Hurlstone Park,
Sydney, NSW 2193,
Australia.

Dear Bill:

Thought it about time I dropped you another note as it has been a long time - last August to be precise. I promised you a copy of the brief which I submitted to our Senate Special Committee on Science Policy, and it has only just been published, so I am sending a copy by surface mail today.

There is still considerable UFO activity in this country, as you no doubt are aware. One of the best sightings yet occurred in Duncan, B.C. on New Years Day this year. It will be written up in the next issue of CANADIAN UFO REPORT, which I believe you receive.

I certainly was disappointed to hear of Dr. Lindtner's tragic death. Very unfortunate I must say, and without doubt a great loss to your organization.

I have been actively trying to get some real scientific analyses carried out on the famous "Ottawa chunk of metal" with which you are quite familiar, I am sure, but am having great difficulty getting any answers out of our government. It seems there is plenty they do not wish known. The usual run-around, of course.

I hope you will be in a position to send the remaining \$19.90 which is outstanding on the books I have sent to you, in the near future.

Nothing else new right now. Will get my brief off in the mail along with this letter.

Very sincerely,

Arthur Bray
