RET.

TYPESCRIPT OF TELEGRAM SENT TO PRESIDENT-ELECT November 3, 1976
JAMES CARTER, PLAINS, GEORGIA, earlier this day, via Western Union.

PRESIDENT-ELECT JAMES CARTER, PLAINS, GEORGIA

Your son Jack has a complete file on me with documents and a letter that was to be relayed to you for campaign use. Your victory saves our country from its gravest crisis since the 1789 elections.

But for us who risk everything trying to solve the intolerable mystery of these ever-bolder UFO overflights, landings and abductions of American citizens for physical examinations, your headlined promise to reveal hidden UFO evidence to the American people on even this most forbidden of all topics makes us hope that historians may praise your Presidency as the historic turning-point when you persuaded Americans, military and civilians, to stop shooting at the harmless flying saucers and instead started talking intelligently to their friendly, inquisitive occupants.

Only the election of a Christian Chief Executive in the UFOs most-visited nation can restore their shattered confidence in our race whose distant ancestors greeted these celestial visitors with respect, even worship. Identical legends the world over prove they have come here before to teach emergent mankind, but when they returned in 1947 they found us trigger-happy from Cold War tensions. Nervous generals gave our fighter pilots orders to shoot them down.

But now, Mr. President-Elect, you soon will have authority to reverse this tragic error and achieve fruitful detente with our friends from space. Please offer them a large safe landing zone on Glorieta 8000-ft mesa near Los Alamos, New Mexico. Keep our military at a distance. Assure the UFOlk freedom from treacherous ambush or media crush.

Using unique large-scale visual equipment designed by me you can transmit simple messages in both illuminated words and large-screen motion pictures, making clear that you seek to meet there in peace with their leaders in this safe demilitarized zone, which I know well, having been a rancher nearby. Open your heart in Christian trust as missionaries do with hostile tribes. Perhaps tell them we shall barter fairly for whatever they have crossed the void of space to obtain: fresh water, cattle, supplies, willing volunteers for harmless studies. The vast inaccessible Glorieta mesa is lofty uninhabited federal land.

At the very least we may persuade them to disclose their intentions to us. At most, you may gradually transform their furtive flights and senseless confrontations with utterly unprepared terrified humans who merely happened to be caught in a lonely spot. You can change present chaos and panic into planned, rational conferences with you and our top scientists. Offer to exchange knowledge and materials. Perhaps later even cultural and spiritual exchanges between their superior civilizations and our adolescent, divided United Nations. We must both be children of the One Father.

With you as President, we now have all God's wondrous universe to gain by UFO detente, nothing to lose except perhaps my willingly-given

life by trying this communications experiment, called UFOCOL, for one year. Details are already prepared by my civilian associates.

Dire alternative: If UFO-studying Russian military scientists, far more seriously concerned and quickly reactive to their own UFO landings than ours, succeed somehow in cozening these gentle innocents -- perhaps by ruthless offers of human slaves and vast virgin lands for bases as their allies -- or trick them into giving the Soviets the priceless secret of each UFOs miniaturized free-fuel nuclear fusion engines, or the revolutionary secret of their energy-storing solenoid torus, or the deadly secret of their modulated ray-guns that can lightly stun or melt steel at great distances --- then triumphant Kremlin can and will dictate surrender terms to entire free world.

You can prevent this very possible catastrophe by being the first honorable Earth leader to greet their chief executive and offer peaceful co-existence with diplomatic immunity for their Ambassador, and eager assistance of our revitalized scientific world.

Let us start planning now to push site preparation in best weather. Only fools and fogies will laugh. For the masses of the working people who elected you, UFOs are no longer a laughing matter. Most recent Gallup Poll reports over half of all Americans believe the UFOs are real, that the Pentagon is lying when it denies them. Gallup also found that over 15 million Americans admit seeing a UFO as you yourself did.

But you will be bitterly opposed, even defied, by small groups of high officers at Wright-Patterson AFB, in the CIA and Pentagon called The Secrecy Group, an organized conspiracy.

