

version of the doctrine of the construction of the Solar Body or Body of Light, the only way to get out of the world alive! This advanced work was taught under highly secret conditions in the Western Schools as well, as there are veiled references to it in Gnostic teachings, for instance; so, Lesson Twelve is one of our most fascinating and readable lessons, delving as it does into some of the most secret practices of that land of mystery, Tibet. The text is heavily illustrated with drawings and pictures. 54 pages, printed. \$2.25
 Cassette tape or Monaural, 5 in. reel, 3 3/4 speed \$6.50

BSRA No. 24-I: THE WAY OF THE YOGIN or KABALIST. The Yoga of One-pointedness is described and illustrated in Lesson Thirteen, drawing from Evans-Wentz's studies in "Tibetan Yoga and Secret Doctrine", and from Behanan's "Yoga, A Scientific Evaluation". We review briefly the development of Indian Philosophy and Yoga from the earliest Vedic hymns to the Upanishads and Patanjali. Credit is given to Kapilya, one of the greatest of pre-Buddhist Hindu reformers, whose teachings are still preserved in the Samkya school. The 12 different Yoga schools are listed. Emphasis is on the Yoga of One-Pointedness as developed by Tibetan Buddhism, the Middle Path or Middle Way (which we Westerners show as the Middle Pillar on our Tree of Life), avoiding the extremes of asceticism on the one hand and worldliness on the other. (Tape only at present, \$6.50 Cassette or 5 in. reel-to-reel, transcribed and printed, we hope, in late 1976.)

BSRA No. 24-J: THE FOURTH WAY, or Way of the Adept. Lesson Fourteen is largely a review of the lives of the Hungarian Adept, Francis Rackoczi. This Regent of the West seems to have had more to do with the shaping of our present civilization than any other individual, as is indicated by his series of lives in Europe, especially that of Sir Francis Bacon, As Poet he wrote the great Plays under the pen name of Wm. Shakespere. As Statesman he encouraged the Protestant colonization of North America and established the principles of scientific research. As occult scientist he reformed and revitalized the Masonic and Rosicrucian fraternities. As philosopher he established the English language as the great educational tool of the West, through the Plays and through supervision of the translation -- and formalizing the style -- of the King James version of the Bible. He was also St. Alban, the Roman soldier-martyr of the 3rd Century; Proclus, the Neo-Platonic philosopher of the 4th Century; and Roger Bacon, the pre-eminent magician-scientist of the 13th Century. (Tape only at present, \$6.50 Cassette or r-t-r, transcribed and printed in 1977.)

BSRA No. 24-K: THE FIFTH KINGDOM and THE SEVEN RAYS. Lesson Fifteen is a look into the future and the establishment of a world-wide discipleship of dedicated men and women, students of the Mysteries. This is a Fifth Kingdom in Nature, something never before experienced on this planet. Only now are there enough advanced souls in incarnation to reach beyond national boundaries and link up in fellowship, creating a true basis for world government. (Tape only, etc.)
