TABLE OF CONTENTS

* * *

5. Technical consulting services by staff members
   a. To authors and editors, fees for press, radio, TV library research
   b. Motion picture industry (technical direction)
   c. Aircraft industry
   d. In other industries working in supporting subjects
      —electronics, fuels, space medicine,
      —materials of construction, etc.
   e. Government research and development consultations

6. Franchises, copyrights, patent licenses on material developed by the Committee or donated to it

7. Publications
   a. Net operational revenue or franchise fees covering the publication of periodical "Space Flight"
   b. Books, charts, pamphlets and other copyrighted material
   c. Reprint fees
   d. Special library or printing services

At the start, much of the revenue to begin business will come from membership and registration fees from individuals and established groups, and from gifts or collections taken during organized lecture tours under Committee sponsorship.

The income will be augmented later by the receipt of fees charged by staff members for consulting services to industry generally, and the aircraft industry in particular, technical direction for the motion picture industry, and other advisory services.

Also, it is to be pointed out that the franchise revenue of the publication "SPACE FLIGHT", if professionally managed, could easily support all of the operating expenses and public services of the Committee.

TAX EXEMPTION

Inasmuch as the organization operates on a non-profit plan for educational and scientific purposes and does not share or distribute profits to stockholders, members or staff, it is qualified under Regulations of the U. S. Treasury Department to be exempt from the payment of corporation income tax.

Gifts to the corporation by individuals are also deductible for personal income tax purposes.