Today, they are worried that you will keep your pre-election promise to tear down the Domestic Iron Curtain of their Saucergate cover-up, public perjuries and obstruction of justice. At dawn today as your victory was being proclaimed, I received a coded call from a trusted Washington informant saying the Secrecy Group are so hostile to you there was actually drunken 3 a.m. talk of destroying or hiding all their material evidence of UFOs rather than wait for you to expose them to possible courts-martial, certainly to public outrage for the decades-long Saucergate cover-up.

My dearly beloved new Commander in Chief, could you not now issue a gentle hint to the CIA, WPAFB and Pentagon Secrecy Group that you know what material UFO evidence they are hiding, where it is kept, and expect to find this valuable government property in place and intact when you assume office.

Mere mention in most good-natured way at next press conference will not only make headlines from coast to coast but will generate more warm oceans of love and admiration for you among the millions who voted for you because you promised to unveil the truth about UFOs.

My goal is a national all-networks telecast of President Carter shaking hands and signing a friendship treaty with the being that heads the extraterrestrial social order. They must have an organized society to sustain their advanced technology and their large expeditionary force now patrolling our planet for reasons we do not yet comprehend.

Give me one year as senior consultant to UFOCOL -- at 67, I seek

no administrative post -- and I may have friendly UFOs landing in the White House Rose Garden. Your possession of their technological secrets would make the Russians and Red Chinese much easier to deal with, since they respect nothing but military power. And our energy crisis would be permanently solved.

Christ has given you the moral courage to take this great step forward for all mankind and after you hear my brief presentation, I feel confident you will be willing to take it. Repeat: Son Jack has a complete file on my credentials and professional record. I have just retired from nine years as a senior professor teaching advanced non-verbal communications techniques at academically-elite University of South Florida. Previously, four years director secret research projects for the late Walt Disney. I am packed and ready to leave at a moment's notice, to enter your service, merely as a consultant. God bless you.

RET.

Mr. Hamilton Jordan
The White House
1600 Pennsylvania Avenue
Washington, D.C.

Dear Mr. Jordan:

Mutual acquaintances insist that you are a nephew -- or cousin -- of the late, great Reverend Dr. Clarence Jordan, founder of the famous Koinonia Farm, near Americus, Georgia.

I revered Clarence, worked at Koinonia two summers in the '50s, was host to his followers when they visited Florida, sent donations to help Koinonia's struggle for Christian Witness.

Even if you are no kin to Clarence Jordan the Evangelist, these homey facts help to identify me. If you are related, it gives us a bond of the spirit.

I was a friend and co-worker of Dean Alex Lacey, before he went north, and was officially engaged as a consultant (by Russell Caldwell) on Georgia's model State Park, UNICOI, before it opened; and have been an official guest of your state.

My son Tim, age 36, took his doctorate in psychology at Georgia State, lives in Atlanta, is an official in the Department of Corrections/ Offender Rehabilitation. While Jimmy Carter was Governor, he knew Tim and his outstanding work in improving the state's prison system.

This gives us another interest in common. I'd like you to feel that this letter is from a recognizable friend and fellow southerner, not some mysterious professor without reassuring roots.

A public figure, I have lived in Clearwater, Florida, for 30 years, writing books, teaching and preaching. Three years ago I retired with the rank of Senior Professor from the State University of South Florida at Tampa, after nine years of meritorious service, lecturing to classes of from 100 to 450 students on the techniques of mass communication. (For four years I was Walt Disney's Director of Research for Educational Films, helped to make about five million dollars' worth of classified military training films under Federal contracts, was often called to Washington by various agencies to help solve new audio-visual communication problems.) So now you know who I am.

My purpose in writing to you today is to offer my expert help in a delicate and dangerous decision that confronts you. In December 1974 I lectured on this topic to a packed auditorium at Georgia Tech.

This topic can be another beautiful victory for President Carter in winning the hearts and minds of the new common people. Or it can blow up in Jody Powell's face like a terrorist bomb if hostile reactionary newsmen try to ridicule the President for using certain words. Malicious cartoonists also can hurt the President. My aim is to help prevent that.

As enclosures show, I have survived many a hostile press conference during my lecture tours on this very same subject that the President is soon going to speak out on.

