Agincourt Ont.

Aug. 22/68

Dear Arthur

My thanks for your letter of July 15⁸ the confirmation of delivery of the two books. I mentioned your book also to L. J. Lorenzen A.P.R.O. Director so you may get a credit line in his publication.

A fellow researcher Mike Andrews of R.R. 2. Peterborough has obtained a sample of rubberized or plastic material, charred black on the outside surface - which may be of some interest to you.

I believe the object was found in a circular clearing in dense bush on the outlying area of Ottawa. Apparently a sample has been sent to DND or N.R.C. for analysis but to this date, no word has been had in reply.

A sample has also been sent to a firm in V.A. for study & I should be hearing from Mike this week end for further information on this report.

Mike Andrews & a fellow by the name of Coyn (COYN) the property owner, are planning a trip to that area in the near future & if you are interested, drop him a line & if possible arrange a meeting date.

Mike is a C.A.P.R.O. member & trying to organize a group in the Peterborough area.
