Colonel / pathologist

THE COMMON SENSE THEORY

CHARLES J BORNHOEFT 07301958

QUANTUM COMMUNICATION

Single atoms form the nodes of an elementary quantum network in which quantum information is transmitted via the controlled exchange of single photons. Quantum Entanglement goes back a very long time. This is my theory.

There is a technologically advanced living species routinely visiting our solar system and has been for a very long time. Humans on earth, a very likely extraterrestrial origin, have started to increase its intelligence very rapidly going back just 10 thousand years. Archaeologically speaking, early man in general has a **defined fossil record** of only 5 or 6 million years. Archaeology has always assumed we are not of extraterrestrial origin. In just the Milky Way, there are billions of planets in the goldilocks zone. We must first realize that a 25 million year time frame is a very short distance in the evolutionary process. We must first realize that advanced technology stops at a certain point in time. You can't learn anymore, it becomes mastered. Time travel just got a little bit easier.

CALL THEM WHAT THEY ARE

I refer to them as **Tals**, a Technologically Advanced Living Species in all due respect. Alien or extraterrestrial are both vague terms and could refer to just about anything originating outside of Earth. The human race could be alien or extraterrestrial as noted in the common sense theory. It is considered disrespectful to refer to **Tals** as less than what they truly are in the media or in online news in the same way that it is disrespectful to identify other various races with slurs. Keep in mind that **Tals** are the ones navigating and remotely controlling the highly advanced gravitoelectromagnetism propelled UFOs and the unidentified submersible vessels. The **Tals** are also navigating beautiful orbs of dancing light that appear to be saying a message. They are being closely studied by military and government officials. They are under the auspices of a highly classified top secret chain of command.

IDENTIFIED EXTRATERRESTRIAL ORBS AND CRAFT

Some UFO'S that have been observed and openly acknowledged by Astronauts, Politicians and Civilians around the world are identified as extraterrestrial. These same vessels are not produced on earth. They are real, and they are controlled by an advanced species. They exist throughout our solar system. They are not a new phenomenon, but were actually recorded on the cave walls of our ancient ancestors about 100,000 years ago. The acknowledgement of their presence has been growing more rapidly and more widespread with the invention of high definition cameras and modern internet communications. In theory, the **Tals** have been visiting our solar system for at least 5 or 6 million years. The human populations on earth are entering a new stage of

communication. The **Tals** are very much aware of the weapons of mass destruction in low earth orbit.

SUPERIORITY HAS THE FINAL WORD

Tals, along with a select few in our governments, are the ones that have **not** been allowing the human populations to have widespread advanced knowledge of their existence. For many thousands of years, they have been manipulating the story about the history of Earth. In addition too, the history curriculum, religions, and research sciences to omit any such references about them.

NEAR EARTH OBJECTS

The **Tals** are in control of Earth and its safety as a planet, and thus have not let any large Near Earth Objects hit planet Earth ever since it was populated with primates some 5 or 6 million years ago. All strikes on planet earth are for a reason going back 6 million years or as far back as 65 million years. Five different types of primates just appeared on Earth, and in fact four of those have evolutionarily gone extinct in that time frame. The remaining species modern man has thus survived a very long historical journey on our planet. Overpopulation, famine, disease, asteroid collisions and a myriad of other scary doomsday scenarios will not actually play out due to the rapid pace of advances in technology and intelligence being made by our species. It's a fact that the **Tals** are controlling things as related to galactic law. The last big asteroid to hit earth was estimated at 50 meters across and explodes above Tunguska, Siberia. This is one of the most deserted areas on planet Earth. Eight hundred square miles of forest was incinerated. The same asteroid was incinerated just prior to impact with no trail of shell. Scientists theorize both extraterrestrial reasons and non-extraterrestrial reasons. The Argentina craters are most fascinating due to the geographical locations they always seem to find, perhaps a climate controlling event. They move and control the asteroids in our solar system like NASA moves and control its own satellites. In 1937 the asteroid Hermes had the capability to create mass extinction and global climate change. It missed planet earth by only 600,000 thousand miles. The **Tals** have the capability to move such a rock with ease. No invasion anytime soon (Stephen Hawking) the big rocks are a low cost very efficient way to annihilate the human population, just ask the dinosaurs.