I refer to the damnable, messed-up mystery of the so-called UFOs, or flying saucers. The topic that has made fools out of wise men, and prophets out of fools.

Now please refer to Enclosure A.

When this appeared, during the campaign, I had hundreds of photocopies made and mailed to undecided voters I knew would vote for Carter because of his promise to uncover the cover-up of our nation's "Saucergate" scandal: the concealment of material evidence by certain agencies from the Executive Branch.

This UFO issue excites millions more of the young, the poor, the minorities, the independent and academic voters (like me) than old-fashioned politicians realize.

Ford's camp thought that the only people interested in flying saucers were "a few nuts."

Nothing can be farther from the political reality.

The last Gallup Poll taken on "Do you believe in UFOs?" revealed that 51% of American adults believed that the UFOs are "real in some way", and that the Pentagon was lying when they denied UFOs existed.

Fifteen million American adults confessed to the anonymous pollsters that they had "seen a UFO."

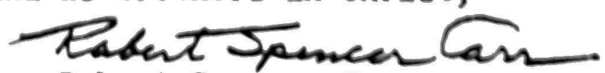

Mr. Jordan, these are political forces of the first magnitude, not a few insignificant eccentrics.

I have some very serious secrets to confide to you -- preferably in person -- before the President makes his public statement about UFOs.

A second letter will follow in two days. Meanwhile, your attention is directed to my other enclosures, which are self-explanatory.

Yours in a shared devotion to our Chief, and as brothers in Christ,

(professor)

Robert Spencer Carr

EXCLUSIVE INTERVIEW

NATIONAL
ENQUIRER

Nov. 20, 1977

Billy Graham: I Believe There Is Intelligent Life in Outer Space—And That These Beings Probably Look Like Us

By LEE HARRISON

Billy Graham firmly believes that intelligent life is thriving on other planets — and that these outer-space aliens probably look amazingly like people on Earth.

"Our solar system is just one of billions in God's colossal Creation — and I find it very hard to believe He would have created only one living planet, Earth," the famed evangelist declared in an exclusive ENQUIRER interview.

"I firmly believe there is intelligent life in outer space... beings who probably look very much like the average American."

Speaking for the first time ever about his belief in extraterrestrial life, Rev. Graham told The ENQUIRER he believes:

- Outer-space beings have the capability to visit Earth — but would come in peace.
- They worship God, just as we do.
- They could hold the solution to many of Earth's problems.

Rev. Graham said advanced civilizations probably exist on many of the planets in our far-flung universe. "And I feel they have developed space vehicles capable of reaching Earth," he added.

"I don't believe that all reported UFO sightings can be dismissed as mere figments of the imagination. Without doubt, there have been legitimate sightings of flying objects which cannot be explained."

America's most famous evangelist said he bases his startling conclusions not only on his own deep religious beliefs — but also on extensive discussions with leading U.S. space experts. He explained:

"I've discovered that many of America's top scientists and astronauts — who are ac-

tively investigating the question of extraterrestrial life — share my view. I firmly believe there are intelligent beings like us far away in space who worship God. But we would have nothing to fear from meeting these people. Like us, they are God's creation.

"And if we should eventually make contact with these civilizations, it would be one of the biggest breakthroughs in the history of mankind. It's mind-boggling to imagine how much we could learn from them.

"They're probably at least

as advanced as us, and possibly more advanced — which means they may have found answers to many of the problems we face on Earth. Disease, war, environmental pollution may be nonexistent on these other living planets.

"But my biggest hope would be that they are loving, caring societies who are at peace with God and free from sin. I see no reason why other planets should be cursed with the riots, demonstrations, wars and rebellions which threaten the future of our civilization."

Though outer-space beings

are constantly depicted in science fiction novels as bizarre creatures, the Rev. Graham does not believe that is the case.

"I feel they probably look just like you and me," said the 58-year-old evangelist.

"And just like us, they are anxious to know more about life in other parts of God's great universe.

"From my studies of the Scriptures, I can find nothing that would change our faith in the Gospel if we discover life on other planets.

"And our society would ben-

EVANGELIST Billy Graham says he believes outer-space beings have the capability to visit Earth — but they would come in peace.

efit greatly by the discovery — we would have everything to gain!"

