

I was pleased to note that a few sighting reports have been carried by the Journal recently and they have been written in a much fairer manner than on many occasions in past years.

I am sorry to take up your time with this correspondence but Mr. Gallant has ignored many important facts concerning UFOs, both in his article in the New Book of Knowledge (probably read by thousands of Canadians) and in his letter to me. His encyclopedia article in turn caused Mr. Leokum to misinform the public also. I only try to set the record straight.

Yours sincerely,

Arthur Bray
