OTTAWA, ONTARIO K2C 3H3

Dear Mr. Bray:

Project S.U.M. (Solving the UFO Mystery) is a non-profit UFO research organization that was formed to seriously and scientifically study the phenomenon of UFOs in Canada. Please find enclosed some general information on Project S.U.M.

I have heard that you are particularly concerned with what the Canadian Government isn't doing about the UFO problem and the hundreds of sightings stored away in the NMS File on Sussex Drive in Ottawa. Since we are a Canadian group, we are also eager to persuade the Government into setting up a research program concerning UFOs, it just seems as if they ignore the possibility of a serious and objective study.

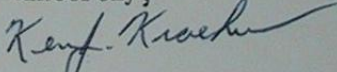

Our major focus of research is particularly on Canadian UFO sightings and experiences. Since our formation in 1974, we have expanded our list of scientific and professional advisors and our number of correspondents in Canada and the United States.

We would be interested to know what your particular views and opinions are on the research that is currently being carried out in Canada and what you feel the real potential Canadian UFO organizations and investigators have in solving the UFO mystery and investigating important sightings properly.

Also, we would be interested in possibly obtaining a copy of the article "Science, the Society and the UFO". Brief No. 212, contained in the Proceedings of the Special Senate Committee on Science Policy (September 17, 1968). No. 80, pp. 80-89. We would be willing to pay all costs if you could send a copy to us.

I hope this letter has been of interest to you and I look forward to hearing from you.

Sincerely,

Ken O. Kroeker,
Director