Session 2

OPERATION LURE

Saturday, Nov. 2 10:00 AM - Noon
International Inn \$4.00

Speaker: Dr. Robert Spencer Carr

Hear the CIA's Flying Saucer Gate exposed by Dr. Carr. Since 1947 when his uncanny prophetic space-ship stories in the Saturday Evening Post first stunned millions of readers, Dr. Carr has become recognized as one of America's best informed UFO authorities. Climaxing the current best-selling book **ALIENS FROM SPACE** is Carr's amazing scheme. Operation Lure, for establishing friendly conversation with flying saucer pilots on a remote New Mexico mountain top. Learn why the U.S. Air Force covers up real UFO evidence. "The flying saucer cover-up, enforced by the CIA, is threatening the fate of humanity on our entire planet. Americans want the truth. I intend to tell it on November 2, 1974," Dr. Robert S. Carr

R. CARR
301 ELDRIDGE ST.
CLEARWATER, FLA.

16

Operation Lure

Robert Spencer Carr
301 Eldridge Street
Clearwater, Florida 33515

The first planned meeting of aliens and humans could be the start of mutual adjustments, leading to great advances for our world. But adjustments might prove too difficult, leaving us with serious problems for all mankind.

For this first crucial meeting to have a fair chance of success, the humans involved should already know two vital facts:

1) The aliens' physical appearance. 2) The beings' general reactions to humans.

To learn this much before ever meeting an alien may seem impossible. But it can be done. It is the first goal of Operation Lure, a unique but practical plan which avoids the strongly opposed radio and television communications.

The basic idea was first suggested by a NICAP Special Adviser, Robert Spencer Carr, former Director of Educational Research, Walt Disney Studios, a specialist in visual-aid education who has served with the Army Orientation Service and has produced educational films for the State Department. Since the original suggestion, I have privately expanded the plan with aid from Carr, linguists, psychologists and experts in other fields.

There is nothing mysterious in this operation, though some of the steps may be surprising.

The Lure will be an isolated base with unusual structures

JIMMY CARTER: THE NIGHT I SAW A UFO

National Enquirer, June 8, 1976

...If Elected I'll Make All the Govt's UFO Information Public

PAGE 4

By MALCOLM BALFOUR

Jimmy Carter believes in UFOs — because he has seen one himself.

And if he becomes President, he'll release to the public all UFO data in the possession of the government.

Speaking exclusively to The ENQUIRER, the Democratic front-runner declared:

"If I become President, I'll make every piece of information this country has about UFO sightings available to the public, and the scientists.

"I am convinced that UFOs exist because I have seen one."

Carter talked frankly and without hesitation about the phenomenon he witnessed one night in Thomaston, Ga., in 1973, after a late-evening speech before the local Lions Club.

"It was a very peculiar aberration, but about 20 people saw it," he said.

"It was the darndest thing I've ever seen. It was big, it was very bright, it changed colors and it was about the size of the moon. We watched it for 10 minutes, but none of us could figure out what it was.

"One thing's for sure, I'll never make fun of people who say they've seen unidentified objects in the sky!"

Carter's 23-year-old son Jeff, campaigning for his father in Flint, Mich., gave The ENQUIRER further details

EXCLUSIVE—Jimmy Carter: The Night I Saw a UFO

about the former Governor's remarkable experience.

"After his speech in Thomaston, my father was stepping out into the parking lot of the club with a group of businessmen when they spotted the UFO," he said.

"It had three lights — clustered together about the size of the moon. My dad said they were changing color from red to green. It was positioned off to one side of the moon.

"He knew it couldn't have been an aircraft of any type we have. Remember, he's a nuclear physicist who served with the Navy.

"He now believes that (UFO sightings) should be investigated."

W. Asbury Stenbridge of Macon, Ga., former Georgia district chairman for Lions Club International, remembers Jimmy Carter talking about the UFO.

"Jimmy told me about it himself," he said. "And my wife Charlotte saw the same UFO. She described it to me as a large reddish object that looked similar to the moon, and seemed to be changing colors."