THE VICIOUS HOMINIDS AND MAN TODAY

As **facultative carnivores**, humans have learned how to sacrifice living animals for food and resources. These same animals would much rather live and enjoy the life span promised to its life cycle. Testosterone, combined with violence makes the human populations forever in a constant war. The characteristic gene of hunting, while it has demonstrably increased the intelligence and reasoning capabilities of our species survival also leads to aggression, murder, and battles. The need for resources has a significant role in violence and war. The **Tals** have been watching our wars since hominids were originally put here some 5 or 6 mya. We are in fact a very young vicious primitive species to them. There will be no chance of a peaceful collaboration between humans and

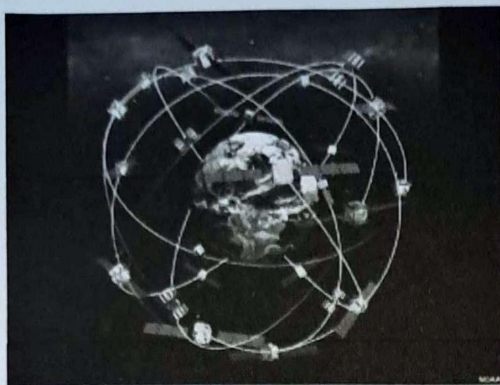

the **Tals** any time soon. They allow our wars for turf and resources. They watch them in real time. They have historically tried making us better people under certain laws and religious traditions that they implemented. They have performed many miracles with the use of their technology, such as parting the Red Sea, reading minds and even answering prayers. Curing illness and bringing back to health with the technologically advanced is made easy. **Tals** can make a selected human aware of their existence by way of telepathic communications in dreams and during waking life. They have taken some major part in introducing the major religions of Earth, both past and present, and were directly involved with the genetic hybrid birth of Christ and his philosophical or religious reasons. Pyramid building and mummification was a compelling chapter. They may indeed be involved in the search for God, and for the afterlife, as part of their grand science projects.

DISCLOSURE IS BEING MADE

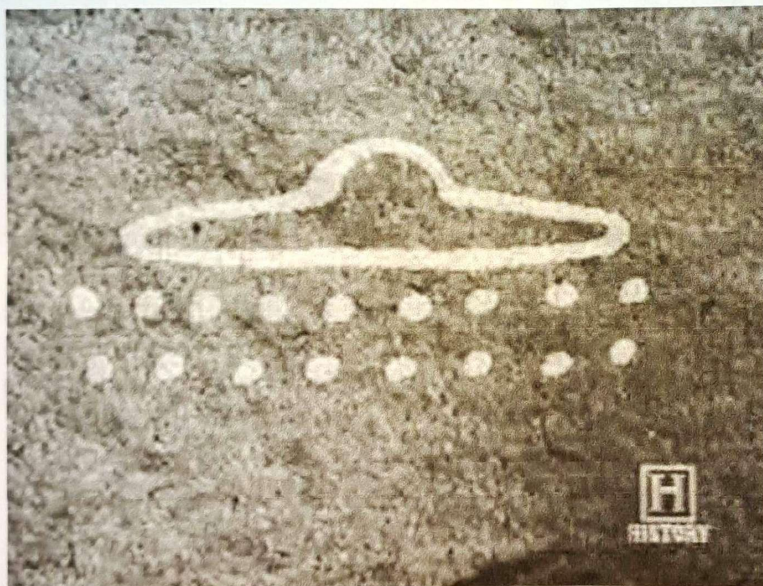

The **Tals** are letting themselves be known in numerous ways as per quantum entanglement, the crops, the crop trails, the identifiable UFO's, the cattle, the earthquake lights, the pyramids and the abductions. The human populations could not handle the facts about Earth's history and science. The human populations have to expect that the **verbal communication disclosure project** is not possible and would interfere with the populations and the commanding rulers. Early man drew identifiable craft on walls 100,000 years ago and we record them with our high definition cameras now. The new United States Air Force Space Based Surveillance System or USAF SBSS can prove this fact. We are part entering a new stage of disclosure. No radio communication with the vessels anytime soon, just telepathic. The masses cannot handle the truth. Stage one disclosure began when they helped geographically located and positioned the great pyramids all over the world. Conspiracy goes back a very long time and will continue.

