

nov 17 1969

Dear Carl - ^{Sp20}
- 44C

Thank you very much
for your letter of Nov 5 -

I have referred your
request - re - my findings on
metal - to the Federal-
Authority who request the
test - as these findings are
confidential & I suggest you.
see "Buck" to whom I
sent some information - which
is all I can do - at the
present, but any practical
foundry worker can tell
you - what the metal is.
I'll send the other -

2 - information - about the
Terla-Scope - cater,

I hope you under-
stand my position - I am
on a limited income.
and can not afford to
devote hours and weeks.
of my time - to useless -
things - nor am I interested
in feeding doubters with
a silver spoon - any one
who claim to be "professionals"
metallurgists know perfectly
well - how my test was -
made - no other explanation
is required - others - can never
be convinced - so I cast
time! Sincerely yours