Interviewed by The ENQUIRER,

Mrs. Charlotte Stenbridge, a school teacher, said: "The object was three balls of light, clustered in a circle, flashing and changing from red to green. It drifted slowly across the sky — then disappeared quickly."

A former Georgia state representative, attorney Milton Jones of Columbus, Ga., stated: "I vividly remember Jimmy telling me about spotting the UFO.

"I was a skeptic at the time, and in a conversation with him I said I doubted UFOs existed. Jimmy said immediately that he believed UFOs existed because he had seen one. He told me how he had stepped out of a civic club meeting with a group of businessmen, and how he had observed a UFO for about 10 minutes."

Carter's 77-year-old mother Lillian told The ENQUIRER at the family home in Plains, Ga.: "The UFO made a huge impression on Jimmy — he told me about the sighting several times. He's always been a down-to-earth, no-nonsense boy, and the sighting by him, as far as I'm concerned, is as firm as money in the bank."

Alcee Maxfield, former full-time state secretary of Lions Club International in Georgia, said: "I heard Jimmy

talk several times about spotting the UFO.

"I was particularly impressed because Jimmy is a scientist, a specialist in nuclear engineering. He can tell the difference between a meteor, a star formation, or any other natural phenomena — and something that's out of this world."

The director of a leading UFO investigative group, Jack Acuff of the National Investigation Committee on Aerial Phenomena, in Washington, D.C., told The ENQUIRER: "Material on UFOs is locked up in the National Archives that has never been made public.

"If a President were to have it released, it would be exciting news to the scientific community, and of inestimable benefit to the public.

"It's very significant that someone of Carter's stature has made this statement."

JIMMY CARTER

"The UFO was very bright and about the size of the moon."

OVER

MR. HAMILTON JORDAN: Here is a good sample of a frie
a Democratic newspaper to the President's courageous stand on UFOs. The writer
was previously anti-UFO, ribbed me. But what our President believes changes

From
The Editor**

Carter Believes In UFOs

ROBERT STIFF
Independent Editor

When Gov. Jimmy Carter agreed to meet with the Leary, Ga. Lions Club in October 1969, no one had any idea how important that might be someday.

It was on that evening at about 7:30 that Carter and a dozen other men stood around outside waiting for the Lions Club meeting to begin. They looked about 30 degrees above the horizon in the dark western Georgia sky and spotted an unusual bright light.

Carter says, "It seemed to move toward us from a distance. It stopped, moved partially away, returned, then departed. It was bluish at first, then reddish, luminous, not solid."

The future president of the United States that night became one of the thousands of Americans to see an unidentified flying object (UFO).

Carter filed a report on the sighting, just as about 12,000 others have done. The U.S. Air Force is charged by the government with the responsibility of investigating these sightings, and it has explained several UFO reports — some logically and some not so logically.

people. The Editor obtained his intimate details about Mr. Carter by paying \$10. for a private news letter that photo-copied Mr. Carter's UFO report. I enclose a Xerox of that same source for your use. Because I resigned from their investigative network, NICAP is hostile toward me. Precisely because I am a complete independent, belonging to no UFO organization, you will find me most helpful, knowledgeable and discreet in consultation. I can give you reliable characterizations of all the leading UFO "experts" because I've known them intimately for years, am beholden to none. If asked to be your unofficial, off-the-record consultant on UFO policy, I shall adopt an assumed name, never say a word to the media, and become totally self-effacing, to protect the President from criticism.

But Carter's 1969 sighting and several others remain unexplained to this day.

It wasn't the moon Carter saw because the moon wasn't visible that evening. There is no airport, military, government or research installation in the area so it's doubtful it was a plane or a balloon.

Carter remembers the bright object was "about the same size as the moon, maybe a little smaller. It varied from brighter and larger than a planet to the apparent size of the moon."

The UFO was watched by Carter and those Georgia Lions for 10 to 12 minutes. None had any idea of what it might be that moved so erratically and changed color an estimated 1,000 yards from them.

That experience made a believer of Carter in the UFO phenomenon that many Americans believe is a hoax.

Carter was quoted during his campaign for the presidency as saying, "If I become president, I'll make every piece of information that this country has about UFO sightings available to the public. I am convinced that UFOs exist because I have seen one."