THE OPTICAL DISCLOSURE PROJECT

We are in a great time of learning. We have the technology to share information worldwide and to optically record identifiable UFOs and make it fact. Although the **Tals** have the ability to cloak their light emissions in the visible and infrared spectrum, optical contact with their vessels is still possible at certain times when they remain uncloaked. The USAF SBSS has a high definition satellite network in low earth orbit. They can observe and visually triangulate the vessels within the ionosphere. The vessels are attracted to lightning storms and artificially induced HAARP Experimentations.

Within our atmosphere the populations are invited to launch a **privately funded** satellite array network of High Definition Surveillance Cameras into Low Earth Orbit, which is considered the safe area for **The Optical Disclosure Project**. Some UFO's are identifiable. The **Tals** are welcoming the HD camera's in LEO like they welcomed the Gemini, Mercury, Apollo and Space Shuttle missions. It is just as fascinating for them as it is for the human populations. They are all over this section of the solar system.

We started documenting UFOs 100,000 years ago

SETI should stand for Scientifically Eliminating Technological Information. If we witness a UFO with the naked eye and we are also tracking them on radar, why are we not trying to record them with a state of the art surveillance system? An array of HD cameras in low earth orbit would be close encounters of the **common sense kind**. The United States Air Force, Space Based Surveillance System or USAF SBSS are recording tracking and monitoring UFO's in low earth orbit. This technology **is all new** and is the Holy Grail upon producing visual evidence and proves that we are not alone. The USAF SBSS should be capable of producing crystal clear close up images even capable of

reading the hieroglyphics on certain vessels. The UFO's are easy to identify in low earth orbit and are in fact identifiable.

CONSPIRACY CHAIN OF COMMAND

Be advised...some members of NASA have a direct link to the conspiracy chain. Just like General Ramsey from the Roswell incident. The X-man that gave General Ramsey the order to change the story at Roswell is in the chain of command. Keep going up the chain of command and at the very end is the commission. They make the rules, not our governments. They are in control of the crashed vessels. They are in control of the asteroid fly-bys. They are in control of the **verbal communication disclosure project**.

THE WAR MACHINE

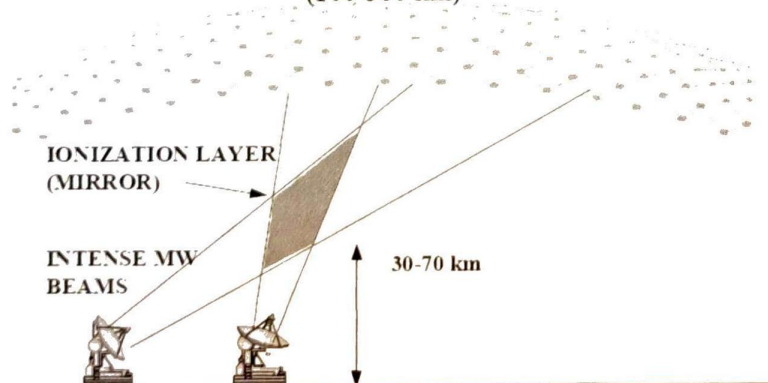

Keep in mind the primitive war machine just went high tech by taking advantage of some simple physics. Lazars have allowed humanity to harness light and cut holes in objects. It also establishes new forms of communication. In theory the **Tals** will not tolerate instruments of mass destruction in low earth orbit, **the safe zone**. This is a nice way of saying you can record us in LEO don't place your weapons here. The real arsenal of weapons lies in the Kuiper Belt. The Wesley impact is a wake-up call for the populations.

AUDIO STEALTH

The SETI project will never work until it's turned on. It's a very primitive means by which contact is attempting to be made. They are in fact using a filter to comb out all non-human transmissions that are propagating through the zone of the upper atmosphere of Earth. It's a form of audio stealth that they have been utilizing ever since the early days of human radio transmission.

