreds of radio and television programs to publicly challenge the Air Force to give out all the facts. It appeared to viewers that the sound was cut off on one occasion when he started to say something that the Air Force had not agreed to him saying.⁶ Answers to some questions appear to have been avoided by the Air Force. A frequent reason given for refraining to release information, it has been claimed by many, is that it is classified. But why should it be? It is clear that UFOs are not a threat to security, so why keep the security wraps on so much of the information? Security is justified only while there is a possibility that a threat to security is involved. When it is determined that no threat is involved, full details should be released. Weather balloons and planets moving at tremendous apparent speeds and suddenly reversing direction simply cannot be imagined.

The question of whether the press is involved in keeping facts from the public is a good one. Frequently, sighting reports are not carried by the press at all, and also, very often, when they are, they are slanted to the ridiculous, perhaps ever so slightly, but just enough to make readers laugh it all off. Also, many times, even if fantastic occurrences do get into the press, and perhaps make headlines in the local paper, it is not appar-

ARTHUR BRAY
1187 AGINCOURT ROAD
OTTAWA, ONT. K2C 2H8
CANADA
(613) 225-2099

November 9, 1987.

Mr. Grant Cameron,
649 Silverstone Avenue,
Winnipeg, Manitoba,
R3T 2V8.

Dear Grant:

Thank you for your letters of October 8th and 12th and enclosed documents. Sorry for delay in responding but I have been away on vacation.

Re Paul Hellyer. He was my contact and I had corresponded with him for years. I got a further letter from him (same date as yours) saying same thing. Am afraid this is essentially a dead issue now, unless some new lead comes up.

I also now have Steinman's book, but not finished it yet. I am very disappointed at the way he has manufactured the story about myself on page 307. He has written this like a novel, and added all sorts of fictional statements. As this is so in my case, I wonder how much he has fantasized about all the rest of his facts. I am disappointed in this book to say the least. He provides very few references to support his claims. I am afraid this is not a scholarly publication at all. He may be accurate on most of what he says but it cannot be verified by his readers. An example is his quote from Smith on page 2. What is his source? I don't know.

Sorry, but I did not record the date of Bush's visit to Ottawa. It didn't seem to be important as there was no recorded connection with UFOs. Also, I do not have the clipping referred to by Wait, and no indication of contact by Smith with Newton, Scully or Sherman.

RE your question about follow-up with McNamara and how he knew Second Storey had rejected Smith's report, I did not pursue this matter.

I cannot elaborate on the Prime Minister sitting on the Project Magnet report for three months. I simply have it on reliable authority, verbally.

A copy of the "missing" Second Storey minutes with transmittal slip is enclosed.

Sincerely,

Arthur Bray.

P.S. Have now received your letter of November 5th re Steinman's quote from Smith. You are right -- it is from a letter to Caswell, copy enclosed. However, I still maintain that Steinman should have identified his source.