As our Action column told you the other day, *U.S. News and World Report* has speculated that Carter soon will have some "unsettling disclosures" about UFOs.

I don't know what those might be or even whether I believe in UFOs. But I don't disbelieve in them either. A lot of prominent, intelligent people have seen UFOs and are believers.

I think that just because I haven't seen one I shouldn't suggest they're a bit nutty. I've never seen Alaska either, but I believe it's there.

Sincerely

*Robert
Spencer
Carr*

July 27, 1977

Mr. Hamilton Jordan
Assistant to the President
The White House
Washington, D.C.

Dear Mr. Jordan:

If you could put unbeatable new cards -- four aces ---into the President's hand at next year's SALT talks, you and I and any good American would move Heaven and Earth to do so.

I have left till last the prime consideration in UFOCOE's favor. That makes this my most substantive letter.

Sweetness and light, expanded knowledge of the Universe and new spiritual illumination from contact with a higher culture are all truly glorious goals, and well worth the small price tag that UFOCOE carries.

But my central objective is military technical intelligence: the UFO's advanced technologies: the controlled particle energy beam, the shield field, the magnetic anti-gravity drive, the cryonic solenoid, and especially their miniaturized controlled fusion power plant which runs on hydrogen and means unlimited free clean energy forever in all our vehicles, homes, planes and ships.

The Soviet Russian military and political leaders and their SALT negotiations will be shaken and cowed -- far more than they once were by our brief monopoly on the atomic bomb -- if they believe that President Carter and his engineers actually have made friendly exchanges with UFO's "intelligences" (USAF's own words) and hence are gaining access to UFO's advanced technologies, against which there can be no defense, since they are the bottom line in applied high-energy physics.

The Kremlin is making desperate efforts to seize UFO technology by force.* They have been worried by UFO landings along the borders of UZbekistan, where whole villages have rioted.*

When I see you I'll tell you how they operate.* Urgency is intensified by the fact that the Soviet leadership is sufficiently ruthless to offer them a million slaves, a million acres, and all the water in the Volga River, if only they choose the U.S.S.R. as most-favored=nation to get those weapons. But fortunately for us, their slanting ageless eyes can look into an Earthman's soul and see the degrees of goodness and agape that are really in him.

* With my professorial background I could of course pepper my letters with footnotes citing my sources; but I regard you as too sophisticated and busy for ped-antics. If you give your approval for a preliminary interview with you, I'll later bring my source files. I enclose a few clippings naming my more obvious sources. My best ones are no-name top-secret personal confessions.

When I heard the rumor that a team of young Soviet physicists had constructed the first working prototype of the Charged Particle Beam, or "death ray," I was alarmed for a day. But after a sleepless night (when man listens, God speaks), I realized that the "intelligent control" (USAF's own words) behind the UFOs would never put the awful CPB in the hands of ungodly pagan brutes like the Russian military. (Any more than they would trust Richard Nixon, when Barry Goldwater told him we ought to try to "lure" UFOs into a betrayal. Goldwater knows only too well how real the UFOs are, and what is hidden at WPAFB, where he flew in his BG uniform to view the remains.)

Mr. Jordan, if you have any doubts as to my veracity get Barry Goldwater alone in a corner and ask him to tell you truly what happened to him at WPAFB that day during his Presidential campaign. He has been bitter ever since, but I think given an advisory role in UFOCOE, we may be able to harness his passions for Senate support.

The danger in our being dilatory about UFOCOE is that the UFOs may have a time limit within which they must reach an agreement with a large and stable EARTH power for a spacious base, water, and overhaul facilities. I can tell you that the Soviets are willing and eager to trade, if they can gain a toe-hold on UFO technology.

The Russians would be the Irions' last choice as an ally. Everything the Bolsheviks stand for is anathema to these gentle, life-revering, moral, spiritual little people. Reputable witnesses swear to their mind-reading power. Even some of us Earthlings have it. The Irions all have it. A few leaders amplify ESP electronically, putting the target mind under control.

Every neuron in President Carter's heart and brain will be in harmony with theirs. They will love him. And he, them. Let us work now to hasten the day when this meeting of minds really happens, at Glorieta. At far less than half the cost of one unbuilt, useless B-1 bomber.