IONOSPHERE

There is so much here for you to absorb already. Give yourself some time. Give yourself some space.

Can we not leave yet? I sense You are leaving. You always start talking like that when You are getting ready to leave. I'd like to talk about a few other things . . . such as, for instance, beings from outer space—are there such things?

Actually, we were going to cover that, too, in *Book 3*.

Oh, come on, give me a glimpse, a peek.

You want to know if there is intelligent life elsewhere in the universe?

Yes. Of course.

Is it as primitive as ours?

Some of the life forms are more primitive, some less so. And some are far more advanced.

Have we been visited by such extraterrestrial beings?

Yes. Many times.

For what purpose?

To inquire. In some cases to gently assist.

How do they assist?

Oh, they give a boost now and then. For instance, surely you're aware that you've made more technological progress in the past 75 years than in *all of human history before that*.

Yes, I suppose so.

Do you imagine that everything from CAT scans to supersonic flight to computer chips you imbed in your body to regulate your heart all came from the mind of man?

Well . . . yes!

Then why didn't man think them up thousands of years before now?

I don't know. The technology wasn't available, I guess. I mean, one thing leads to another. But the beginning technology wasn't there, until it was. It's all a process of evolution.

You don't find it strange that in this billion-year process of evolution, somewhere around 75 to 100 years ago there was a huge "comprehension explosion"?

You don't see it as *outside the pattern* that many people now on the planet have seen the development of everything from radio to radar to radionics *in their lifetime*?

You don't get that *what has happened here represents a quantum leap? A step forward of such magnitude and such proportion as to defy any progression of logic?*

What are You saying?

I am saying, consider the possibility you've been helped.

If we're being "helped" technologically, why aren't we being helped spiritually? Why aren't we being given some assistance with this "consciousness shift"?

You are.

I am?

What do you think this book is?

Hmmm.

In addition, every day, new ideas, new thoughts, new concepts are being placed in front of you.

The process of shifting the consciousness, increasing the spiritual awareness, of an entire planet, is a slow process. It takes time and great patience. Lifetimes. Generations.

Yet slowly you are coming around. Gently you are shifting. Quietly, there is change.

And You're telling me that beings from outer space are helping us with that?

Indeed. They are among you now, many of them. They have been helping for years.

Why don't they then make themselves known? Reveal themselves? Wouldn't that render their impact twice as great?

Their purpose is to assist in the change they see that most of you desire, not create it; to foster, not force.

Were they to reveal themselves, you would be forced, by the sheer power of their presence, to accord them great honor and give their words great weight. It is preferred that the mass of people come to their own wisdom. Wisdom which comes from within is not nearly so easily discarded as wisdom which comes from another. You tend to hang on a lot longer to that which you've created than to that which you've been told.

Will we ever see them; ever come to know these extraterrestrial visitors as who they really are?

Oh, yes. The time will come when your consciousness will rise and your fear will subside, and then they will reveal themselves to you.

Some of them have already done so—with a handful of people.

What about the theory, now becoming more and more popular, that these beings are actually malevolent? Are there some who mean us harm?

Are there some human beings who mean you harm?

Yes, of course.

Some of these beings—the lesser evolved—may be judged by you in the same way. Yet remember My injunction. Judge not. No one does anything inappropriate, given one's model of the universe.

Some beings have advanced in their technology, but not in their thinking. Your race is rather like that.

But if these malevolent beings are so technologically advanced, surely they could destroy us. What's to stop them?

You are being protected.

We are?

Yes. You are being given the opportunity to live out your own destiny. Your own consciousness will create the result.

Which means?

Which means that in this, as in all things, what you think is what you get.

What you fear is what you will draw to you.

What you resist, persists.

What you look at disappears—giving you a chance to recreate it all over again, if you wish, or banish it forever from your experience.

What you choose, you experience.

Hmmm. Somehow it doesn't seem that way in my life.

Because you doubt the power. You doubt Me.

Probably not a good idea.

Definitely not.