No previous President since Lincoln could have qualified, in their soul-searching eyes, as a friend and confidant. You realize, of course, that the President will benefit from these contacts, as others have. He will come to no harm. There are a few cases of instantaneous healings and illumination.

When I see you, if you ask me, I will tell you how each of the previous presidents has reacted to the knowledge that WPAFB has an undamaged UFO and the bodies of 12 occupants in cryonic suspension. Each president had his reasons for doing nothing. But now the opportunity has come. President Carter has the power to take humanity farther than we ever dreamed. I am only the builder of the bridge that may take him across to the UFOs' living leaders. How my three communications devices are used is up to you (although I have many pages of messages, of Biblical simplicity, each synchfonized to giant visual aids and illustrations.) I regard myself as a mere technician -- consultant, writer, off to one side.

If UFOCOE can produce even one authentic videotape with photos of President Carter and the Irio leaders, the mere implications, militarily, will stagger the Bolsheviks, who from pre-revolutionary days espoused the ETH (extra-terrestrial hypothesis).

If the President could persuade the Irio, on humanitarian grounds, to make just one peaceful fly-by in mass formation over Soviet soil while he is there at a Brezhnev summit meeting, the Russian Bear will turn into a pussy cat.

Remember, those fire-eaters Lenin and Trotsky signed the shameful Treaty of Brest-Litovsk in 1918 with the Kaiser -- history's most humiliating capitulation of a far-from-defeated Empire -- because they were scared stiff that German armies would march on Petrograd.

Half a century of personal experience with Russians has taught me one thing: No one is more arrogant than a Russian who thinks he has the advantage. Conversely, no one becomes more disgustingly abject than the same Russian who sees he has lost his advantage.

Juggling cruise missiles and Backfire bombers can drag on for years. The Soviets want it to. Through UFOCOE, we have an opportunity of providing the President with decisive winning cards. Leading philosophers agree that the stalemate can be broken only by outside intervention. "Outside" used to mean another major nation. Now it means the friendship of the Irio, the major race behind the UFOs.

VB Mr. Jordan, nothing I have written you is one-half so imaginative as a little letter which reached FDR by common post in late 1942, signed "A. Einstein," a name the mail clerk did not recognize. It began, "Some of my colleagues believe it might be possible to construct an explosive device of great magnitude by splitting the atoms of a heavy metal, such as uranium."

Roosevelt's science adviser and many other stuffed shirts scoffed. But FDR had an intuition, played it, and the rest is History. Writ in mushroom clouds. Please be like FDR. I need only a little money to get UFOCOE started.

When may I fly up for an introductory interview? 813-446-6543

Sincerely,

Robert

Robert S. Carr

I'm pleading for lead time - the 10 or 12 months needed to make our signal camp operational. Then it can convey a lot more.

Stan Spencer

From: Becky Hendrix *Becky*
Hamilton Jordan's office

Could you please have a member of your staff look over this correspondence from Robert Spencer Carr and respond appropriately?

As you will note in his letter of April 22, Mr. Carr included a copy of the report filed by then-Governor Carter on his UFO sighting.

(Hamilton does not know this gentleman and has no strong feelings one way or the other about his ideas.)

Thank you.

EXECUTIVE OFFICE OF THE PRESIDENT
OFFICE OF SCIENCE AND TECHNOLOGY POLICY

WASHINGTON, D.C. 20500

GENERAL

OS

August 1, 1977

Dear Mr. Carr:

Hamilton Jordan's office has asked us to respond to your letter of July 20 concerning your UFOCOE plans.

We appreciate your interest in the UFO phenomena and your willingness to work personally with Mr. Jordan on this matter. However, because of the pressure of Mr. Jordan's other responsibilities, this is impossible at this time.

The extensive and growing interest in UFOs has resulted in consideration of placing responsibility for their future investigation in the hands of the National Aeronautics and Space Administration (NASA). Should these considerations materialize, we shall be pleased to put you in touch with the person best qualified to evaluate your ideas.

Again, thank you for your offer of assistance in this matter.

Sincerely,

Stanley D. Schneider
